Cows and heifers were in moderate supply all the week, the demand being in excess of the offerings practically every day. In consequence the market gradually strengthened, being quoted strong and active every day and at the close of the week is safely 10000c higher than last week. It will be noted from the quotations that good to choice cows and helfers are selling very close up to steer prices.

Vety few fleshy feeders were received during the week in fact not enough to really make a test of the market. Such cattle can be safely quoted steady for the week. On the other hand, light stockers were in pretty liberal sumply, especially during the first half of the week. Early in the week there was very free huving on the part of speculators and prices were very setting tour.
