LET THE COUNCIL DARE---JIM

Stop Permits.

DECLARES IT HAS NO AUTHORITY the qub.

He Will Instruct License Inspector or Anyone Else to Attend to His Own Business.

"I would like to see the city council interfere with any permits I issue," said Mayor Dahlman Tuesday morning. "The council has no authority over them as far as I know," he continued, "and I will instruct the license inspector or any one else to attend to his own business and

not interfere with mine."

This is the answer of the mayor to the proposed action of the council, as outlined Monday afternoon, when a resolution was ordered drawn requesting the license inspector to revoke and take up all permits issued by himself or other officer and to report upon the work at a later meeting of the council. The present system of permits was started in 1898, during the exposition year. Many persons desired to sell small objects in the city that year and they did not feel warranted in taking out a license for a year. The license inspector was then instructed to issue permits for a day, taking from the applicant such sum as he could afford to pay and renewing the permit upon payment of other money until the amount collected equalled the annual license fee, when a license would be issued. In doing this the license inspector places the partial payment in an envelope endorsed with the name of the applicant. This is turned over to the city treasurer, who holds it as a separate fund until the whole amount is collected, when a receipt is given and the license issued in due form. From the thus the permit is issued until all the money is paid no record is made at theoffice of the city clerk and if the deferred payment is not duy the amount on hand is turned into the dity treasury as "street peddlers' license for a day.

Deadly Parallel No. L.

PROMISES

Omaha people have wintered and summered with the Nebraska Telephone Company for nearly twenty-five years. It has been a profitable association in both sides. We have our little differences now and then, but in spite of them we have been friends. Now, some third parties have obtained a license to promote another telephone company and started in to attack us in the newspapers.

It is not necessary to tell Omaha people anything about the Nebraska Telephone Company, which has been operated in Omaha by Omaha people for a quarter of a century, but a newspaper agitation is good advertising, and we believe advertising pays. We believe it is good business for us to push along the agitation, and besides it may prevent some of the strangers now coming to Omaha from getting a wrong impression if we fire facts against the threats and promises.

The telephone promoters from Los Angeles have taken pity on the ignorance of the people of Omaha and have started in to tell us what to do and what not to do. They are ciever men at their trade and are able to talk on any subject at any time, or all the time if necessary. They have started in by attacking the kind of telephone that is used in Omaha and all the other cities in the country, and even today in Los Angeles, They think we "cuss" too much and don't hesitate to say so. They object to the way the telephone business is now conducted, and say that it is not their way. They begin promising all kinds of fine things, and they do it well, for promises are ther stock in trade. They promise not to take a subscriber's money for telephone service until they get ready to take it. But if you are an investor they will take your money now and give in exchange a beautifully engraved promise, which they call a bond, throwing in with each one another pretty promise, which they call a stock certificate.

The instructors from Los Angeles will tell us all about these promises later on. They will do our thinking for us, both in regard to telephones and finance. Some of us are going to learn a lot, and some of us are going to pay for the teaching.
