MORE OF STANDARD METHODS

Government Resumes Taking Testimony in Ouster Suit.

OIL COMBINE HARRASSES RIVAL
Railroad Employees Stricken to Tell of Business of Other Companies—Many Dummy Competitors Picked in Field.

CLEVELAND, O., March 12.—The absorption of rivals, dismantling of competing plants, the gathering of information regarding the customers of numerous of the methods in which some information was obtained from railways by the Standard Oil company were the features of the hearing before Special Examiner Ferris here yesterday in the government ouster suit against the Standard Oil company.

Richard T. Cooke, of Indiana, Inc., secretary and treasurer of the National Refining company, testifying for the government, said he was an agent for the Standard Oil company at Columbus, Ind., in 1904-1905, and later spent several years with the company in an executive position in Indianapolis and Cincinnati. He stated that while at Columbus information was given him by a man named Taylor, employed by the Pennsylvania railroad, regarding shipments of oil received by rivals. He said he was informed of all oil handled in his territory and used the information for the purpose of tracing the customers of competitors and attempting to "pull them up" for the Standard Oil company. Cooke also said he never offered to cut prices for their trade, but used regular methods, such as saying his oil was better and could be obtained easier.

Credit for Reporting Sales.
Cooke testified that he received as much credit for reporting the sales of rivals as if he had made the sale for the Standard Oil company. While in Indianapolis, he said, reports were handed him by a boy regarding the shipments of rivals in and out of Indianapolis. These reports were somewhat of a mystery to him, but he was of the opinion they came from the office of the state oil inspector. Cooke also said that for 55 a month the Standard Oil company received a report daily from a freight handler in Logansport, Ind., as to the oil received by one Froyer, an independent dealer in Logansport. The witness related the story of several competitors who were eventually absorbed by the Standard Oil company. He said the Capital Oil company of Indianapolis, a Standard agency, was bought by one Kelley for the Standard with cash furnished by the Standard, and in this way became a part of business of the Kellys, who were supposed to be operating an independent tank wagon business. The Capital company had made inroads upon Kelley's business and he finally entered into a contract with the Standard Oil company.

Repeals Independent Companies.
Cooke told of the starting of "bogus" independent companies for the purpose of selling oil to those who were prejudiced against the Standard Oil company and the starting of several bonafide independent companies, which later were purchased by the Standard and the plants closed. In one instance a concern at Vincennes, Ind., was purchased by one "Niets," which was "Stein" spelled backward, and that Stein was the assistant treasurer of the Standard Oil company of Kentucky.

The testimony of John J. Shea of Terre Haute, Ind., an independent dealer, was concluded. Shea said his profits a dozen years were usually between 80 and 100 per cent and that he made a good living, although he had been opposed by the Standard Oil company, but not effectually. He still is in business.

NEBRASKA FROM DAY TO DAY
Qual and Curious Features of Life in a Rapidly Growing State.

Fishing Time—Some marvelous fish stories are reaching the Courier from the spot where the receding waters of the Smith spill on the Gering canal is leaving the fishy tribe at the mercy of the pitchfork fisherman. The reports so far run all the way up to catfish weighing six or seven pounds each.—Hearing Courier.

Swelled Head—William Hay was in town Monday considerably swelled up about the head. Mr. Hay's house is a rendezvous for bees and seventeen swarms have located in various parts of the house between the sidewalk and plastering. Their means of ingress is through knot holes and Mr. Hay said they were troublesome at times, so he has been removing a few swarms. They peppered him good in the face and on the arms, but he is getting lots of honey along with the stings.—Weeping Water Republican.

Hard Knocks at Shelby—Fate seems to be against the skating rink which started up a week ago in the Shelby opera house. Monday night Miss Nina Dotson, the postmistress, fell and broke her right arm just above the wrist, and a few minutes later Shell Larimer broke his right arm in the same place. Then a young man exerted himself so hard that he fainted, and three local physicians were busy over rink victims. Last night Lev Miller, a carpenter with a family, took a fall and broke his arm in the same place while enjoying the roller skates. There are plenty more ready to take their chances.

Joe Is on Cox—J. N. Cox's friends are having a little fun with him at his expense all over a little duck hunt which Mr. Cox thought would not get out. Arriving at the place of slaughter before daylight J. N. comfortably settled himself down in a blind to await the flight of ducks. As daylight began to look up through the cornfields and the water in the small pond which J. N. was watching could be seen, J. N., with a smile on his face, discovered objects in the water, and cautiously raised up and took deliberate aim square at them and blazed away. He ran over to the pond to pick up his ducks and to his surprise found that he had been shooting at Mr. Gray's decoy ducks.—Fillmore County News.

Charley's Gaze—"Oil Well Charley" shook the Taylor dust from his curly locks last Monday and hid himself in his fertile oil fields. From whistling pipes we have heard on the street corners the last three or four weeks we sized it up that it would not be long before the haunts which knew him would know him no more. His principal occupation since he came to this burg seems to have been enticing boys into his den, on the rear side of the square, and skin them out of their money. As long as reports were that his victims were old ducks we did not make it our business, but when he and his gang coaxed a hard working farmer boy, who probably has never been beyond the limits of Loup county and knows nothing of the tricks and snares of the sharks, into their den and filled him up with beer, and no telling what other stuff, until he was no compos mentis and then deliberately rob him, for that is the true meaning of \$50 or more, it is time a halt was called, and we were of the opinion that outfit will hear or feel something drop one of these fine days. As to the departure of "Boaring" for Oil Charley leaving town we have heard no regrets.—Taylor Courier.

Stop the heating slavery!

Many a couple have had their home happiness wrecked by being yoked in slavery to a coal bucket—she in slavery to the uncleanness and care of old-fashioned heating methods, and he in slavery to its ever-increasing bills. Often it is just this extra, needless expense and work that keeps them from getting on—getting a right start in domestic life.

AMERICAN & IDEAL
RADIATORS & BOILERS

for Hot Water or Low-Pressure Steam free you of this slavery. The outfit saves so much in coal and cleaning, in time and temper, that it soon pays for itself. The house is changed into a home, and the family health is protected.

Dear Sirs:—I suppose you have the picture sent you of my house, ten rooms, heated at the expense of nineteen (19) cents a day on the average of three months, equal, as I estimate, to one large heating stove for two rooms.

J. B. PHILLIPS, North Girard, Pa.

Gentlemen:—Having used an IDEAL boiler the past winter, will say the heating capacity of same for amount of fuel was beyond my belief. I heat an eight-room house, 28x34, on six tons of smokeless coal—nearly one-half of cost of hot-air furnace for same rooms one year ago. I can certainly recommend the boiler.

W. G. KNOPP, Cleveland, Ohio.

Gentlemen:—Referring to the IDEAL boiler and AMERICAN Radiators purchased four years ago. They have pleased me beyond expectation. Although used four years, they are practically good as new; have expended no money for repairs of any kind, and as to cost of fuel consumption my bills are about one-half of what it cost to heat my house with stoves, and never was my house so uniformly warm and cozy and home-like. In short, the system is and does everything that is claimed for it. Will build another house this fall, and will have IDEAL Boilers and AMERICAN Radiators installed, because I am convinced they are the best heating apparatus made.

F. CHOTT, Cleveland, Ohio.

Because of the greater living comforts brought about by IDEAL Boilers and AMERICAN Radiators, building rentals are increased 10% to 15%; while their full cost is added to the selling price of the property. Money thus invested brings far better returns than savings-bank deposits, securities, or money loaned at 6%.

Prices are now lower than for a long time; and as the best fitters are not so busy as they will be later, you get your outfit installed by best mechanics, test it immediately and know that the contract guarantee is filled.

No tearing-up necessary—put into OLD buildings—town or country. Don't delay! Write us today for free book, "Cottage Heating." It will make you a better judge of heating values and economies. Visitors always welcome at our Show-Rooms.

FLIGHT OF BELL AERODROME
Machine Travels Over Three Hundred Feet Above Lake When Accident Stops Flight.

HAMMONDSPORT, N. Y., March 12.—Prof. Alexander Graham Bell's new aerodrome, the "Red Wing," was given its test flight over Lake Keuka today by F. W. Baldwin, the engineer in charge of its construction.

The machine was built by the Aerial Experiment Association for Lieutenant Thomas Selfridge, United States army. The aerodrome, after gliding over the ice on Lake Keuka for about 200 feet, rose gently to the height of about ten feet and sailed at that elevation for a distance of 313 feet at the rate of from twenty-five to thirty miles an hour. After having covered this distance a portion of the "tail" gave way and the aerodrome was brought down for repairs.

The aerodrome was propelled by a 40-horsepower eight-cylinder air-cooled gas motor. The propeller was made of two blades of steel measuring six feet two inches in diameter, having a pitch of four feet and weighing fifteen pounds. The aerodrome proper weighs 135 pounds, the engine and apparatus about 200 pounds, and the operator 175 pounds, thus giving the entire machine and operator a weight of 510 pounds. The total supporting surface, including tail and rudder, was 453 square feet, which gives a flying weight of 123 pounds per square foot. The main wing piece of the

aerodrome consists of two superimposed surfaces, leaving a spread of forty-five feet from tip to tip and an average depth from fore to aft of five feet three inches. The surfaces are of the double wire design and are bowed laterally. The experiment today was declared to be highly satisfactory in every way except for the minor accident to the "tail."

DRUGGIST IS CONVICTED
Test Case of New Federal Pure Food Law Brought in Washington.

WASHINGTON, March 12.—Robert N. Harper, banker and drug manufacturer, was today convicted of violating the federal pure food and drugs law by the sale and manufacture of a pharmaceutical preparation or compound which was mislabeled. The case has been watched with interest by drug firms all over the country and it is significant because of the fact that it is the first conviction under the new law.

Harper has been on trial for two weeks. The compound in question contained antipyrine, acetanilid, caffeine, alcohol and other ingredients. Bearing on the alleged poisonous character of this preparation, testimony was offered that if not guardedly taken an overdose would be fatal. Harper admitted on the stand that he would not take the contents of an eight-ounce bottle of this preparation, because to do so would be dangerous.

WOMEN ACCUSED OF MURDER
Burnett Sisters of Richmond, Mo., Charged with Killing Mrs. Thomas McGonigle.

RICHMOND, Mo., March 12.—Thomas McGonigle and his two sisters, Mrs. Mary Jane Burnett and Mrs. Susan Burnett, were arrested today charged with the murder of Mrs. Maggie McGonigle, wife of their brother, on February 16. They were arrested upon an affidavit filed by Francis M. Barker, brother of the dead woman. Thomas McGonigle and his sisters were placed in the county jail to await their preliminary hearing, which was set for March 11. Mrs. McGonigle was killed in her home five miles south of here while her husband was at work at Camden, Mo., and her children were away to school. After the murder the house and body were burned to conceal the crime.

SIXTH IOWA DISTRICT FOR TAFT
Convention Also Endorses Senator Allison for Re-election.

OSKALOOSA, Ia., March 12.—Republicans of the Sixth congressional district met here today and selected delegates and alternates to the national convention at Chicago. John F. Lacey of Oskaloosa and Milton McCord of Newton were chosen delegates and Prof. Jesse Macey of Chronnell and J. B. Spears of Buxton alternates. Resolutions endorsing President Roosevelt's policies and Secretary Taft for president were adopted. Senator William E. Allison was endorsed for re-election and B. F. Carroll was recommended as a candidate for governor.

To Persons Driving Vehicles

At this season of the year street car tracks are apt to be very slippery owing to atmospheric conditions, and it is impossible, therefore, to stop a car as promptly as ordinarily.

REMEMBER that a street car is confined to the track and that the Motorman cannot turn out or stop his car instantly when "cut off" by a vehicle.

Do not rely upon the motorman to save you from the consequences of your own carelessness—he may not be able to do so.
