An interesting article giving facts and pictures appeared in the Sunday paper.

The Fire-Fighter's Ultimatum

By IRVIN S. COBB

A PHYSICIAN had a negro cook who was a chronic complainer. One day she came in groaning with a misery in her right side, and the doctor offered to prescribe for her. He went into the dining-room,

poured out a spoonful of tobacco sauce, stirred in some English mustard and handed the dose to the sufferer, telling her to take it down at one swallow.

It was two weeks or more before Mary turned up with a new pain. This time it was in her other side. Her employer offered to mix her another dose of his medicine.

"No sah!" said Mary firmly. "I'm much obliged to you, Doctor; but I've got my mind made up never ag'in to drink nothin' what water won't quench!"

Looking for Ensilage Cutter
Roy Stotz, Hatuth Feubery and Rosce Brog, cousins of John Bornemeier, were in Murdock from their home near Milford during the past week. The trip here was made for the purpose of locating, if possible, an ensilage cutter, with which to cut up their corn fodder and provide

feed for their stock. Cass county has become accustomed to ensilage cutters the past few years, but this year, with a fairly good corn crop assured, will be able to release some, if not all, of its machines of this type to less fortunate neighborhoods, where the crop is again reported as very meagre or a complete failure. The boys from Milford report there will not be any matured corn in that vicinity.

Painted a Fine Picture
Marion Schewe, who was graduated last week from the University of Colorado, at Greeley, had as one of the examination requirements to complete his course in Art, the painting of a mural. He first thought to paint a picture 10x10 feet in size for Murdock, but at the suggestion of the instructors there concluded to paint it on the wall of one of the college buildings at Greeley. The picture he painted was 7x10 feet in size and depicted a threshing scene in the old steam engine days. The painting showed the entire crew, including the engine and separator men, water hauler, bundle pitchers and grain wagon to be hauled away from the machine when filled, together with men stacking the straw, as was the vogue in the early days.

In making the painting Marion selected a number of men from this vicinity as his subjects and anyone acquainted here would readily recognize a number of Murdockites in the scene.

Instructors at the university have estimated the value of the completed painting at one thousand dollars.
