The Richest, Most Beautiful of all Xmas Gifts

Greatest Sale of Oriental Rugs

In the Entire History of the West

Our New York buyer bought from a prominent importer of Oriental rugs his entire stock, including some of the most beautiful designs ever brought to America. By paying cash our buyer got these rugs at far less than it cost the dealer to import them.

We also offer our own entire stock of Fine Oriental Rugs at tremendous reductions.

These rugs come in all sizes from the extra large room size to the smallest prayer rugs. They are all genuine Orientals and are in the richest color combinations.

The Bargains are Wonderful

The large Rugs are Kurdestans, Kermenshah, Feraghan, Mossoul, Sarabend and Kevas.

The smaller Rugs are the Tabriz, Sarabend, Kazak, Yuruk, Afghan, Sheraz, Shervan, Dagahstan, Karabaugh and Mossoul hall runners.

Never was such a sale of Orientals held in the West.

To give an idea of the high quality of the bargains we offer, we mention—

One Big Lot of various kinds and sizes of Oriental Rugs, actually worth up to \$35, at **\$12.98**

Others at \$15.98-\$17.50-\$20-\$39-\$69 and up to \$298.00

If an advertisement convinces you, stay convinced.

When you read in The Bee an advertisement of a manufacturer who has paid for the space used, to convince you that it is to your interest to buy his goods, and you go to a dealer where such articles are usually handled for sale, do not let the dealer or one of his clerks sell you something else which he claims is "just as good." If an advertisement convinces you, it was because of the truth which it contained.

OPEN EVERY EVENING 'TILL CHRISTMAS

Winter is now setting in. The extreme cold weather is all before us, and there will be three long months of it. You will not suffer with the cold if you keep your house warm day and night, up and down stairs. That is what this wonderful Baseburner does.

The Home Ventilator

The largest Baseburner in the world. Weighs 800 pounds and has the heating power of a furnace. Uses half the fuel that a furnace does. It is made in six parts so one man can set it up or take it down or move it. It takes the foul air from the room and brings in fresh air heated. It burns the coarsest hard coal—the slowest burning hard coal that can be burned in a Baseburner. It is constructed on scientific principles and is different from any other Baseburner. It stands distinctly by itself. It is the only Baseburner in the world that has a double base for circulating pipes—a double heater and ventilator in one stove. Small payments or a cut price for cash.
