No More Jobs to be Given on WPA Funds

Felton Says the 20,061 Persons Now Working are All that Can be Cared for at This Time.

With a total of 20,061 persons reported employed on work projects in Nebraska by the area statistical office, State WPA Administrator Felton has announced that he instructed district directors several days ago it would be impossible for them to put additional persons to work on projects.

Felton said, "Nebraska now has employed as many persons as funds allotted to the state will permit. Until such time as additional funds are allowed by Comptroller McCarl, we will be unable to give the balance of unemployed in the state jobs. The state WPA organization is prepared to give work to all certified unemployed as rapidly as the money is available, but we cannot expand further until additional funds are allotted."

Of the total of 20,061 now employed on WPA jobs in the state, 17,254 have been drawn from the certified relief rolls, while 343 are non-relief workers. The source of the balance of workers, totaling 2,464 is not disclosed.

The figures for the six districts are as follows:

- District 1—2,622 relief, 49 non-relief. Total, 2,990. District 2—6,924 relief, 98 non-relief. Total, 8,043. District 3, of which Cass county is a part—3,793 relief, 42 non-relief. Total, 4,392. District 4—2,138 relief, 84 non-relief. Total, 2,446. District 5—1,133 relief, 41 non-relief. Total, 1,378. District 6—644 relief, 29 non-relief. Total, 812.

In the third, or Lincoln district, Lancaster county leads with 1,479 relief, 15 non-relief. Total, 1,798.

Cass county has 47 relief and four non-relief. Total, 75. Otoe county has 222 relief, 1 non-relief. Total, 228. Nemaha county has 150 relief, 1 non-relief. Total, 167. Richardson county has 237 relief, 11 non-relief. Total, 271.

Sarpy county, in district 2, has 65 relief and 2 non-relief. Total 67. Douglas county leads the state, with 6,777 relief and 96 non-relief. Total, 7,882, or more than a third of the number employed in the entire state.

Incidentally, the rate of pay in Douglas county is the highest of any county in the state for all four classifications of labor, ranging from the common labor class, which draws \$32 a month in Cass county and \$45 in Douglas county, up to the professional type, which is the highest paid, drawing \$48 in Cass county and \$79 in Douglas county.

From this compilation, it is quite evident that Douglas county is not only receiving more than a third of the total number of jobs but close to half of the money being expended for labor, with material expenditures probably running equally as high.

Except for Butler and Polk counties, with 45 and 16 respectively, Cass county with 75 total number of employed, is the lowest county in the Lincoln district.

FLAYS DRINKING BY GIRLS

Philadelphia, January 1—Denis Cardinal Dougherty, of the Catholic archdiocese of Philadelphia criticized drinking by girls "who are encouraged by their mothers in order that they may pass for up to date members of the so-called aristocratic society."

"Time was," he said, "when it would blast a young girl's chance to get married if it leaked out that she drank. Now, in too many cases, young women drink publicly and sometimes have to be carried out in an intoxicated condition from hotels, taprooms and private dwellings."

Cardinal Dougherty praised the efficiency of diocesan total abstinence societies.
