I WILL OIL-PLATE YOUR ENGINE in next to no time. And even quicker I can plainly state how it saves your oil and your engine to change to Oil-Plating. After I put in Conoco Germ Processed oil, which is the only oil that forms Oil-Plating, let's say you run a bit and then want to park—a few minutes or maybe hours. But every drop of Germ Processed oil will not drain back down into your crankcase like an everyday oil. Instead of that, a definite amount of this oil is always left closely plated all over the pistons, cylinders, bearings and other parts, from the bottom clear to the top of your engine. You'd say that the oil is united for good, to every working surface. I don't know of anything that will make Oil-Plating let go, no matter if you want to stop and start at every doorway, or make 500 miles a day across the mountains. Staying in place and not just splashing on and off, Oil-Plating can't leave the usual openings for friction and wear. Your smooth, quiet, cool-running engine will certainly make you notice that, and of course, your own eyes will see Conoco Germ Processed oil staying up around full.
