

MURDOCK ITEMS

I. C. McCrorey purchased an Oldsmobile last week and is enjoying the new machine immensely.

Charles I. Long is driving a new Oldsmobile, having previously had one of this make for a number of years. Carl Schlaphoff was shelling and delivering corn to Wabash on Wednesday of last week as was also Henry Gakemeier.

Velma Smaha and Charles Byrenes drove to Omaha last Saturday evening to attend an entertainment at the Ak-Sar-Ben coliseum.

Harold W. Tool has accepted a position selling lumber for a Pacific coast firm and during the early portion of last week disposed of two cars.

Frank A. Melvin has been doing some work at the school building, putting it in the best of condition for the opening of school in September.

Lawrence Race advises ye reporter that business has perked up a good deal of late and that he has been obliged to hire help a portion of the time.

Notwithstanding the rain of last Thursday evening, there was a large crowd of people out to enjoy the free talking picture which was put on by the merchants of Murdock.

The Wabash Kittenball team came over last Saturday night and had a tussle with the local lads, with the result that Wabash made six runs while the Murdock Lutheran team secured nine.

Oiga Mary and Jack Hitchcock, grandchildren of Mr. and Mrs. L. Neitzel, who live at Havelock, Nebr., are visiting for some time with their grandparents and are enjoying country life.

John Toms, who has been driving a car that carried him and the family over many miles, recently traded the same for a new Model A Ford, securing it through the agency of Lawrence W. Rase.

Mrs. Clara Hartung, of Kansas City, is spending her vacation with her parents, Mr. and Mrs. L. Neitzel, renewing old acquaintances and meeting friends of her youth, which she spent here.

Louis Schmidt, having some business to look after in Lincoln, came to town last Wednesday and was accompanied by the wife and mother, who enjoyed the visit there as well as the trip over and back.

Edwin McHugh was overhauling his auto last week under the direction of the garage man, Lawrence W. Rase, and has the old bus clipping off the miles much faster and more agreeable than before he went over it.

Mr. and Mrs. Martin Bohlsen, of Omaha, are spending their vacation with Charles Kupke. Mrs. Bohlsen is the daughter of Mr. Kupke. They think this is the ideal life, living in a beautiful town like Murdock, far removed from the hustle, bustle and noise of the busy city life.

Last Wednesday afternoon Eddie Craig received a telephone call from home telling of the very serious illness of his mother, who resides at Wymore and who was taken suddenly ill. He departed immediately for Wymore to render what service he could during the severe illness of the mother.

The home of Mr. and Mrs. Owen Runyon was blessed last Monday by the arrival of an eight and a half pound baby boy who came to make his home with the happy parents. Mrs. Runyon is a granddaughter of Mrs. George Utt and the new arrival a great-grandson. All are doing very well.

Little Doris Nelson, the year old daughter of Ray Nelson, the cream station man and wife, while playing in the upper rooms of the cream station, accidentally fell and rolled down the long flight of stairs, sustaining numerous cuts and bruises, but was able to be up and around as usual, after a day or so of resting.

William Gakemeier, who is engaged in the insurance business in Chicago, where he and family have made their home for many years, was given a vacation and last week drove from Chicago to Murdock, arriving here on Wednesday, with his wife and family. They will visit here for a couple of weeks with the parents, Henry Gakemeier and wife, as well as with the rest of the family and friends here.

Purchases a Farm
The McCrorey estate, which has been farmed for many years by I. C. McCrorey, was sold last week to John W. Gamble, of Omaha. Mr. Gamble has been deciding to purchase a good farm and was rather loathe to mention the fact in Omaha, as he feared he would be harassed by the multitude of land agents which the big city boasts of having. So when he happened to visit in Edmwood, he made known his desire and was forthwith presented the proposal of buying the farm of the McCrorey estate.

Dead animals removed free of charge, Telephone South Omaha Rendering Works, Market 4626. Reverse charges. n5-1fw

Proved a Great Success

The donkey ball game which was played here last Tuesday night, proved a wonderful success as a mirth provoker and also a financial success, for a count of automobiles parked at the grounds showed 186, with an estimated crowd of six to eight hundred, with receipts of \$97.80.

Attending Summer School

Douglas Tool, who has just completed another year at the state university, is now taking a summer course in his chosen line of Chemistry. Douglas and his mother were in Lincoln last Wednesday, where they were both looking after some business matters.

Proved a Riot of Fun

The donkey ball game proved a riot of fun, with a bunch of players who had never before been astride a donkey endeavoring to make progress and win the game for their respective sides. And the way those donkeys did show their stubbornness on certain occasions was really funny and brot round after round of laughter. The game was between Married Men's teams of Murdock and Edmwood, the Murdock boys copping the contest by a score of 4 to 2. The Single Men of Edmwood and Murdock also played a spirited game under regular ground rules and without the donkeys, and in this game Murdock also won by a score of 9 to 5.

Church Notice for July 7th

The regular services will be held in the morning, commencing with the Church Bible school, followed by preaching services at 11 a. m. and Christian Endeavor at 7:30 in the evening, followed by the regular evening service at 8:15. In the evening services, the members of the Louisville church, as the one north-east of town is called, will participate. In the morning there will be services at this church at 9:30, followed by preaching at 10:30. Any special services or changes in the above program will be announced.

Telephone Office is Improved

The Murdock telephone office, which has been getting along with the long distance work with an ordinary booth, has recently had a new booth built in the operating room, or rather cut off from it, for there is a desk in the little room where the patron can sit down and write as he talks and make whatever memorandum he may desire regarding the business talked about.

Besides this an outside entrance-way has been provided, affording entrance from the street without having to pass through the operating room. Also, all of the rooms have been decorated in mellow tones, making the entire place very attractive. In keeping with the general move to improve, a goodly number of new subscribers have been added, increasing the revenue of the office.

The Lincoln Telephone and Telegraph company has always made it a policy to keep their properties up in the best of condition the receipts therefrom would warrant, and their improvement of the exchange here is appreciated by patrons generally.

Community Reception for Pastor

A community-wide reception is being arranged for Wednesday evening of this week, for the Rev. Harvey A. Schwab and family, who have come here to reside, while Rev. Schwab is pastor of the Murdock Evangelical church. The affair will be held at the high school building and the public is cordially invited to attend and meet the new pastor and family, who have come here from Omaha, where he has held a pastorate during the past seven years. There will be a short welcome program and also, as is the custom at occasions of this kind, refreshments served to all present.

Come out Wednesday night and join with the community in welcoming the new pastor and his family to Murdock.

Cass County Farm Bureau Notes

Copy furnished from Office of County Agent Waincoat

Mothers Vacation Camp.

Eastern Nebraska women again have the opportunity of attending Mothers Vacation Camp at Camp Brewster, July 25-28. Particular attention is to be centered around hobbies and any women having hobbies, such as scrap books, memory books or poetry books or any other hobby which one can conveniently take, are being urged to bring them.

Enrollment fee is \$4.50. There is to be no advance registration fee but this fee is to be paid when the women arrive at camp. If you are interested in attending please notify the Farm Bureau office so that necessary information regarding camp may be sent to you. It is also necessary that we know the number who expect to attend a day or so before camp opens or by July 22.

Cutworms and Army Worms Causing Damage.

Inspection of the cutworm situation, particularly in alfalfa fields, on Friday and Saturday, showed most of the worms had reached maturity. Taking off the hay, together with a few days of good hot sunshine will practically destroy all these worms and will stop the ravages on alfalfa and grain crops. In some places however, the army worm is still feeding on alfalfa fields and are going into the corn fields. Some farmers have reported the loss of an acre or two of corn which lay adjacent to alfalfa fields. The march of these worms from alfalfa fields into corn and other crops may be stopped by the use of a poison bait, the formula for which is given below. It is practically impossible to poison the worms in alfalfa fields as heavy as the growth is this year, before it is cut. In some places the worms have stripped the buds and new shoots of the alfalfa crowns before the hay was removed. However with good growing conditions these fields will probably send up new shoots and the damages will not be apparent in a few weeks.

Formula for bait for cut worms and army worms: 100 lbs. wheat bran; 5 lbs. white arsenic or paris green (do not use lead arsenate); 2 qts. molasses or 3 oz. amy acetate water enough to make a crumbly mash.

Mix bran and white arsenic dry in a large tub or bucket. Mix molasses and water together and add to bran and arsenic mixture to make a crumbly mash but not sloppy. Spread broadcast by hand after sundown and before dark in the evening.

Life history of cutworms: The various cutworms are known under a number of popular names, such as the glassy cutworm, greasy cutworm, variegated cutworm, spotted cutworm, etc., but the injuries caused by them are very similar and their habits in general are also much the same. The parents of cutworms are grayish or brownish moths, or "millers," which commonly occur at lights during summer evenings. Each moth may lay from 200 to 500 eggs, either in masses or singly, in fields covered with dense vegetation, and hence are to be found more often in cultivated fields which have been in grass or weeds the preceding fall. The eggs hatch in the fall, a few weeks after they are laid, usually during September, and the young cutworms, after feeding on grass and other vegetation, until cold weather, pass the winter as partly grown caterpillars. If such infested fields are left to grass, no noticeable injury is likely to occur, but when it is broken up and planted to corn or other wide-row crops, the worms, being suddenly placed on "short rations" often injure severely the newly planted crops, the nearly full-grown worms feeding greedily and consuming large amounts of food. In northern latitudes they attain full growth and stop feeding in late June or early July, and change to the pupal or resting stage. The injury often ceases so suddenly that farmers are at a loss to account for the fact.

Can Roosters for Winter Meat.

Many women are making the canning of poultry a part of their year round canning program. It is profitable to can the rooster and the hens that have quit laying. Either the year old or older birds that are in prime condition may be canned. Plump, well-fed hens, two years old or a rooster eight to ten months, have as good texture and a better flavor than six months old chickens. Plan now for chicken as part of your winter's menus and help fill your supply shelf instead of marking all of your old birds. Extension Circular 945, Canning Poultry, gives direc-

tions for canning chickens, and may be obtained at the Farm Bureau office.

Nearly 3 Million Farmers Voted in Four Referenda.

A recapitulation of final figures from four agricultural referenda held during the last eight months was announced by the Agricultural Adjustment Administration. The total vote cast in the four referenda, according to approximate complete figures was 2,918,678. Of this number, the vote in favor of continuing the programs was 2,511,109 and the total of those opposing was 407,569. More than 86 percent of the votes cast favored continuance. Also, the total vote shows that the percentage of farmers who participated in the several referenda compared to the total number of those who were eligible to vote, was considerably higher than the usual percentage of eligibles voting in civil elections. The total vote was divided as follows: Corn-hog referendum, 466,561; Bankhead cotton act, 1,521,887; Kerr-Smith tobacco act, 394,540; Wheat referendum, 466,561. The vote for the continuance of the respective programs was: Corn-hog, 374,585; cotton, 1,361,347; tobacco, 370,907 and wheat, 404,270. In the corn-hog referendum approximately 70 percent of the votes cast were in favor of continuance. The percentages in the other three referenda were cotton, over 89 percent; tobacco, over 97 percent; and wheat, over 86 percent. Those voting on the Kerr-Smith tobacco act voted on the basis of acreage and more than 92 percent of the acreage was voted in favor of continuance of the act. This was the only program under which voting was on the acreage basis.

4-H Club Camp at Camp Brewster.

Many applications have already been received from Cass county 4-H'ers planning to attend the Cass-Otoe-Sarpy-Douglas 4-H club camp to be held at Camp Brewster July 21-24. The enrollment fee is \$3.25 plus six eggs and six potatoes. Application blanks may be secured from your local leader or from the Farm Bureau office.

Camp Brewster is a privately owned, 75 acre site beautifully located between the rolling hills overlooking the Missouri river, one mile south of Omaha on Bellevue Boulevard. Many beautiful trees and thick grassy lawns provide plenty of shade for outdoor living. The outdoor swimming pool under the shade of big trees with its spurting water fountain, the tennis courts, the baseball and volley ball grounds, the wide-screened verandas where the boys and girls will find ping pong tables and room for other enjoyment, and the spacious club room cannot fail to appeal to 4-H boys and girls.

Only 4-H club members, and leaders, enrolled for the year 1935, who have their work up to date, are eligible to attend camp. The first 75 applications to be received by July 17th are all that can be accommodated from this county.

Still Time to Spray.

The peak of the emergency of the first brood of codling moths came early last week. About 75 percent of the overwintering larvae have turned to mothers and the other 25 percent will struggle along for another week or more. There are very few live worms in the apples at this time. Evidently the cool weather, the dash-rains and the high humidity have helped to weaken the worms so that the sprays were very effective. However another cover spray should be applied by June 29th to catch the stragglers. Use 1 1/2 pounds of lead arsenate to 50 gallons of spray.

Cherries are showing leaf spot. Late cherries can be sprayed again but for Richmonds it is too close to harvest. Better cover these after the harvest with Bordeaux 2-4-50. Late cherries can be sprayed with Bordeaux before harvest and again afterward. It is essential to keep the leaves healthy if you expect a good crop next year. Frog eye is more common than scab and from now on will be much worse particularly on Jonathan unless some fungicide is used to protect the leaves. Blotch is showing up on Duchess. Where this disease is a threat (on Missouri Pippin, Northwest Greening and Gano) use 2-4-50 Bordeaux. Bordeaux could be used at 1 1/2-3-50 where blotch is not feared or one could use 2 pounds of wettable sulfur to 50 gallons of spray.

"Crops Day" July 2.

Because of the prospective delayed maturity of small grains, the annual "Crops Day" at the Agricultural College will be held about two weeks later than usual this year. It is expected that by July 2nd, most of the small grain will be nearing the ripening stage and in the best condition to reveal the differences in varieties.

All crops are making excellent growth, and this year should be a good one to see how the varieties compare as to disease resistance, lodging, date of ripening, etc., and how the various soil and crop treatments affect growth and yields. Everyone is invited. Lunch at noon will be provided at a minimum cost. Transportation to plots will be provided for those who do not have their personal cars. Six stops will be made at the Agronomy Farm.

CLEVER COOKING CLUB

The Clever Cooking club met at the home of Frances Hart, June 26. The club voted to continue their scrap book of last year. They filled out their food charts for the first time. Miss Florene Schafer, their leader, gave them instructions for their second cooking project. The members each helped in making lemonade, which was served with delicious refreshments.

The next meeting will be held at the home of Wilma Livingston, July 10.

MARION KAPP, News Reporter.

KITCHEN SHOWER GIVEN FOR JUNE BRIDE THURSDAY

Mrs. John Rummel entertained the members of the Jolly Workers club on Thursday afternoon at her beautiful country home which was a pleasant scene among the spring and summer flowers. The occasion honored Mrs. Clyde H. Graves, who was formerly Miss Louise Rummel, at a kitchen shower. The afternoon was spent in playing games and writing of recipes. The bride was presented with a large basket of beautiful gifts, when opened proved to be very useful for her kitchen.

Those present were mostly friends of Mrs. Graves who lived in the vicinity of where the honoree was born and raised. Late in the afternoon a delicious lunch was served by the hostess.

NOTICE TO PUBLIC

VISIT IN THE CITY

Mr. and Mrs. B. F. Stewart of Gillette, Wyoming, are in the city as guests at the home of Mr. and Mrs. F. H. Mumm and other of the relatives and old time friends. Mrs. Stewart has just been released from the St. Joseph's hospital at Omaha where she has been for several months recovering from the effects of injuries received in an auto wreck. While she is still suffering from the serious injuries she is now feeling much better and pleased to be able to be around again after the long illness. The many friends will be pleased to learn that she is now able to be out and trust that she may soon be able to recover from the effects of the accident.

DOING VERY NICELY

The reports from the St. Joseph hospital at Omaha are to the effect that Mrs. John Gruidel of that city, who underwent a serious operation on Tuesday, was doing as well as possible under the circumstances. Mrs. Gruidel is a former resident of this city, a daughter of Mrs. James Jelinek. Mrs. Anna Zitka, a sister, was at Omaha for the operation.

LET US MAKE YOUR 4th of JULY TRIP SAFER

BEFORE you start on your holiday trip, let us completely inspect your car. There is no charge for this service and it will assure you of a safer and more enjoyable trip.

For the convenience and safety of car owners Firestone has established more than 500 Auto Supply and Service Stores throughout the country, and thousands of Firestone Dealers are also equipped with complete Auto Supplies and complete Service Departments, to test and service your tires, brakes, batteries, spark plugs, in addition to power lubrication and crank case service.

AVOID THE DANGER OF BLOWOUTS

Firestone removes the danger of blowouts by preventing their main cause—internal friction and heat. This is accomplished by Gum-Dipping.

THESE ARE THREE QUESTIONS AND ANSWERS THAT WILL SOLVE YOUR PROBLEM OF WHAT TIRES TO BUY:

1 "Will the tread give me the greatest traction and protection against skidding?"

Recent tests by a leading University show that Firestone High Speed Non-Skid Tires stop a car 15% quicker than any other of the leading makes.

For eight consecutive years Firestone Tires have been on the winning car in the dangerous Pike's Peak Race where a skid means death.

2 "Are they blowout-proof?"
Firestone Gum-Dipped Tires have the most amazing records for being blowout-proof of any tires ever built. In the gruelling 500-Mile Race at Indianapolis, May 30th, every one of the 33 cars was equipped with Firestone Gum-Dipped Tires. Not one of the 33 drivers had tire trouble of any kind.

Ab Jenkins drove his 5,000 pound car on Firestone Gum-Dipped Tires over the hot salt beds of Utah, 3,000 miles, averaging 127.2 miles per hour, with temperatures as high as 120°, without tire trouble of any kind.

3 "Without sacrificing these two important safety features will they give me longer mileage, thus making them the most economical tires I can buy?"

Firestone High Speed Tires not only give you more than 50% longer wear, but also lowest cost per mile. In fact, unequaled mileage records of thousands of car owners add undisputed evidence of the longer wear and greater economy of Firestone High Speed Tires.

Equip your car with a set of Firestone Gum-Dipped Non-Skid Tires, the safest tires ever built and avoid the dangers of skidding and blowouts.
