

GRAIN AND PRODUCE MARKET

More Fireworks Looked For in the May Futures After All.

CHICAGO DELIVERIES NOT UP

Seems Certain that Strength Will Come to All of the Options as a Result of the May Futures.

OMAHA, May 28, 1908. More fireworks in the May futures are looked for as a result of the market strength which will come in all grain options as a result of the May futures and unless the holders of long stock and short futures in the market values are expected to advance strongly in the next few days.

What was some easier on the start, but not little of the advance made yesterday. With more and more favorable conditions reported from day to day there is nothing to hold the deferred futures except the strength in the very near future which is expected to advance strongly in the next few days.

Primary wheat receipts were 25,000 bushels and shipments 100,000 bushels against no receipts and shipments last year on account of flour.

Clearances were 9,000 bushels of corn, 1,000 bushels of oats, and wheat and flour equal to 100,000 bushels.

Liverpool closed unchanged on wheat and unchanged on corn.
