## Howell Drug Co. Open for Business

In Their New Store, 207-209 North 16th St., Hotel Loyal Bldg.

The newest and latest addition to Omaha's Drug stores is the Howell Drug Co., located at 207-209 North Sixteenth street, in the new Hotel Loyal building. No expense has been spared to make this new store not only the largest in point of size in the city, and the brightest in interior finish, but to also make it thoroughly complete with the different lines of goods carried in drugs and sundries, representing everything that an up-to-date drug store should carry. Occupying two full store rooms, with fixtures finished in cherry, the appearance is one to delight the eye, the moment one enters the door, for there is no indication of the store or its stock being crowded and cramped into space too small for it. More than usual care has been used in the selection of the stock, which, while of the highest quality in every respect, is offered at prices much below the regular price for the same articles. This is due to the fortunate purchase of the stock during the panic market of November and December, and the prices then saved are now being spread over the entire stock as a means of introducing the new store and the up-to-date stock to the public. A complete line of drugs and proprietary articles are carried, a full line of rubber goods, toilet articles and soaps and perfumes, and one of the finest lines of cigars and smokers' articles in the city. The prescription department has also received much attention and is in charge of skilled pharmacists, guaranteeing the purity and accuracy in the compounding of all prescription orders. In connection with this department a special delivery system has been installed, which will call for all orders for prescriptions and drugs and deliver same free to any part of the city. The merchants of the city and the public at large should be congratulated upon the new addition to the number of up-to-date stores in the city.

## To Persons Driving Vehicles

At this season of the year street car tracks are apt to be very slippery owing to atmospheric conditions, and it is impossible, therefore, to stop a car as promptly as ordinarily.

**REMEMBER** that a street car is confined to the track and that the Motorman cannot turn out or stop his car instantly when "cut off" by a vehicle.

Do not rely upon the motorman to save you from the consequences of your own carelessness—he may not be able to do so.

## The printer can save money

Experience has shown that electric motors are the best means of driving printing machinery. The output can be increased very materially, due to the wide and yet far graduated range of the speed control which can be obtained by the use of the motor instead of the stepped cone pulleys.
