## BIG BATTLE IN MOROCCO

### Army of Sultan Defeated by Pretender of the South.

## CURD BAGDANI CAPTURED

### Commander-in-Chief of Emperor's Troops is in the Hands of Rebels—Customs House Raided.

TANGIER, Oct. 21.—On October 17 between Shawia and Mequines occurred the first battle between forces of Sultan Abdul Aziz and Mulla Haid, pretender to the throne and known as the sultan of the south. The latter was overwhelmingly victorious and the triumph is of great importance as strengthening sentiment in favor of Mulla Haid.

According to reports just received from Mequines eight regiments of the pretender's army under command of Mulla Rachid defeated the sultan's troops and captured several pieces of modern field artillery, together with Curd Bagdani, commander-in-chief of all Abdel Aziz's forces. During the night of October 17 some of Mulla Haid's men made a third raid on the customs house at Mequines and seized 10,000 cartridges and on the following night they made a fourth raid on the same place and captured 200,000 more cartridges. The first division of the imperial troops, consisting of 800 men destined for Mogador, arrived at Tangier today. Communication with Mogador is interrupted.

The officials at Mequines have received information to the effect that Mulla Haid started on October 19 for Gharrab, the district between Tangier, Rabat and Fez. Haid has issued a notice to the effect that he guarantees the protection of all foreigners at Morocco city, inviting certain foreigners to leave Mequines to Mequines to return to Morocco city and resume their business there and ordering his representatives to furnish them with everything necessary to enable them to make the return trip to the capital of the south.

## NO CHANGE IN JACKSON STREET

### Council Committee of the Whole Turns Down Request of Good Shepherd Convent.

At the meeting of the city council in committee of the whole Monday afternoon the principal business was consideration of the closing of Jackson street between Fifth and Forty-first and Dixie streets for himself and others to protest against the closing of this street and the opening of another ninety-three feet north. The change is desired by the sisters of the Convent of the Good Shepherd and F. L. McCoy, who was formerly a Protestant, spoken in favor of the change. T. J. Mahoney also spoke in favor of the change and said that the plan contemplates the consolidation of ground owned by the convent and the uniting of their property. The council voted against making the change.

A delegation of bakers appeared to protest against bakeries which are being operated in cellars and basements. Members of the delegation were told to have an ordinance prepared covering their ideas and submit it to the council.

Lysie Abbott appeared to discuss the sign ordinance. He said the ordinance affects between 200 and 300 business men, and offered a slight change. T. J. Mahoney asked that the ordinance be submitted to a referendum vote of the people. He said that no proclamation of such referendum would be necessary and no formal notice of its submission would be necessary, but the clerk must have copies of the ordinance printed for use of voters. The action was taken.

A representative of T. J. Hanson appeared to press a resolution granting him right to use part of the alley between Harney and Farnam to carry out his design for a building where the Shubert building now stands. The design was exhibited and on motion of Councilman Davis, supported by Councilman Zimmerman, Mr. Hanson was permitted

## NEW ERA IN BANKING BEGINS

### Clearing House Succeeds in Eliminating Chains of Control.

## SITUATION WAS VERY ACUTE

### Bankers Pledge Support and Crisis is Declared to Be Over—Fund of Ten Millions Available in Need.

NEW YORK, Oct. 21.—There is a more favorable sentiment in business and banking circles, resultant from yesterday's changes in various managements and the promises of support made by the clearing house association in the one previously passed. The matter was referred to the judiciary committee and legal department.

## DEBATERS MAKING BIG PLANS

### Fifty High School Boys Meet and Discuss Meets Between Three Cities.

About fifty high school boys who are interested in debating met after school Monday and made plans for this year's society and the interscholastic contests. A class in debating will be organized soon, under the leadership of E. F. Denison, the Young Men's Christian association boys' work director, who coached one of the debating teams last year. This class will meet several times a week from 8 till 9 o'clock in the morning, and many debating enthusiasts intend to join regarding the early hour.

Principal Waterhouse, who presided at the meeting, said there would probably be a tri-city debating league, comprising the high schools of Omaha, Des Moines and Kansas City, and also debates between the several societies of the Omaha High school and those of Council Bluffs and South Omaha.

The interest in debating which the meeting aroused is already quite evident, and foretells great things for the youths who will defend Omaha's reputation in the forensic arena.

## WAR ON BAKERIES IN CELLARS

### Movement Inspired by Other Bakers in Carried to the City Council.

A number of the bakers of the city have declared war upon the bakeries which are being operated in basements and cellars. They allege that the rooms are in unsanitary condition and the bread made therein is necessarily unwholesome. A committee expects to appear before the council this afternoon and has requested the Board of Health to co-operate with it.

Dr. Connell declares it will be impossible for him to make more thorough inspection of bakeries until next year, when he hopes to have at least six sanitary inspectors, where he now has one, and that with that force at his command he can inspect all places of food supply in the city.

## MAKOWKA'S TRIAL BEGINS

### WEBSTER CITY, Ia., Oct. 21.—(Special.)—The trial of George Mackowka on the charge of burning Webster City's \$100,000 felt shoe factory in 1902 was begun in Judge Lee's court this afternoon. Court was convened at 1:30 o'clock, and the opening of a jury was undertaken at once. It is expected that all of today and tomorrow will be consumed in picking the jury. It is possible that even more time may be taken.

While the trial began this afternoon in upon the arson charge only, it in fact, embodies the embezzlement case also, for the state has given notice to the defense that it will introduce evidence of embezzlement in order to furnish the motive for the alleged crime of arson. It is understood the defense will set up an alibi. That Mackowka himself will go upon the stand is certain and that at least two witnesses will complete his proof of absence from the factory until after the fire alarm was given is known. By proving the embezzlement, however, and introducing other circumstantial evidence, the state will seek to show either an accomplice or the use of some kind of slow fire, with which the conflagration was started.

## FILES CURED IN 3 TO 14 DAYS

### PAIN Ointment is guaranteed to cure any case of itching, blind, bleeding or protruding piles in 3 to 14 days or money refunded.

## REGISTER IF YOU WILL VOTE

### No Taxpayer Can Act on Bonds Without Registration.

## SATURDAY IS THE LAST DAY

### Propositions Aggregating Four Million Dollars Will Be Submitted to the Electors of Omaha This Fall.

"The failure of any taxpayer in Omaha to register next Saturday may cause him regret for many a day," said a city official. "At the coming election it is proposed to authorize the city council to issue bonds to the amount of \$3,678,000 for various purposes and the school board is asking permission to issue \$600,000 worth of bonds in addition to this, making a total bond issue to be requested of over \$4,278,000—the largest ever asked in the history of Omaha. If these bonds are authorized and issued there will be an increase in the annual interest charge of at least \$37,100, since it will be impossible to sell these bonds for less than 4 per cent and half of this amount additional must be raised each year if the bonds are to be redeemed at the end of twenty years."

"People will have different opinions as to the advisability of these bonds, but every taxpayer should be interested enough in the subject to record his vote one way or the other and no man who fails to register Saturday can have a word to say at the polls as to the taxing of his property for these purposes. It would seem that this cause alone should result in a full registration. Local taxation appeals close to the people than any other expense and it is in the hands of the voters to limit or expand that tax."

In connection with this remark it may be noted that few people are talking in favor of the proposed gas bonds proposition. Even the author of the ordinance calling for the election, says the measure is one in which he is not deeply interested except to place the matter before the people in harmony with the resolution of the council last June.

The proposals for the school building bonds and the city improvement bonds are meeting with no open opposition as far as talk goes, while there is little or nothing said in regard to the proposition to issue \$600,000 of bonds for a new fire engine house. It is generally admitted that if these bonds are issued the house cannot be occupied for another year, but the friends of the measure say the bonds will draw no interest until they are sold and they need not be sold until the money is needed for the house.

Two republican meetings are scheduled for this week. The first will be held in the Fifth ward, at Sixteenth and Locust streets, Thursday night, and the second in the Sixth ward at Twenty-fourth and Burdette streets, Friday night. Candidates and good speakers will be present at both of the meetings.

Mayor Hector of South Omaha, in a convivial mood the other night, told a party of admiring listeners that he would be the first elected mayor of the Greater Omaha after consolidation.

## TAPPING NEW COAL FIELDS

### Union Pacific Building Spurs to Reach Independent Properties.

CHEYENNE, Wyo., Oct. 21.—(Special.)—An order received from headquarters of the Union Pacific Railroad company yesterday calls for the immediate construction of a new Wyoming lateral twenty-one miles in length and with four sub-laterals with an aggregate length of six miles. The new line will leave the main line at Rock Springs and run almost due north, passing through the Big Horn canon and tapping one of the richest coal fields in the world. The Union Pacific does not intend, it is understood, to develop any of its holdings adjacent to the new line, but will build the line in order to obtain the haul from independent properties, of which there will be a number opened up as soon as the railroad construction begins.

That the Union Pacific is building this line to tap independent holdings is evidence that the company was in earnest when it announced that it would retire from the commercial coal business January 1, 1908. The independent properties to be opened by the Big Horn canon branch would, if the Union Pacific continued to sell coal after January 1, directly compete with the product of the railroad's Rock Springs collieries.

The Union Pacific has also ordered the construction of a branch to the new mine of the Rock Springs-Gibraltar company, an independent concern operating at Black Butte, a few miles east of Rock Springs. Five other independent companies are opening mines in the same district.

Give the children all they want. Red Cross Cough Drops. 5c per box.

## RUNAWAY GIRL TAKEN HOME

### Left Her Parents in Des Moines and Was Working in an Omaha Factory.

Josephine Zeigler, a 22-year-old girl who ran away from her home in Des Moines, Ia., September 15 and was accidentally discovered in Omaha during Ak-Sar-Ben week, was taken home by her parents Sunday morning.

The girl had been working in an overall factory in this city all the while her parents were searching for her, thinking perhaps she had committed suicide. A friend of the family in Des Moines visited Omaha during the carnival and accidentally met the girl on the street and she told him that the family had moved to this city. On his return to Des Moines he met the father of the girl and told him of her whereabouts. The family communicated with the local authorities and the girl was found and held until her arrival. She had been rooming at 824 North Twentieth street.

## BURGLARS DO FAIRLY WELL

While the family were attending church Sunday night the residence of G. A. Greenough at 75 Pine street was entered by burglars who secured about \$500 worth of valuables, including \$41 in money and a collection of sovereigns from several countries and a few articles of jewelry.

The burglars gained an entrance by prying open a bedroom window with a sledge and exhibited their experience by selecting only the solid silver spoons and leaving the plated silverware untouched.

Greenough conducts a drug store at 124 South Tenth street and furnished the police with a good description of the articles taken.

## RAILING A BAR ON SPECULATION

### CHEYENNE, Wyo., Oct. 21.—(Special.)—The new ruling of the general land office that homesteaders who intend to commute must actually reside on their claims full fourteen months, instead of merely maintaining a "constructive residence" there during the first six months after filing, probably will result in many homesteads of the Cheyenne district reverting to the

### SOLE BY ALL LEADING DRUGGISTS, one size only, regular price 50¢ per bottle.

manufactured gas was to be pumped later in the day. The work of inflation required great care, and it was two hours after the gas was first turned on that the once flat balloons of cloth, crowded themselves out into great yellow and drab globes, these two colors being the favorites of the foreign balloon makers. As gradually the balloons took shape, the stout webbing of cord about them was carefully adjusted and inspected. Baskets were not tied in place, until the last foot of gas was forced into the big balloons and the necks tightly sealed. Dangling from the neck in each was a white cord with a small bag of the same color attached. This cord controls the gas valve at the top and is pulled whenever the aeronaut decides to descend.

A second cord, of red, is known as the rip cord, and when pulled rips out a seam, so that in landing the balloonist may deflate the balloon in an instant.

## EQUIPMENT VARIED

The baskets belonging to the several balloons were objects of intense interest among the spectators. The equipment of each varied, but in general the aeronauts will carry with them an aneroid barometer to register elevation, a barograph, or self-registering aneroid barometer, a statoscope, which registers the rise and fall of a balloon; compass, dry and wet thermometer, set of maps, small electric flash lights for reading instruments at night and life belts, to be used in case of falling into water. Each aerial passenger, be he aid or pilot, will wear very heavy clothing, as the air is expected to be extremely cold. For food, practically all the teams will carry a supply of sandwiches, which will be eaten the first day out, and second, if the flight should continue that long. Canned meats and several loaves of bread are to be taken along for a third day's provision and to be used in case the landing place should be remote from village or farm house. Le Blanc, the Frenchman, and "Kiki," his aid, are taking up fishing tackle and a revolver, and declare that if they descend in an attractive spot they will spend two or three days fishing and hunting. Sleep will be next to impossible for the air travelers, most of the basket beings too small to permit of repose, and the honor at stake being such as to require the vigilance of both members of a team.

## START LATE IN DAY

The start of the race was placed as late in the day as possible, in order to meet the wishes of the aeronauts. It was desired by all that the most of their flight should take place at night. The sun expands ballooning gas to a remarkable extent, and when the contraction comes at night it means a drop to a lower level and the loss of several bags of ballast. By starting with the setting sun the first loss of gas is reached after nearly twenty-four hours in the air and this period the pilots expect to cover the greatest part of their journey.

The start of the international cup contest today marks the beginning of an aerial carnival which will continue until Friday. All sorts of aerial planes, and dirigible balloons are here to compete for valuable prizes offered for the various classes.

## JEWEL THEATER MONDAY TO THURSDAY

### MINES AND FORGE AT DECAZEVILLE.

The remarkable process of producing iron from the time it is dug out of the earth as ore until it is sent out of the foundries is shown in this film. The process is a very interesting one and is easy for anybody to follow. The following pictures will also be shown: "Elks' Parade at Philadelphia, One-Night Stand, Son's Revenge, The Faster Cably."

## MISS ABBOTT'S TOUR

I just received a telegram from S. H. A. Kansas, saying the "Bessie Abbott" program was the most beautiful ever seen on the concert stage.—Mrs. Turner. Seats go on sale at Auditorium Tuesday morning.

## GAS BAGS IN RACE

### (Continued from First Page.)

that the balloon in which Lieutenant Lalm set the record for the race at 402 miles last year, which started today and carries as pilot Major Henry B. Hersey of the United States weather bureau, who acted as aid to the lieutenant. The latter, who is ill in Paris, is unable to take part. German balloons that were in the first competition, the Dusseldorf and the Pommern, are also among today's starters.

The official order of start is as follows: 4 p. m.—German balloon, Pommern, 7,000 cubic feet capacity; Oscar Erisloch, pilot; Prof. Clayton, aid. 4:30—American balloon, United States, 7,250 cubic feet; Major H. B. Hersey, pilot; A. T. Atherholt, aid. 4:45—French balloon, L'Esperance, 7,000 cubic feet; Alfred Le Blanc, pilot; Edgar W. Mils, aid. 4:55—German balloon, Dusseldorf, 7,000 cubic feet; Captain Hugo von Abercron, pilot; H. Heldmann, aid. 5:15—English balloon, L'Esperance II, 7,250 cubic feet; Griffith Brew, pilot; Lieutenant Claude Brabazon, aid. 5:30—American balloon, America, 7,000 cubic feet; J. C. McCoy, pilot; Captain C. DeChandler, aid. 5:45—French balloon, Anjou, 7,800 cubic feet; Rene Gannier, pilot; Charles Love, aid. 5:55—German balloon, Abercron, 5,000 cubic feet; Paul Meckel, pilot; Rudolph Denigs, aid. 6:15—American balloon, St. Louis, 7,500 cubic feet; Allen R. Hawley, pilot; Augustus Post, aid.

## EQUAL CHANCES OF VICTORY

All of the teams entered are regarded as having an almost equal chance for victory. If these are any favorites in the discussion, today they are the French team of Le Blanc and Mils, and the American team, headed by Major Hersey and Mr. Hawley. While Major Hersey will sail the cup winner of last year, Mr. Hawley will command a new balloon which has made but one ascension, in Paris, and which was built especially for this race.

The preparations for the big race were watched with intense interest, but those fortunate enough to reach the fenced enclosure, which was guarded today by several hundreds of soldiers of the regular army.

Nine balloons were delivered to the grounds yesterday, and today were limp heaps of varnished cotton at intervals along the pipe through which specially
