In the college of arts and sciences thirty-four candidates received the degree of bachelor of arts and seventeen the degree of bachelor of science. A touching incident in connection with this part of the program was the award of the degree of B. S. to John Ephriam Williams, who passed away just a few days prior to his graduation, but had fully won his honors. The entire class stood uncovered as President Durkee solemnly conferred the postmortem distinction upon their departed fellow-student. Four young men were given special mention and honor because of their military service, and financial consideration will be given them by the university that they may later gain the degree they desire.
