#### ARTICLE XIV. CONSTITUTION OF THE UNITED STATES.

Citizenship Rights Not to Be Abridged.

All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No state shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any state deprive any person of life, liberty, or property without due process of law, nor deny to any person

#### THE TWIN STRIKES

THE twin strikes, coal and railroau, do not seem very near settlement. Daily the public is led to believe that the end is near. Conferences are being held, but little progress is made. Operatives and employees seem to be stubbornly contending for certain concessions which it would seem might well be left to a board of arbitration. In the meantime tremendous economic waste is going on for which the public

Worth Recording.

A Washington woman had scrimped for a long time to take a trip to rana ma. A man very much younger than berself, in the deck chair beside her, was making the voyage for the good of a frazzled nervous system. He was a whimsical youngster, who could joke at his own ups and downs, and she was used to boys, so they talked of this and that until at last the subject came around to the thing that makes the traditional mare go. The woman, still dazed at the Aladdin-like power that could transmute small economies into a fairy world of blue ocean billowing into blue sky, took her turn at the conversation by voicing civilization's oldest platitude:

"Money talks, doesn't it?" "It sure does, though my money only knows two words-'Good bye." And the woman has brought it home as one of her good little stories.

The Church Fair. The suburban woman and her seventeen-year-old son, George, went to the church fair. The fair, like most church fairs, was costing the woman a great deal of money. It was a nce on this and a chance on that. A few articles she bought outright. Since she was well known and her husband's salary was also a matter of town gossip, all her friends who had charge of booths insisted upon her

uying and buying.
All this continual handing out money too much for George's compre-hension. He couldn't seem to understand the cause of it all. Finally, when his mother was free for a few moments, he looked at her seriously and asked, "Mamma, do we have to pay to get out?"—Chicago Journal.

do you think? Little Richard is be-

ginning to talk. Her Husband-Good luck to him! It's more than I've been able to do in this house. How did he ever get the chance?

### Growth of the Telephone.

If the telephone calls that were put In last year in the United States alone had been scattered evenly about the earth, every person in every country would have been seven times to the phone-every one of India's troubled millions, of China's and of Africa's. and of the almost countless others in every other land. The wires used in the United States would span the distance of the moon 100 times-would circle the earth 1,000. The army and navy of the United States together number about the same as the employees of the Bell telephone system.

### Tramps.

The age of the average tramp before the war was fifty years. Now it's thirty-two. And the 1922 model tramp rides on auto trucks instead of freight trains. This information is from the report of a New York welfare association with a name as long as Barnum's Cardiff giant. The association is seeking a way to reduce the number of tramps. Quickest way is to give them the Jobs they seek. Second, and im-possible, is to kill the wanderlust that exists in every human, a psychoan-alytic complex, reaction from the duli grind of civilization.
