Purse Doubled in Six-Horse Business Yeam Class and Attractive Offers Made for Children's Pontes.

Unprecedented is the demand for the boxes for the fourth annual Omaha Horse Show, which is to be held at the Auditorium the week of October 14-19. Secretary Moorehead is receiving numerous in quiries for the boxes this early in the season, almost before they are offered for said and this fact has given the directors reat encouragement, for, after all, it is give interest which the people of Omaha themselves take in the Omaha show which assures its success. This is the first indication and the heavy demand has increased the confidence of the directors in

the already assured success of the show. Many of the prizes offered at the show are given by local merchants, jobbers and manufacturers and the directors are meetng with greater success in securing these prizes than in any previous year, and this another indication that Omaha is beof the horse show to the city. Merchants who were lukewarm over the first and second shows which were held in Omaha are now most enthusiastic and have no hesttancy in saying that the horse show is the greatest incentive to trade of any event of It will not do to wear a shabby silk hat to the horse show, and other things must be bought, and all these taken together make a most lively trade during and before the horse show. The women's tailors are already crowded with orders for gowns for the show and the millinery stores have their fail finery in readiness nithough most of it is being kept in the livities.

Time Between Events. week will intervene between the carni val and the Horse show and this will giv all a chance to get a little needed rest t anticipation for society's great week. It will truly be society's week this year, judging from the demand for boxes as indicated above. It is no longer a problem with the directors of selling the boxes at the Horse show, but rather of providing enough boxes be \$2,000.

to meet the demands of the people who insist on having a comfortable place where for a week they can entertain their friends and at the same time see the parade of the horses around the tanbark arena. The directors have taken pains to add features to the show this year which will be at once novel and most interesting. The

addition of the cow pony is meeting with the hearty approval of the South Omaha pony will come from the far west and with that he is properly looked after. Armour's Crack Team.

Armour's crack six-horse team, fresh winning numerous cups, ribbons, orizes and other valuables in London, Paris and other European countries, will exhibit at the Omaha horse show. This crack team is a most expensive affair, for when on the road Armour & Co. send a full equipment of horses, enough to show in the six, four and two-horse classes for business horses ... The team is carried und the country in a specially prepared hand ot look after the welfare of the high-priced beauties. Last year Swift and Company had a walkaway in the heavy horse class with the six-horse dappled gray team, but competition is promised

Taking a cue for the continuous applause extended to the six-horse business teams which were shown each evening last year, the directors have made this class doubly attractive to exhibitors by doubling the size of the purse for the exhibit and this will insure entries from all over the counbusiness teams, but also for four and two-horse teams and the competition is sure to be most keen.

Six Classes for Little Folks. Six complete classes are set aside for the little folks and they will be given ample opportunity to show their ponies and their skill in handling them. It is a most inspiring sight to see the little tots handling their ponies, many of them with the skill of their elders. It appears that more and more children are owning ponies in Omaha each year, and this class, which always attracts as much attention as any at the show, bids fair to be more than filled. Last year it was so crowded with entries that

Class 78, which is "for the best single horse, any size or sex which can be bought for \$750," and class 79. "for the best pair which can be bought for \$1,500," is atracting all kinds of attention. This will give the horsemen of Omaha a chance to pick up a cheap horse, or pair, for the prize is sufficient to induce some of the best to enter, and after entering the horse must be sold for the price named, should a of Omaha will conduct the services. The buyer appear.

Of Interest to Many. Foley's Kidney Cure will cure any case of kidney or bladder trouble that is not beyond reach of medicine. No medicine can

Many dealers for the additional profit invariably try to sell articles which they claim are just as good as the ones advertised. Protect your own interests and insist on getting what you ask for.

Police Commission Put in Afternoon Hearing Lid-Lifting Case.

The South Omaha Board of Fire and sioners met in special seasion Saturday afternoon for the purpose of hearing the evidence in the case of George Tarsikes. Tarsikes' saleon at Twenty-fifth and Q streets, was closed two weeks ago on the authority of Chief Briggs. It was alleged that the Slocumb law had been violated, in that Equor was being sold on Sunday. The evidence was heard on both sides of the case and the board took the matter under advisement. The witnesses in the prosecution were Chief Briggs and P. H. Shields, who visited the saloon during Sunday morning and found what they believed to be convincing eviience of illicit sale. The defense put five witnesses on the stand. Their evidence was contradictory in the main to what was developed by the prosecution. final judgment will be rendered next Wednesday evening, when the board will

City Needs More Ground. With the completion of the new city hall and jail it is rumored that some of the lmen have made the discovery that the rest of the lots owned by T. J. O'Neill, or at least a large part of them, will be needed for a site for the patrol barn. It is also desirable to have more lawn space. sinning to recognize the intrinsic worth It is likely that the purchase will be negotlated before long. The patrol harn will iodate the patrol wagon and the chief's buggy. It is probable that the upper floor may be arranged as in Omaha, for a locker room and bath room for officers, a small gymnasium where the men may train in boxing and useful arts of self-defense and the handling of prisoners The architect and the contractors for the city hall probably will report the comple tion of the building at the meeting of the council Monday evening. The cost of the city hall to date has been as follow

Opportunities for the Active, Willing High School Boy as Many Today as Ever Before-Educational Notes.

The campaign against secret societies among students in high schools is proceeding with considerable vigor in various cities. Admittedly needless, foolish and injurious to the schools, supporters of the frats in and out of school resent interference, as a restriction on individual liberty. This assumption does not deserve a serious thought, but it serves the purpose of arousing the emotional arder of young America. The issue involves the Armour & Co. have recently completed fundamental one of obedience to authority. the consignment of 400,000 pounds of blood On that issue school authorities seeking meal to the imperial government of Japan. to enforce reasonable regulations should During the time of the Russo-Japanese receive the cordial, earnest support of parwar. The young man was gagged ing district in South Omaha has been and bound and taken under cover of night to a farm in the vicinity of the city. Here he was escorted to a cellar long in disuse and led down a stairway. Candles were lighted and placed about in niches in the wall and young Lorraine, blindfolded, was induced to lie down in what to him seemed a box, and the cover was fastened. The covering soon was removed from his eyes, and he awoke to the realization that he

> There was sufficient air to keep him from smothering and he remained there all through the night. Early in the morning he was released by some of his friends.

In a recent interview in the New York lectual genius of the Standard Otl company, had this to say regarding the school boy's

What, I am asked, is the young high fifty years ago? The cry is general that it much less than it was then; is that so? It is emphatically not so. The chances for the high school boy now are many times greater than they were then. count too much by the conditions they find in their immediate surroundings. They don't look at it in a broad enough way Remember that in 1886 I seemed to find closed to me a trade that has since grown with the country's growth, in a proportion far greater than the increase in pop-Think of the number of machin shops in the country now compared with then. Not only that, but think of the increased average of output or the total of nachinery of the United States today compared with fifty years ago.

"The population then was 20,000,000, and the cry of overcrowded businesses was so insistent that a national party existed discourage immigration. practically to Manufacturing business was mostly confined to the east, and close at hand it did seem crowded. With a population of 80,sighted and narrow-gauged who cannot see or think outside their parish should the same cry against immigration now. The true way is to look at that 80,-900,000 souls as your greater market, as your enlarged opportunity, not as your magnified obstacle. Besides, modern facilities, whether of transportation or com munication-railroad, steamboat, telegraph, and telephone-have brought all the people closer logether, annihilating not merely distances but differences of thought, speech, habits and daily wants. And beyond all that we have products, natural and manufactured, which the foreigner wants, and which we are better and

"We are truly in the way of having the whole world as our market. Our cotton, wheat and corn, our coal, iron and copper our gold and silver, our oil, and all its by-areducts, not to speak of all the manu-

pared to supply.

factures that arise out of these, and are fifteen Chinese, which compares favorwhich call for more and more millions of workers-these are the great field open for the effort of the young man just out of school. And these United-States alone will some day be the home of 500,000,000. In this great opportunity of today, and this multiplying prospect of tomorrow, the high school boy may surely find all that any age has presented, or ever will present."

FOREIGNERS IN COLLEGE HERE. Students from All Over the World

This Country. It is apparently only in the last few years that there has been any marked disposition on the part of foreigners to come to American universities. This is not unnatural, because until the American institutions began to distinguish themselves in other than peculiarly academic department lines there was small reason for any foreign student to come here.

Two years ago Dr. Rudoif Tombo, jr. registrar of Columbia, made up a table to show the foreign student population. Pennsylvania then had 126 foreign stuents on a basis of 2,853, or 4.41 per cent This percentage has increased, even though there now are 1,001 more students at Pennsylvania.

In the table of two years ago Columbia had 117 foreign students; Cornell, 100; Harvard, 94; Yale, 62, and Princeton, 20 Harvard has gained more than any other college in actual numbers of foreigners, and if it were possible to count the summer and afternoon school students would have probably more than any oth

There are twenty-two students who are not counted because in this summary no account has been made of summe schools at all. In addition Radcliffe col lege, which is not taken in with Harvard. has three foreign students. But women students are counted at Columbia. Harvard would have 172 students from other countries if these were marked in.

Cornell has gained fifty-two foreigners ince Dr. Tombo's census was made. The distinction Cornell claims is that of having more South Americans and more students from the United States' foreign pos sessions, that is Cuba, Hawaii, Porto Rico and the Philippines, than any other justi-

The Massachusetts Institute of Tech nology, while it has only sixty-two foreign students, shows up well on the percentage basts. It is not unnatural that a technological school of the type of the Massachusetts Institute of Technology should draw men from other countries as

The South Americans who are found at Cornell are drawn there for engineering work in great part. That also helps to explain their presence at the Massachusetts Institute of Technology!

Harvard's great number of students whose homes are in Asia is ascribed partly to the special class for Chinese students. There are thirty-six men who are registered in courses maintained for them alone. Many of these men take other courses, too, and there are two or three persons registered fom China who are not Chinese. All told. Times, H. H. Rogers, regarded as the intel- there are forty persons at Harvard who claim residence in China.

Harvard has more men from North America than the other colleges, which group takes in Canada, Mexico and the school boy's chance now as compared with islands about the continent. Harvard is so large that the 147 men registered there altogether do not make the showing in

percentage that might be made. Yale and Columbia have not made very great advances in foreign population in the last two years, and as the universities both have grown in other ways the percentage has not changed markedly. Georgetown, although a small institution, has several foreign students and if it were permitted count the preparatory department would be even higher up. Ten per cent of the 141 boys in the preparatory school are

foreigners. Syracuse of the class of institutions below the 3,000 mark has a fair number of foreigners, and even Brown with only seven Orino Laxative Fruit Syrup does not nauen out of 630 has a better percentage than some much greater places.

The cosmopolitanism of Cornell is known among those who ever have taken the trouble to see for themselves whether it is so much a college for farmers. There are thirteen Filipinos and three Hawaiians at Cornell. The nearness to Canada may account for the presence of twenty-three Canadians at the Ithaca institution. There

Feeble Heartaction is often the result of coffee drinking. Note the difference

after 10 days' trial of

ably with California despite the nearness of the Berkeley university to the coast. There are fourteen men from the Argentine republic, five from Brazil, five from Peru, two from Ecuador and one from Uruguay. Central America sends two from Costa Rica, one from Nicaragua and one from Guatemala. Incidentally there are nine Mexicans. Cornell has no less than ten men from India, which is unusual enough. These men from India and the twenty-three from Canada are the largest part of the delegation from British posses-

Sions. There are three Australasians, three Englishmen and one from Ireland. Other European countries are represented fairly Russia has four students, Holland. Switzerland and Turkey two aplece, while Bulgaria, France, Germany, Norway and Sweden are represented by one aplece.

There are six Japanese at Cornell, less perhaps than at many other colleges, notably Columbia. To top off with, Asiatie Turkey, South Africa and Palestine each claim one student in Cornell's 3.442. Although the representation of foreign students is only a little more than 4 per cent of the total registration at the university, the cosmopolitanism of the foreign group is considered the vital fact. There are no colleges which can show men of so many different races and countries on their lists, although some colleges here and there may have more men from certain countries.

Educational Notes. Projected additions to the public schools of Chicago involve an expenditure of \$8,-000,000. Seats for 25,000 pupils will be provided.

than Cornell

Prof. L. E. Young, the new director of the School of Mines and Metallurgy of Miss-ouri, is a graduate in mining engineering from the Pennsylvania State college. He has had a large experience in mining in Pennsylvania, Iowa, Michigan and Colo-rado.

Missouri State university at Columbia has hopes of leading the larger American col-leges in the rate of increase. Last year a bulletin investigating the growth of Ameribuiletin investigating the growth of American universities was issued by the Harvard authorities and it was found that Missouri university came second in the rate of increase. The enrollment so far this year has been exceptional and hence the hopes of heading the list. President Jesse is working for an enrollment for the whole university of 2,500.

Mhole university of 2,500.

A letter from Japan, published in Berlin, says that the study of the German language in Japan has fallen off in the last few years. At the close of the school term of 1800 in Tokio the department of examinations reported that the following languages had been studied in the schools: English, Chinese, German and Russian. French, Corean and Spanish were neglected. In 1904 the number of students of Chinese increased 100 per cent, and the study of Engreres of the study of Engreres of the study of Engreres of the study of Engreres. 1904 the number of students of Chinese increased 100 per cent, and the study of English feil off, while there was a marked increase of German students. In 1907 statistics show that the German language has lost in favor, and it has gone back to seventh place. English has not retrograded, and has thirty students in the "final" class to thirteen who study German. "Young men who are being educated for business careers," says the writer, "do not study German, but it is still popular with those who are in the scientific circles."

The medical examination of pupils in the

The medical examination of pupils in the schools of New York City has shown an alarming number of pupils that suffer from mainutrition, enlarged giands and defective breathing. The report of the examining physicians emphasizes the fact that in many breathing. The report of the examining physicians emphasizes the fact that in many cases the parents do not know their children's condition and fail because of ignorance to take precautions. The report also says that a large percentage of the defects are easy to remedy and many could be prevented by proper care, though in cases of defective vision the causes are not always easily determinable. The report recommends that there should be a thorough physical examination of all children in schools, notification to parents of defects and a second notice, if need be, of persuasion for proper action, tacking which proper steps should be taken to compel attention. There should be also a periodic re-examination of children during school life, a physical examination of those that apply for working certificates and enforcement generally of health, tenement and child labor laws.
