

GRAIN AND PRODUCE MARKET

Values Decline on Disappointing Cables Full One Cent.

SHORTS FAIRLY WELL COVERED

No Sustaining Power to Check the Run of Freight Taking—Wheat in Lower and Corn Easy.

OMAHA, March 20, 1908. With an almost featureless market and disappointing cables, grain values took a decline of a full cent today.

Wheat was lower at the opening, with lower cables and general run of sales to profit taking.

There was nothing from the outside market or from western crop reports to encourage the buying side and prices sustained a decided loss. May wheat opened at 94c and closed at 93c.

Corn showed the same inclination to ease off that was dominating the wheat market. The general sentiment is bullish, and 70c corn is in demand, but heavy sales for large profits took the advance from the market.

NEW YORK STOCKS AND BONDS

Only Motive Power in Market is Shifting of Professionals.

TONE UNCERTAIN AND WEAK

Break Advance Comes Late in Session on Favorable Forecast of Week's Currency Movement Report.

NEW YORK, March 20.—The only motive power in the stock market today seemed to be shifting of positions by professional traders. This element acted today with more than usual frequency, changing position many times throughout the day.

Large attention was given to the state of the iron and steel trade, owing to the publication of the annual report of the United States Steel corporation for the year and also to the outcome of the conference of the management and the policy of maintaining prices.

The content of the annual report for the most part presented conditions of a past year which are no longer of influence in a speculative sense.

Of a different sort was the observation which the report closed, that the bookings for January was 27 per cent larger than December and for February 30 per cent larger than January.

As the report goes to press the bookings per day are at least 25 per cent larger than those of February, which is a record for the industry.

The favorable impression of the iron and steel trade derived from these factors was supplemented by reports from the copper trade. The price of copper advanced at the local market exchange and in London and the export price in New York also was credited.

The greatest strength was shown late in the day after the publication of the preliminary estimates of the week's subsidiary operations, but they have gained no momentum from the evening's express movement.

The \$1,000,000 gained from the subsidiary was largely increased by the receipt of notes of interior banks, which are being forwarded to banks here in very large volume, and which are being reported to the treasury for exchange to legal tenders.

Some operations in the money market, which are being reported to the treasury for exchange to legal tenders, which may figure in bank returns. Some operations in the money market, which are being reported to the treasury for exchange to legal tenders.

Bonds were steady. Total sales, par value, \$1,000,000. The market for registered securities was quiet.

Number of sales and quotations on stocks are as follows:
