STATE AID FOR PUBLIC SCHOOLS

Bill Introduced in Nebraska Legislature in 1993 to Guarantee Bank Deposits, but Killed Because Bankers Disapprove of It.

(From a Staff Correspondent.) LINCOLN, Jan. 18 .- (Special.) - The Railway commission today issued an emergency order to prevent the Burlington Railroad obmpany from closing its station at Dickens, Lincoln county, except upon good cause shown to the commission. Ther is mission to fisue the order, which is as fol- one of our offices in the first place.

li having been this day brought to the attention of this commission by a protest duly filed in this office that the above railroad company, a carrier engaged in transporting freight and passengers between stations in Nebraska, proposes to and is about to close its station at Dickens, Neb., and to dispense with the services of its station agent at that point; and it further appearing from the records in this office that the gross charges collected by said company on freight originating and destinating at said station for the months of July. August, September and October, 1907, amounted to about \$5,652.80; and it further appearing that the people residing in the adjoining country will consequently be without the services of a station agent along the line of said railroad between the towns of Wellfleet and Walface, a distance of about 25.6 miles, to their resulting damage and great inconvenience, the commission finds that an emergency exists and that the said company should be enjoined from carrying out its intentions in the premises except upon good cause shown and presented to this commission.

from carrying out its intentions in the premises except upon good cause shown and presented to this commission.

It is therefore ordered that the Chicago. Burlington & Quincy Railmad company be notified and directed, and the same is hereby ordered and directed to maintain an open station at Dickens. The health of the cats is cared for by the yeterinary surgeon of the royal stables and a room is set apart as a hospital for the sick ones. Queen Alexandra is surpassed as a cat fancier by Lady Beresford, whose collection is said to comprise 150 specimens of all breeds, including the tailless Manx cats. Lady Beresford is the founder of the Cat Club, which since 1890 has held annual exhibitions in London. The greater number of her cats inhabit a cottage speclally built for them at her country place. The cottage can be converted into an open pavillon in hot weather; in winter it is warmed by an elaborate heating appa ratus. One room is used as a kitchen where a woman spends her days cooking for the cats, while a scullery maid is amployed to wash their pretty porcelain

plates and saucers Several servants are necessary to keep he place neat and the beds and lounging cushions in order. There is a little dairy near by which provides milk for the cats. The collection is said to be of great value. He no necessity of carryoing gasoline at

NEBRASKA CITY—Henry Grovenberg is missing, in fact he has not been seen for several days. Henry has had all kinds of had luck. He came to this city several years ago with his wife and children, locating on a farm one mile west of town, and while eating her breakfast his wife fell from the chair dead, leart fallure being the cause given. A short time after the house burned to the ground and the family saved nothing except the clothes they were wearing, and a purse was raised to purchase them such clothing as they needed. He moved into another house and that was destroyed by fire. He married lirs. Huff and a few days ago he disappeared leaving her penniless and neglecting to leave his next postoffice address. In all probability a warrant will be issued charging him with wife desertion.

Alcohol Made on a Five-**ENGLAND'S QUEEN LOVES CATS** Ton Wagon.

An interesting test toward showing how easily denatured alcohol may be utilized for fuel in a motor truck was made in New York City in front of the Hewitt Mo tor company's offices. The truck was th regular standard five-ton Hewitt truck, a four-cyfilnder machine of thirty-horse power. It was loaded with cement bags, weighing close to five tons. The truck ran up and down the block and up Madison avenue hill-the oldtime Murray hill-on the Sandy because it was born at Sandring | high speed, and late in the day the cement was delivered at Eighty-fourth street, near

Madison avenue. All the work was done with alcohol as fuel, and the interesting feature of the test was that despite the fact that the truck was stopped for an bour or so at a time. the engine could always be started directly on alcohol. The engineers pointed out that when the engine is first started for a day's work it is necessary to start it on gasoline. So little is needed that it is not required to carry along even a small tank of gasoline. as a small priming gun will hold sufficient to get the carbureter working properly and sufficiently heated so that the alcohol may be immediately turned on. As long as the engine remains partially warm, even after standing nearly two hours, no further use of gasoline will be needed. A few mechanical adjustments have been made, the inlet gas being heated and the compression being raised to 112 pounds, so as to secure the full efficiency of the motor. A standard Shiebler carbureter is used

"Several commercial concerns have been anxious to use alcohol as a motive power for their power trucks," said E. R. Hewitt, "for under the present dock stipulations gasoline propelled commercial cars are allowed on but very few, of the docks. With the use of alcohol we believe there will be no difficulty in obtaining the necessary permission, and as the trucks can be unloaded bas he the engine coels there will all, once the engine has been started for its day's work."-New York Times.
