NEW YACHT WILL COST MONEY

Syndicate Formed to Build Yacht to Defend Title. NEW YORK, Sept. 24.—Preparation for the defense of America's cup has been begun by the New York Yacht club. At least one syndicate is being organized to build a yacht to defend the trophy and there may be a second, and perhaps more. There seems to be only one opinion as to the management of the defender. Every one appears to agree that it will be vested in E. D. Morgan. It is understood that several of the more prominent younger men in the club have either tentatively or definitely promised to subscribe to the syndicate and that a few other of the older men who have not been represented in previous syndicates will subscribe. Those mentioned as generous subscribers to the syndicate are Edward H. Harriman, Colonel Robert M. Thompson, C. K. J. Blilings and Roy A. Rainey. The cost of reproducing the Reliance would be upward of \$500,000. The Reliance cost \$200,000 to build and \$200,000 to run, while the club spent \$50,000 more for the mere conduct of the races. Material and workmanship are more expensive now than they were then and it is believed that the new defender will exceed these figures. NEW YORK, Sept. 24.-Preparation for

NEW POINT IN RATE CASES Right of Court to Act in Advance of Interstate Commerce Com-

mission Challenged. SIOUX FALLS, S. D., Sept. 24.-(Special.) -Arguments in the injunction proceedings instituted by Jewett Brothers & Jewett in behalf of the Sloux Falls Jobbers and Shippers' association to prevent the Milwaukee railway company from putting into effect new freight rates from Chicago and other Lake Michigan points, which to Sioux Faits would be 104 per cent of the rate to Sloux City, were concluded before Judge Carland of the United States court in this city late this afternoon, when Judge Carland took the case under advisement. A decision is looked for before the close of the week. Attorneys for the rallway company argued in substance that the federal court was without jurisdiction and could not grant the injunction until after the Interstate Commerce commission had decided a case involving the same rate which now is pend-

ing before that body. The question raised as to the jurisdiction of the federal court in such cases, in advance of action by the Interstate Commerce commission, is of the utmost importance and it is thought, no matter how Judge Carland decides the case, it will be appealed in order to get a decision from the

BRONCHITS

consists of an inflammation, acute or chronic, of the bronchial tubes, producing a diseased condition of the mucous membrane. This troacherous and destructive disease is often primarily induced through contracting a cold, or a series of colds, as a natural sequence following exposure when overheated, sudden climatic changes, getting wet, cooling off too suddenly, frritating vapors or such other causes as materially weaken the general system. The bronchial tubes branch off from the trachea like a network and conduct the air to and from the lungs. They are very delicate and easily affected.

The starting point is frequently a severe cold, or repeated colds, producing an inflamed or diseased condition of the mucous membrane lining the nose or threat, commonly designated as a catarrhal condition. Poisonous secretions then accumulate which are not only absorbed, affecting the blood and nerves, but there is also a constant dripping of this poisonous substance from the nose to the throat, etc., hence it extends to the bronchial tubes, frequently producing Asthma, then into the lungs, causing acute lung disease, and finally into the lung tissue, terminating in consumption. Through neglect and inattention it gradually weakens the whole pulmonary system, making it very susceptible to disease, as it seldom ceases in its destructive course until it has invaded the stomach, liver and kidneys, affecting the entire system. If the inflammation extends into the lungs, its very apt to render them susceptible to the pneumonic germ, tending to make the sufferer an easy prey to its ravages.

If the disease is allowed to progress until it has advanced to this stage the

them susceptible to the pneumonic germ, tending to make the sufferer an easy prey to its ravages.

If the disease is allowed to progress until it has advanced to this stage the sufferer then realizes that he is in the clutches of one of the most destructive diseases that pervades our land, spreading desolation. In its inciplent stage little pain or inconvenience is experienced, and the sufferer is lulled into a sense of false security, postponing treatment day after day and week after week, in the meantime allowing the disease to advance step by step until it has securely fastened its tenacies upon the system. If you are afflicted with this disease you should not defer treatment unnecessarily and possibly throw away your chances of obtaining a cure, but call and consult us in time, while you have health within your grasp. It is always better to be eafe than sorry when one's health is concerned.

We treat men only, and cure promptly, safely and thor. oughly and at the lowest cost, BRONCHITIS, CATARRH. NERVOUS DEBILITY, BLOOD POISON, SKIN DIS. EASES, KIDNEY and BLADDER DISEASES and all SPE. CIAL diseases and weaknesses and their complications.
