Electrical Fire Fighters. MERICAN CONSUL S. P. WAR-

particulars:

"One of the tenders is used exclusively for trials and for training the members of of water, which, by means of a compressed tion; for the most radical advocates of the mark. chines. The principal advantage claimed for the machines is that they are siways gine. It requires about nine minutes for warrant the change in its entirety. ready to start for a fire the instant an alarm is sounded. They also do away with of steam. the necessity of keeping a number of hornes, and thus materially reduce the contingent expanses of the fire department.

"The electrical power for running the machines is stored in accumulators. Owing to the quantity of lead employed in the construction of these accumulators, the machines are all very heavy, their weight varying from five to six tons. All of the machines are driven from the front axles, so that it is possible to turn them even in the narrowest streets. Each machine is soutpped with two motors, which can debrakes. run a distance of 15.5 miles on one charge at a rate of speed of 15.5 miles an hour, dition, the machines can cover a distance of about twenty-four miles on one obarge

"The crews for the various machines are nothing to the average person, and yet it results, as a smaller number of wings instead of being stretched between two tall follows: Magine, two machinists, two represents an investment so stupendous does not fully utilize the wind power, poles, was fastened to two rocks in house, could see no justice in it. Originator of Law Giving Prisoners Right to Testify

December 3, at the age of 95. was most widely known was the authorship of the law giv-10 mar ing to the accused in criminal cases the right to testify in his own behalf. This law he drafted half a century ago, and after many rebuffs he succeeded in having it enacted by the Maine legislature in 1864. It was the first law of the kind anywhere, and soon the whole civilized world followed Maine's example in adopting it.

When Mr. Paine was a boy living on a of the Echo de Paris, the Swiss military farm in the town of Winslow, Kennebec county, a playmate was convicted on purely ments with Marconi wireless telegraphy circumstantial evidence of stealing from a instruments, which once more demonstrated farmer a wallet containing a large sum police entered his place he was sitting in that such dispatches cannot be kept secret, of money, and was sentenced to the state as a receiver registers messages sent by prison for three years. When the boy came other instruments with which it has no back from prison he was broken in health

made to establish communication between a A few weeks after his return the wallet. fixed Marconi instrument on the Righi with its contents intact, was accidentally and a movable one placed in a small valley discovered near a rall fence where some wind motors as power generators for use of the Canton de Vallais, almost completely boards had concealed if from sight. The in agricultural and industrial pursuits surrounded by high mountains and situated farmer remembered having climbed over are rarely met with, but that in Denmark at the foot of the Dent de Morcles. Al- the fence on the day that the wallet distion and argument than by definite results their use has increased very greatly. The though no messages reached this station appeared, and the boy's name was cleared.

Several times the bill was

Paine of Bangor, Me., who died what use to let him legally deny? In 1864, however, when Samuel Cony was Paine's long fight was won.

In 1996 the body of a man who had been as he turned to dodge the blow, involunfound on the Central street bridge in the knife as he did so, the weapon struck Bangor. The police had little to work on his assailant full in the breast, causing until it was remembered that the man him to fall over backward. frequently had words with a mulatto barber who had a shop near the point

where the body was discovered. the barber shop and found the barber with a bloodstained knife in his possession and an attitude of deep dejection.

"Do you know who murdered So and So?" inquired one of the officers, suddenly. "Is he dead?" asked the barber.

"Yes," replied the policeman. "Then I suppose I killed him." remarked ing particularly on the fact that if the the mulatte.

The man was, of course, put under arrest and in course of time came up for trial. It was apparently a clear case of murder without provocation. The barber had a good lawyer, but he was absolutely

without evidence in his client's favor, except that it could be shown there was ill feeling between the two men and that the victim often annoyed the mulatto. When the prosecution had concluded its case, which included the confession made

by the prisoner to the officers, his attorney announced that he would only show culed out of committee. James G. Blaine, who was speaker of the house, could see no justice in it. Others and that of course the accused would deny the accused had taken advantage of the the accused had taken advantage of the Chicago Tribune

HE thing for which Albert Ware his guilt under any circumstances. Of new law, and interest in the matter was intense.

The defendant testified that they met on the bridge and that the dead man governor, the bill went through and Mr. struck at him. The barber had at the time in his hand a large jackknife, and

killed by a stab wound in the heart was tarily throwing up his hand which held The mulatto did not wait for any fur-

ther fighting, but went immediately to his shop. He knew from the blood on his A party of officers went immediately to knife and hand that he had wounded the other, but he never imagined that the result was as serious as it turned out spots of blood on his hands. When the and he sat in trepidution until the arrival of the police.

The jury believed the defendant and a verdict of not guilty was brought in within five minutes. At that time Mr. Paine was the Maine correspondent of a Boston paper and he wrote an account of the circumstances of the case, dwell-
