Getting Ready for Work

The O street road is being gotten in condition for the black top coating that is to be applied thereon to complete the nine mile gap, extending from a point three miles east of Avoca corner to a point seven miles west of the same spot. The road is being widened considerably in order to get more dirt and do away with the steeper grades along the highway, and at one place along the route to be paved Fred Marquardt's fence is being set in seven feet.

The black top pavement has been perfected to a point where it is said to be very good and able to stand up under heavy traffic. There are some who would rather see this remaining gap paved with concrete same as the rest of the road, but for the most part people seem willing to leave the matter of material with the State Highway department, which has made exhaustive tests of the various materials and can be depended upon not to put anything down on this heavily traveled road that will fail to stand up or prove unsatisfactory in any way.

Sentinels of Health
 Don't Neglect Them!
 Nature designed the kidneys to do a marvelous job. Their task is to keep the flowing blood stream free of an excess of toxic impurities. The act of living—1/2 of it—is constantly producing waste matter the kidneys must remove from the blood if good health is to endure. When the kidneys fail to function as Nature intended, there is retention of waste that may cause body-wide distress. One may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feet tired, nervous, all worn out. Frequent, scanty or burning passages may be further evidence of kidney or bladder disturbance. The recognized and proper treatment is a diuretic medicine to help the kidneys get rid of excess poisonous body waste. Use Doan's Pills. They have had more than forty years of public approval. Are endorsed the country over. Made in Doan's. Sold at all drug stores.
