CABLES PLEASE WORST BULLS

Wheat Continues to Maintain Strong Position and the Foreign Demand is Excellent-Corn Holds Steady Tone.

OMAHA, Sept. 13, 1807.

All grain was strong and good strength was shown in all the sales. Cables celtainly showed strength enough to please the most ardent buil and longs took advantage of the stiffness and sold heavy. Wheat continues to hold in a very strong position, with cables coming strong, and there is an excellent foreign demand. The Canadian northwest furnished some very sensational bull news on frost, but prices were held by longs selling. September 19 wheat opened at 87%c and closed to \$5%c.

very sensational bull news on frost, but prices were held by longs selling. September wheat opened at 87%c and closed \$6.%c.

Corn opened strong and held steady with wheat and higher cables.

Elevator concerns report easier receipts from the country and are looking for heavy shipments. September corn opened at 56c and closed at 55%c.

Oats opened firm on some scattered buying by commission houses. All orders were quickly filled and the market made little gain. September oats opened at 57%c and closed at 31%c.

CHICAGO GRAIN AND PROVISIONS

Features of the Trading and Closing Prices on Board of Trade. CHICAGO, Sept. 13.-Milder weather in he northwest and increased offerings of ash grain from the country caused weakthe northwest and increased offerings of cash grain from the country caused weak-ness today in the local wheat market. At the close the December delivery was off \$25%. Corn was down 191%. Oats were fac lower, and provisions 5c to 20c lower.

Weakness in wheat developed toward the market of the first hour of trading. Prior to that sentiment in the pit was builtshind prices showed advances of nearly to compared with yesterday's final figures. The early strength was the result of an advance of more than id in the price of wheat at Liverpool, due to numerous reports from western Canada claiming the wheat crop had been severely damaged by frosts, and to an advance of to on the Minneapolis curb. Local traders bought freely at the start and there was also general demand from commission houses to fill outside orders. After the first hour, however, trade quieted down and the marhowever, trade quieted down and the market turned very weak. The chief reason for the weakness was a rise in temperature in the northwest and a report that according to the weakness on cash bids sent country appears were more liberal. The fact that considerable cash wheat had been transferred over night from private to public elevators also tended to increase sales in considerable cash wheat had been transferred over hight from private to public elevators also tended to increase sales in the local market. There was little support on the market late in the day and the close was weak, with prices almost at the lowest point. December opened 1400 140 to 340 and the close was weak, with prices almost at the lowest point. December opened 1400 140 to 340 and then declined to 374 and closed at 375 c. Clearances of wheat for the week as shown by Bradstreets were equal to 5,250,000 bu. Primary receipts were 653,000 bu., compared with 75,000 bu the corresponding day a year ago. Minneapolls, Duluth and Chicago reported receipts of 407 cars, against 315 cars last week and 742 cars a year ago.

Corn prices declined more than le per bushel because of a general selling brought out by favorable weather for the maturing of the new crop. Commission houses and elevator interests were leading sellers. Demand came largely from shorts. December opened a shade lower to a shade higher at 500 to 500 c and sold off to 580 c, where it closed. Local receipts were 357 cars, with 159 of contract grade.

Trade in oats was light and the market was weak in sympathy with wheat and corn. A decline in the price of cash oats had a weakening influence on options. December opened 16c to 16c higher at 520 c to 530 c and sold off to 520 c, where it closed. Local receipts were 170 cars.

Provisions were weak on selling of lard and ribs by local packers. The weakness of coarse grains was a bearish factor. At the close January pork was off 20c at \$15.55. Lard was down 5c at \$5.75. Ribs were 74c lower at \$5.16.

Estimated receipts for tomorrow: Wheat, 166 cars; corn, 445 cars; oats, 248 cars; hogs, 13,000 head.

for Saturday.

OMAHA, Sept. 13, 1907.

The weather is rainy and unsettled in the Lake Superior region and west over Minnesota, the Dakotas, Montana and the western Canadian provinces. Fair weather is general in all other sections. Temperatures are higher from the Rocky mountains east to the Atlantic coast. They are lower in the extreme northwest and on the Pacific slope. Twenty above zero was recorded in Alborta, Can., freezing temperatures in Montana and killing frosts in Oregun. The weather will be somewhat unsettled in the central valleys tonight and Saturday, but will be generally fair in this vicinity, with slightly cooler.

BOSTON, Sept. 13.—WOOL—The Commercial Bulletin of Boston, basing its report upon statistics gathered for the government, will say tomorrow of the wool market: The market is slightly more active and a larger volume of business has resulted from the greater number of buyers that have been present. The market undertone is firm, largely because of the remarkable strength abroad and the feeling among dealers is that the situation does not warrant concessions on large lines of good wool. The demand for beef steers was not brisk enough to make a very active market and the trade as a whole was dull and slow from start to finish. Prices in most cases looked about steady, and still the feeling was weak and the trade unsatisfactory.

The receipts for the week have been very large, as compared with the previous days, only about twenty cars being reported in when the market opened. The receipts for the week have been very large, as compared with a week ago and a year ago, but still none too large to supply the demand. The demand for killers has been liberal.

and the demand for feeders very large, so that the market, notwithstanding the large receipts, has been in a good healthy condition every day. Each day's arrivals have changed hands promptly, nothing of any not nothing has been shipped out to any other market, barring only nine cars, which were brought in through a mistake of the railroad company.

With such light offerings this morning, the market was rather slow and dull, buyers not seeming to be much interested in the few cars offered. Still there was some little inquiry and desirable stuff sold in about the same notches as yesterday. Thus some very decent fat lambs sold up to \$1.00, with fat ewes as high as \$5.55.

OPERATOR IS ASSAULTED Was Enroute Home After Completing His Labors at the Western Union.

L. B. Kinne, a telegraph operator in the feeling was weak and the trade unsatisfactory.

The market on cows and helfers was in about the same condition as the steer market. The demand was not urgent and the trade slow from start to finish. Sellers in some cases thought they got steady prices, while others were quoting it as a little of casier.

There was nothing new or interesting in the stocker or feeder trade. Speculators still had a good many cattle on hand and were not in need of very many more. The result was a slow and weak market.

visited the Postal Telegraph office. Mr. Kinne telephoned from the Bluffs that he was suffering some from bruises in his stomach, but believed he would be able to report for duty Friday morning. It was intimated at the Western Union that a warrant would be sworn out for

the arrest of Moore. Officials of the Telegraphers' union deny that any violence was shown Operator Kinne Thursday night and say that only three men approached him after he left the Western Union office. Frank Moore, whose name was mentioned in connection with the affair, declares that not a blow was struck.

"We approached Kinne when he left the office," said Moore, "with a view to asking him not to go to work again. I spoke to him as I would to any gentleman, whereupon he said, 'You fellows get away from me or I'll shoot you.' I took hold of his two arms, thinking he meant what he said, and to learn if he had a revolver. Perhaps squeezed his arms a little hard, but there was not a blow struck. This talk of violence is foolish, and this little episode is being taken advantage of by telegraph officials to prejudice our cause. They have succeeded pretty well in making a mountain out of a mole hill."

Jack Skoda, an operator who witnessed the affair, confirmed Moore's view of it and said there was no violence whatever at shown.

Culet.

Retail trade increases at the leading cities as the vacation season closes and the opening of the fall lines is attended with most satisfactory results. As the staple crops are secured and marketed there is a prospect of improvement in mercantile collections throughout the agricultural districts, and the decline in prices was especially stimulating to export trade. There is still much conservatism in placing contracts for future business and decreased speculation is another factor that aids in restoring nowmal financial conditions. Primary markets for dry goods are seasonably quiet without any evidence of weakness. Export trade is illi siagnant. New contracts for men's wear woolens appear slowly. Reports from worsted mills indicate fairly full activity, but there is considerable idle machinery at woolen mills.

growing scarcity of heavy weights, which are held at fractionally higher prices. On the other hand light stock is neglected and accumulating and concessions may be necessary to move this variety. Some improvement is noted in the demand for hides, although last week's liberal sales supplied the wants of numerous buy-
