The main cause is the extraordinary increase of population. During the last thirty-six years the population has been more than doubled. At the close of 1870 it was 226,000; at the close of 1906 more than 631,000. The greater part of this increase, nearly 80 per cent of it, is due to immigration from all parts of Italy Only one-half of the actual population was born in the city. Mr. Mover believes that if we had a government savings bank operated by the Postoffice department, not only would the immigrants keep their funds in it while accumulating the amounts they wish to remit, but, moreover, large parts of the money would be left there permanently instead of being placed on deposit abroad, Immigrants send some money abroad postal remittances probably fall short of immigrants' remittances, and nevertheless they approximate in vale the entire amount of gold that has been imported from abroad for the aid of our banks in the last month.
