IT PAYS TO BUY WHERE YOU SEE THAT SIGN . . .

THERE'S TETRAETHYL IN STANDARD RED CROWN!

F. H. GERBELING Standard Oil Serviceman at Plattsmouth

See for Yourself what a difference it makes

DON'T take anyone else's word for it, one way or another. You owe it to yourself to put Standard Red Crown to the test in your car. See if you don't get smoother, sweeter-running power with this gasoline that contains Tetraethyl (finest anti-knock fluid known) than you do with any gasoline that does not have that feature. It's easy to make sure when it's there—by a small metal sign (required by law) that says, "Contains Tetraethyl." That little sign is on every Red Crown pump. Look for it when you buy gasoline!
