BONDS-Government, firm; railroad, ir-regular. eign Demand Comes with dred and Eighty-One on Market-Close is Strength. / Thousand Dollars. Feverish. NEW YORK, Sept. 12.—The unsettla-ment and irregularity of the stock mar-ket continued in evidence today, with the distinction clearly marked between an up-ward tendency in the railroad stocks and decided depression in the copper stocks, with diminishing sympathetic effect most marked in the other metal stocks, but periods of more aggresive strength in the railroad stocks held up the weak indus-trials, while the development of acute weakness at other times in the coppers pulled the rest of the list down with them. OMAHA, Sept. 12, 1807. The market was firm and steady, owing to the lack of offerings and the heavy buy-ing orders which were held by all com-mission houses. Cables came firm and higher and the foreign demand was strong. Wheat opened steady and showed good "rength, owing to the lack of offerings. Exporters are doing a heavy business, and local bulls were buying on the strength of the foreign demand. September wheat opened at 89c and closed at \$6. Corn was firm and some stronger this morning, caused by numerous frost reports OMAHA, Sept. 12, 1907. Trade advices were held to account fundamentally for the condition of the copper securities, but there were more or less authentic accounts current also of a straimed market position involving heavy speculative bolders of the stocks Reports of the closing out of large loans in which copper stocks figured as col-lateral received general credence. Anxiety over the trade position was held to ac-count primarily for the discrimination against these loans. The characterization by the fron Age of copper trade condi-tions as "utterly demoralized" was re-garded as highly impressive. This view of the situation in the trade was con-firmed by official information during the day, in which sanction was given prac-tically to assertions that a shuidown of production in the Montana camps was in contemplation. Demand was admitted to be so far paralyzed that hardly a pound of the metal was changing hands and the price at which an effective demand might develop was acknowledged to be still problematical. It was stated that banks were unwilling to make further advances against copper to be piled up in this manner with no definite prospect of a market. While information was clear en these points, the extent to which a fall-ing off in the demand for copper products was accepted and all of the necessary them. E Onio 300 R. T. e. 48 R. While information was clear on these points, the extent to which a fall-ing off in the demand for copper products in the various lines of industry was re-sponsible for the situation was vaguely known. The United States Steel stocks showed clearly enough that the condition of the copper trade was arousing anxiety over the iron and steel trade. Immediate advices from that trade were encourag-ing as to the demand for iron, some re-covery having occurred from the extreme price concession with a revival of de-of demand. The failing off in outper in Au-gust was moderate, but the dec is in weekly output on September 1 was more decided. United States Steel bouched the low level of the year by a narrow frac-tion, while the coppers widely extended their previous low records for the year. The nature of the liquidation in these stocks gave effect to the rumors which were kept in constant circulation of em-barrassments of Stock exchange houses. Liquidation was pronounced heavy for Boston account, the center of copper se-curities, and for Philadelphia account, where the slump in the public utilities securities for that city sent a wave of in-fluence into the New York market. The special weakness which developed in Reading in the course of the late trad-ing was attributed to this connection. Short sales by the bears were an im-portant influence, and when they bought to cover the market railied. The net changes in consequence are comparatively small and give no idea of the violence of the drop from the advanced prices of the morning to the depths of the reaction. The tone remained feverish and unsettled at the closing. Buying for London ac-count and the further easing of London discounts was a feature in the early strength. Foreign exchange continued to decline and goid exports came into dis-cussion as a possible errly contingency. The local momey market, meantime, con-tinued to relax with the passing of the effect of the bond o Chicago Kansas City do 4s SWEET POTATOES-Market basket, 75c; Virginia sweets, per bbl., \$4.75 DATES-Kadaway, 54c; Sayers, 5c; Hal-50% lowis, 5c; new stuffed walnut dates, \$-lb box, \$1.00.
