Inquires as to Shipping Facilities for Grain

Local Missouri River Committee Finds Interest Shown in Letter from Steamship Lines.

The Missouri River Improvement committee have in their possession a letter from the Pacific Steamship Lines, with headquarters in New York City, which shows the interest in having a market provided for the shipment of the grain by water from Plattsmouth, to the Pacific coast and other parts. Below are excerpts from this letter:

"As you probably know the states of California, Oregon and Washington, prior to 1933, used large quantities of corn grown in Nebraska and Iowa. However, as a consequence of the drought, and high freight rates, this corn business has been largely diverted to the Argentine. According to information I have before me, the states of Nebraska and Iowa, during the year 1932, produced \$10,000,000 bushels of corn. These are the chief crops of the above states, and the ones which produce the most income, yet if the data I have before me is correct there is not a single elevator on the "waterfront" at Plattsmouth, Omaha, Council Bluffs, South Sioux City or Sioux City. Of course, up until the present time, there has been a reason for such a situation because the river was not navigable above Kansas City. However, before another crop is harvested, I understand there will be a navigable channel into Plattsmouth.

"If my information is correct, the rail rates from the interior of Nebraska and Kansas is the same to Omaha, Plattsmouth, St. Joseph and Kansas City. This being true, the question naturally arises as to whether Kansas City (where a new elevator is now under construction, will not draw grain from territory which rightfully belongs to Plattsmouth? Without adequate elevator facilities, situated on the waterfront, it seems inevitable that a substantial part of the grain produced in eastern Nebraska will find its way into the Kansas City elevator.

"Of course, at ports having no waterfront grain elevators, they will be unable to enjoy these attractive rates. This company is interested in transporting grain grown in the Mississippi valley, for ocean shipment to the west coast, but this hope cannot be realized until the Argentine shipments stop. Presumably the port of Plattsmouth will provide the necessary elevator facilities."

In the year 1870 Mr. Nathan and Mr. Solomon founded the firm of Solomon & Nathan and their place of business was opened in the east portion of the city where the steamboat landing made the section a very lively place and from the stores located in that part of the city freighting parties were supplied to start for the west and Denver, the goal of the freighters.

Mr. Nathan continued in business here for a number of years and then disposed of his holdings fifty-five years ago and removed to the central part of the state, altho the firm of Solomon & Nathan continued here for a great many years.
While here Mr. Nathan met a number of the old time residents of the community and enjoyed a very pleasant visit and discussion of the days of long ago.
