HAS SUBSEA DETECTOR
London.—Great Britain possesses a new submarine detector capable of immunizing armed ships from under water attack, Somerset de Chair announced in the house of commons. De Chair, son of the famous Admiral Sir Dudley de Chair, said also that the admiralty had constructed an anti-aircraft ship which was able to pour a terrific volume of fire in defense of harbors and of other ships. The submarine device, De Chair said, operates on the reflector ray principle so that practically no submarine can come within torpedo range of a ship without detection and destruction.

The First Christian church of Plattsmouth is taking on new life. The revival has already inspired and given to the church a vision of her task of saving souls and they see the need of a more efficient equipment, to take care of its growing Sunday school. Plans for the finishing of the basement have been made and will be presented to the Bible school and church next Sunday morning for your approval. We are expecting you not only for Sunday but your presence at the revival meeting each night at 7:30, that is now in progress. Your interest and share in the meeting will be a great blessing to you as well as the rest of us. Hear the evangelist on the following subjects:
