OMAHA. Jan. 20.

The grain market was slow and very little variation was evident. Prices at the opening were lower on expected weak ables and heavy estimated arrivals. Selling was general at the start, but shorts took the advantage to buy in on the arrors breaks.

Wheat opened weak on expected larger receipts and weak cables. May wheat opened at 20 and closed at 20 a. Corn opened weak on the estimated heavy arrival at all points. With the weather continuing indict the receipts were a surprise and corn values soon advanced to above Saturday's close with cash interest buying heavily. May corn opened at 25 and closed at 15 c. Cats opened steady, but advanced little as commission houses put out a heavy line of long oats. They were well taken. OMAHA, Jan. 20.

A Pengil Anniversary.

One of man's best friends, says Prometheus, will have a floth birthday same time in 1908. The day cannot be fixed when the lead pencil was first used, but all signs, all records, show that it was just about 20 years ago that the useful article was finvented. The "praeductal" of ancient Rome, which was a leaden disk used to draw lines, was undoubtedly its progenitor. In the fourteenth century lead and eliver points were used in Italy, but employed exclusively by artists. For the sake of cisantiness these were encared in wood and became the first lead pencils, but the pencil similar to those of the present day came after discovery of graphits, in 1666. The first German pencils were made in Nurnberg, where there are now thirty pencil factories, which turn out about \$00,000,000 pencils every year.
