senate republicans and is too proud to the country until after Christmas, giving causet flourish in this country.

THE PRESIDENT'S MESSAGE.

President Roosevelt's message to the Sixtieth congress is distinctively an American document. Presidents of the United States have been wont, in the past, to dwell upon our foreign relations at great length and in more or less tiresome detail usually making this the topic for first discussion in their messages. President Roosevelt departs from precedent by minimizing this feature, almost to the point of elimination. He confines his discussion of foreign relations to a reference to The Hague peace conference, a short review of the German trade agreement and a brief mention of our relations with China and the Latin-American republics. The rest of the message, an that concern the American people directly and which are demanding con-

tions doing an interstate commerce business will find nothing but disap- homeopathic doses. pointment in the document offered to congress and the nation yesterday. In the long list of matters which have made no departure from his original program and his message is devoted 24..... 36,100 largely to urgent recommendation for policies. He repeats his recommenda-28..... 36,940 tions made in 1905 and in 1906 for rates and taking other action calcucriminations.

BOUND ABOUT NEW YORK.

Ripples on the Current of Life in the

Metropolts. The roany sources of legalized loot in New York City receiverships of insolvent financial concerns afford opportunities rivaling insurance companies be fore the era of districction and reform Depositors of a concern wrecked four years ago, who have received about 25 per cent of their deposits, are trying to figure out why it takes about 75 cents to collect and disburse each dollar plucked from the ruin. But they did not have the receiver's report at the time. They have the spotlight now and figuring lacks the stimulus of a problem. The 25 per cent paid to depositors amounted to \$675,000, and to collect and disburse this sum the receiver has paid, or agreed to pay \$500,000. Legal expenses have been the heaviest charges. One lawyer has received up to date \$135,000, which is at the rate of \$54,000 per annum, s pretty liberal compensation, apparently. Claims of another lawyer for legal services now pending aggregate \$60,000; the receiver has received \$36,000, and is entitled to \$13,-000 more for his labors for the current year. To one referee more than \$39,000 has been paid, and another has a bill which by the time the receivership is expected to terminate will aggregate \$40,000.

The special commission appointed by Mayor McClellan has presented a novel plan to relieve the present financial embarrassment of the New York City government. The plan in brief provides that the city issue a new form of certificates of indebtedness to the amount of everdue and incollected taxes, such certificates to bear interest at the rate of 7 per cent, the interest to be paid by the property owners who owe the uncollected taxes. There is now due the city in uncollected taxes on real estate and personal property fully \$60,000,000, a considerable portion of which in overdue more than one year, and bears interest to the city at the rate of 7 per cent. The tax collections for this year are only \$59,000,000 to date on a tax levy of nearly \$100,000,000.

The New York walters have organized club and rented and equipped a club house where they may take their case, as gendonkey as an exemplar of the qualities of themen of wealth and leisure are entitled the democratic party. He says the beast to do. This club employs servants and serves meals and refreshments; its members understand in every detail what an up-to-date club should be like. But in framing the bylaws a momentous question arose, which was settled only after a strenuous clash of opposing views. Should the club members give tips to the waiters in their employ? Should those whose prosperity rested on a tip foundation uphold the tipping principle under circumstances in which they must act as tippers and not as the tipped? But the real purpose of the club is said to be to develop tipping along more artistic lines, or, to speak with more exactness, to develop the art of extracting tips with nonchalance and dignity. A mamber of the waiters' club is quoted as ex-Federal officeholders who strive to help plaining: The trouble is that many of our members don't seem to realize that crude methods will be tolerated no longer. The courtesy," according to the Roosevelt let. up-to-date scheme is to get the money Still, they will try to worry along and at the same time make the customer think you are doing him a favor in taking it." The club, therefore, has its professional, as well as its social, aspect. Its foundation purpose is the promoting, sustaining and expanding of the tip as one of our free institutions.
