Dan Anderson tells of his experience in saving two litters of pigs born during the extreme cold weather by means of an A type brooder house and plenty of straw to keep the new arrivals warm, which he says would have been utterly impossible under other conditions. He is a booster for the A type hog house, a design that has come into quite general use during the last few years.

Mr. and Mrs. George C. Sheldon and daughter, Ruthann, were in Omaha last Saturday, where they went to see the famous doll house, property of Miss Colleen Moore, the movie actress, which was on exhibition in that city. They were accompanied by Mary Alice Sumner and Cecile Mitchell. All found pleasure in inspecting this expensive piece of diminutive architecture, which represents an outlay of many thousands of dollars by its owners.

Will It Last Another 28 Years?

For 28 years, Nels Anderson, proprietor of the amusement hall here, has been putting up and taking down (or had someone do it for him) the vestibule at the front entrance to his place of business, a contrivance that has saved him much money in fuel bills in that length of time. As spring draws near, it is again being removed for storage through the summer. Mr. Anderson says he will not continue doing this for another 28 years, for he fears neither he nor the lumber will last that long. But perhaps he is mistaken, who knows?
