COLORED COMMERCIAL CLUB

Executive Committee Holds Enthusiastic and Successful Meeting—Outlines Plans for Progressive Work.

The executive committee of the Colored Commercial club held an interesting and enthusiastic meeting at the club rooms last Thursday night. President Pryor presided. Nearly the full membership was present. The president officially announced the chairmen of the respective standing committees, all of whom accepted. Mrs. Grace M. Hutten, who has been serving so efficiently as assistant commissioner, was elected commissioner. The club was requested to take action concerning the location of a playground between Twenty-fourth and Twenty-fifth streets and between Grant and Lake streets. A resolution disapproving of this site was submitted. This elicited a general discussion. The consensus of opinion unanimously favored a playground, but opposed its location in any territory or place that would make it in fact exclusively a class playground. The matter was finally referred to a special committee for investigation, with instructions to report at the next meeting of the executive committee. A membership campaign was ordered put under way and other important business was transacted, outlining plans for progressive constructive work.

There is No "Water" in Bell Telephone Stock

No reputable authority has ever claimed that there is any "water" in Bell Telephone stock.

The actual physical property of this Company is worth more than the total securities outstanding.

That a dollar's worth of property exists for every dollar's worth of stock that has been issued, has been proved beyond all doubt by hundreds of impartial investigations by commissions and governing bodies.

The Bell System is conceded to be the best constructed and best equipped telephone system in existence, yet the capitalization of the Company is less per telephone than that of any other comprehensive telephone system in the world.
