Don't Buy Shirts

Simply because the neckband of a shirt is the right size is no reason to believe the shirt will be comfortable. The sleeves may be too short. The armholes may be too small. The shirt may not be long enough. It may bind through the shoulders. It may be "skimpy" everywhere but in the neck. Many men are "shirt sorry" because the garment is not properly proportioned. "Ideal" Shirts are. They're a comfort to wear, because, big and roomy.
