Warn Farmers Against Paying Funds to Agents

Solicitor of Agricultural Department Issues Warning of Campaign to Raise Funds.

OMAHA, March 8 (UP)—Farmers were warned today against paying any money to alleged "agents" who are reported to be trying to launch a campaign for refund of processing taxes to farmers who did not participate in the various crop control programs.

The warning was contained in the letter for Mastin G. White solicitor of the U. S. department of agriculture to Walter G. Dearth, secretary of the Omaha Live Stock Exchange.

"There is no provision of law authorizing refund of any processing taxes to a producer unless the producer was also the processor and paid such taxes directly to the collector of internal revenue," White wrote in response to a query from Dearth.

"Statements to the effect that a farmer who did not process his own product but sold them to a processor is entitled under existing law to obtain refunds for such taxes from government are false and misleading, and farmers should be warned against paying any money to those who make such statements."

According to Mr. Dearth, so called "agents" of the government have been active in the midwest and other sections of the country trying to organize non-participating farmers to push a campaign for refund of the taxes to non-participants. White declared that there is no basis for such organizations.
