

EAGLE NEWS ITEMS

Mr. and Mrs. Will Ossenkop of Walton called at the W. B. Hursh home last Tuesday evening. Mr. and Mrs. A. G. Gerd and family of Coe... The O.E.S. Kensington were entertained at the home of Mrs. Floyd Dyart last Wednesday afternoon.

Council Wishes Views on Paving; Call Meeting for November 4th

Reports Given of Tecumseh Trip— Would Waive Penalty Interest on Special Improvement Tax

With a full attendance the city council last evening had a very busy session with the reports of the visit to Tecumseh to inspect paving and the plan to change the location of the city scales occupying the main part of the evening. C. D. Palmer asked permission to cut the curb near his home on North 8th street and which was granted.

Don't let gladioli, canna or dahlia roots remain out over night after digging. The frost will do them no good. Put them under cover to dry.

Plant annuals this fall for early bloom next year. It is also a good time to start the cutting garden.

Tender annuals can be started this fall in a cold frame or protected seedbed. This is also true of the slow germinating perennials.

A dibber is a good tool for bulb planting. Learn the knack of giving it a swinging twist to make the bottom of the hole round so the bulbs will not be "bung" with air space under them.

A south wall is the best place to plant your snowdrops. Put them near a window, and you will wake up some sunny February morning and find them in bloom.

Spade the tulip beds early and have the soil ready when the bulbs arrive. Bad weather may set in, which will make digging difficult, and you will have to use speed to get the bulbs in.

Rake bulb beds level after they are planted so there will be no depressions to collect water.

Dig two spades' depths down in preparing a bed for lilies which must be planted deep, particularly the stem rooting types.

Narcissus like to grow among the roots of other plants. For this reason they flourish excellently tucked in among perennials in the garden, or at the base of the shrubby border.

Color-Scheme Planting With Tulips

Three Tulip Types; Single Early, Cottage and Darwin.

No flower is more suited to color-scheme planting than the tulip. You can count with assurance on the height of each flower, as well as on its time of blooming and location. One bulb will usually produce one flower, although there are some varieties which occasionally branch and bear more than one blossom.

A white and black combination is possible by using one of the dark purple Darwins and a white variety. A violet-purple is a striking picture in combination with a pink. The pale pink variety, Clara Butt, is set off very well with a pale lavender.

Working out such combinations is half the fun of tulip gardening.

BATHUB TRICK SAVES BOY IN LAKE PLUNGE

FORT WORTH, Tex. (UP)—Four-year-old Don Smith perhaps owes his life to a trick he learned in the bathtub at home.

Playing around a pier where his parents were fishing, Don reached for a pole which had fallen into the water and tumbled head-first into 14 feet of water.

Heavy clothing and water-filled boots held the child on the bottom until Turney Estes jumped from his boat and brought him up. When they tried to pump water out of the youngster, there wasn't any water.

"I held my breath like sister taught me to when she ducked me in the bathtub," Don told his parents.
