ANCIENT FORT WILL BE USED

Old Fortifications Built by Spaniards
on Isthmus of Panama Are to Be
Rebuilt by Americans.

Fort San Lorenzo, for many years one of the important units in the defenses of the Isthmus of Panama during the days of the Spanish occupation of most of the western hemisphere, is again to serve in the capacity of defending one of the most important trade routes of the world, the Panama canal.

This time the ancient fortress will be manned by soldiers of the United States, who will serve modern, large-caliber guns with ranges of more than 12 miles. The new fortifications which, in a measure probably are to replace the ancient ones, will form one of the main defense links of the great Gatun locks, at the northern end of the canal.

Old Fort San Lorenzo, or, rather, the ruins thereof, stands on a high bluff at the mouth of the Rio Chagres and overlooks the town of the same name and the shallow harbor which on numerous occasions sheltered the ships of Christopher Columbus and the Spanish conquistadores who came after him and developed the Isthmus of Panama into one of the greatest trade routes in the world of that time. Across it was transported that vast amount of

treasure that flowed from the Americas into the treasury of the Spanish kings at Madrid. The Rio Chagres was one of the routes across the isthmus, and for that reason was defended at its mouth by the important and heavily garrisoned fortress, San Lorenzo.—Washington Star.

SEA BATHING HITS HEARING

Deafness Often Caused by Blowing
Nose Too Soon After Taking a
Dip in the Ocean.

Says a prominent physician about "bathers' deafness," a common summer ailment:

"This is a saltwater, not a freshwater, complaint, and many people who have been disporting themselves by the seaside return home much harder of hearing than when they left it. Cases are on record in which people have become actually deaf after bathing in the briny ocean."

Bathers' deafness is caused by blowing the nose after your dip. People blow their noses instinctively after bathing, because the salt water in their nostrils makes them uncomfortable. The result is that water is forced into the little eustachian tubes, which run from the ears to the nose.

Here the water remains for days till inflammation is set up by the

particles of salt. Then the eustachian tubes get blocked, remaining more or less so permanently, causing partial deafness.

So, if you must blow your nose, wait till some time after your bath is over, and then do it very gently. But it is better not to blow your nose at all until at least an hour has elapsed.

Canadians Refuse to Surrender.

A German paper describing the fighting at Ypres on June 2 says that the Canadians were completely exhausted and in part "fled irregularly" and in part offered a stubborn resistance, desiring death before surrender. Many a nest which contained Canadians who defended themselves desperately, refusing quarter, had to be emptied by hand grenades.

The paper adds that a general who was captured drew his sword and struck a sergeant, who summoned him to surrender, in the face, whereupon the infantryman attacked the general, who was fighting like a madman, and ran him through. It is said that the general had been visiting the trenches when he was caught by German curtain fire and was unable to return. Numerous other officers, says this report, were killed because they refused to surrender.—London Times.

It's the old fashioned housekeeper's turn to laugh when she surveys a row of nut brown loaves set to cool at the end of baking day.

Some spellbinders are appealing to the voters to be wary and others to the janitors to see that the heating apparatus is in order.

Some near pumpkin pie is so good that one seldom notices the deception until the last crumb has been swallowed.

Even with Combles crumbled it's a long, long way to a Christmas dinner in Berlin for Haig and Joffre.

Indian summer can make a hit this year by being the same old chestnut.
