Korn Klub Wins Softball Contest from Murdock

Exciting and Game Filled With Thrills as Locals Win by Score of 5 to 2.

From Friday's Daily—
The Korn Klub team and Murdock engaged in an exciting game last evening in which Plattsmouth won by a score of 5 to 2. All scoring was done in the last inning.

From the first inning on it was anybody's game, with Kennedy getting nine Murdock batters on strikes and allowing but five hits. Miller did the twirling for Murdock, allowing only four hits and whiffing five.

In the last of the sixth, Hayes started the fireworks with a looping single over first, after which Ault was safe on a fielder's choice. Stephenson drew a base on balls, filling the bases. Spidell then hit a grounder to short, who threw too late to third to get Ault, and Hayes scored on the play, Stevie taking second. Kennedy was safe on an error by the second sacker and again filled the bases. Chet Smith, the slugging left fielder, then smashed a triple to center, scoring three runs. Ofe grounded out to the third baseman, ending the inning, showing five runs on two hits.

Murdock got their two runs with Gakemeier getting an infield hit, but was picked off first by a beautiful peg from Spidell to Svoboda. Bahemeier was safe on Aylor's error. Schewe then came up and blasted a triple, scoring Bahemeier. Rosenow skied to left field and Schewe scored after the catch.

Ashbaugh had two hits for three trips to the plate, as did Schewe of Murdock.

The game was very much enjoyed by a pleasing crowd, who will be on hand to see another good game this evening starting at 8:30.

FLOWER SHOW EXHIBIT

One of the finest educational exhibits of the King Korn Carnival was included in the displays at the flower show in the Elks building.

This exhibit was prepared by the pupils of School District 60 of Murray, Nebraska, supervised by Miss Anne Harris, teacher. This year the project carried on was of a nature study, consisting of leaves, weeds, seeds, and wild flowers.

In this exhibit were contained a collection of forty different varieties of tree leaves prepared in spatter work of black ink which makes a collection that is very attractive.

Forty-five varieties of weeds which have been gathered and mounted by the pupils were also included.

Eighty-six different varieties of grass, weed, flower, vegetable, tree, fruit and other miscellaneous seeds were mounted and labeled. The English walnut exhibited in this collection is grown by Mrs. Herbert Rohrdanz of Mynard.

The wild flowers that were seen with this exhibit are native of Nebraska. The Martynia which may be seen in this exhibit is a native of South America and grown in Cass county. It produces fruits with hooks five or six inches in length, which get imbedded into the flesh of animals, often causing death to thousands of animals annually. This is also known as the most cruel plant to the animal kingdom.

Different projects have been carried out each year by the pupils of district 60 in connection with their regular routine. The pupils feel this is one of the most interesting projects carried out in recent years. Miss Harris is complimented on bringing such a fine exhibit within reach of the public and for her splendid cooperation with the Plattsmouth Flower club.
