Reach Decision at White House to Pay Farmers

Conferees Agree to Speed Temporary Legislation to Enactment—Work on Program.

A definite decision to seek immediate "temporary" farm legislation continuing federal payments to farmers was reached at a white house conference at Washington. Administration leaders who talked over the problem created by AAA's invalidation for an hour with President Roosevelt said that while details remain to be worked out, the general plan is this:

1. Crop production would be adjusted thru retirement of acreage as a soil conservation and erosion prevention measure.
2. Farmers would be reimbursed for land thus retired thru federal "rental" payments.
3. Such authorization as is necessary will be sought thru amendments to existing laws, rather than new ones.
4. An appropriation of 300 to 400 millions will be asked to finance the program's estimated cost in 1936.
5. An additional appropriation of about 300 millions will be requested to reimburse farmers under the invalidated 1935 adjustment contracts.
6. A "permanent" program might be sought later this session or deferred until next year.
7. Provision of the AAA untouched by the supreme court's decision would be strengthened and more fully utilized.

Pressed for Quick Action.
Speaker Lyons told newsmen after leaving the white house that the necessity of enacting farm legislation "is so immediate that it has got to be done at the earliest possible moment, and there won't be time for permanent legislation now." There were similar expressions from Chairman Jones, democrat, South Carolina, of the corresponding senate committee.

Taxation, it was learned authoritatively, was not discussed by the group at the white house, which included Secretary Wallace, Secretary Morgenthau, Attorney General Cummings, Senator Robinson, the majority leader, AAA Administrator Davis and Solicitor General Reed.

In the background, however, there was said to be contemplated the re-enactment of processing taxes as excises to add to the treasury's general revenue fund. It is from that fund that the cost of the new program would be appropriated.

President O'Neal of the American Farm Bureau Federation, addressing the opening of the national agricultural conference strongly advocated legislation to recover processing taxes levied and unpaid up to Jan. 6, including those impounded in federal courts.

Cummings to Decide Soon.
Attorney General Cummings told newsmen he expects to decide "shortly" whether he will ask a review of the Louisiana rice millers case, in which the supreme court ruled in effect that impounded taxes must be returned to processors.

Cummings also said he was considering a plan which would correct the "injustice" he said had accrued to processors who had continued to pay into the treasury while others were paying into court depositories.

On capitol hill action was under way to appropriate 300 millions to pay farmers under 1935 adjustment contracts even before the white house session. The senate agriculture committee quickly approved a bill by Senator McNary to authorize the appropriation. It also approved a bill to provide \$6,000,000 for feed and seed loans for 1936 crops. This measure was sponsored by Senator Smith.

The AAA announced that an interpretation of Comptroller General McCar's ruling on administrative funds insured continuance of existing marketing agreements and milk licenses.

DISCOVER THE VITAMIN H
Columbia, Mo.—Two professors at the University of Missouri had a new vitamin correlated but still had a tough job on their hands in harnessing it for practical purposes. Albert G. Hogan, professor of animal nutrition, announced discovery of vitamin H after eight years of research with a Luther R. Richardson, instructor in agricultural chemistry.

Professor Hogan appraised the discovery as follows: "We hope it will prove valuable in the cure of pellagra, but our experiments haven't gone far enough to determine definitely whether it will or not.

"As a matter of fact, I don't even know if there is any practical value in vitamin H, but it has been discovered. It possibilities remain to be demonstrated."

He and his partner will continue the research. "After eight years there's no reason to stop now," he said.

Youth Carries United State' Hopes In 1936 Winter Olympics in Germany

American Team Stars Are Vinson and Dorrance

By ALLEN REAGAN
International Illustrated News
Feature Writer

NEW YORK.—United States hopes for victory in the 1936 winter Olympics at Garmisch-Partenkirchen, Germany, rest largely on the youthful shoulders of two stars in their early 20's.

These two are Miss Maribel Y. Vinson, senior woman's figure skating champion of the United States for the past eight years, and Richard Dorrance, Dartmouth's sensational skier.

Sports authorities consider both have a good chance of taking first in their specialties. Sonja Henie of Norway, women's figure skating champion of the last two Olympics, is Miss Vinson's chief rival while Dorrance will have the cream of Europe against which to compete.

Miss Vinson won her first senior singles title in 1928 and has won it eight times. She ranks far above any American competition in her class. During her girlhood in Boston, her father tutored her and taught her the rudiments of a sport which she has mastered by diligent practice and rigid training.

Reporter on Times
She averages two hours of practice a day for six days a week, maintaining this schedule along with her job on the New York Times where she covers women's sports. In this capacity she has built up a journalistic reputation almost as enviable as her renown in the skating world.

In winning her eighth national title recently Miss Vinson won special acclaim for her famous inside spread eagle. She is also master of the 40 standard skating forms which must be included in the repertoire of any skater entered in biw time competition.

At the Olympic skating contest, entrants will be required to demonstrate their skill in six of these figures. Contestants will be graded two-thirds on the basis of their performance in this routine and will be graded one-third on the more spectacular free-skating.

Dorrance Born in Florida
Dorrance was born in Florida but lived part of his youth in New England where he first took up skiing. It was when he was sent to school in Germany, at Garmisch-Partenkirchen, the very town where the 1936 winter Olympics are to be held, that he won renown as a skier.

Although a slightly built youth, Dorrance overcame his physical handicap by developing a unique style. His spectacular form was perfected to such a point that he won recognition throughout Europe when only in his teens.

When he returned to United States and later enrolled at Dartmouth, he became a collegiate sensation. His coach at Dartmouth, a veteran German expert, was wise enough not to try and make Dorrance conform to a more orthodox style, but allowed him to perfect his own peculiar style.

Dorrance excels in nearly every branch of skiing, the slalom, the cross-country and the jump. He finished No. 1 in the Olympic trials held to select the U. S. team.
