NORTHWESTERN BELL TELEPHONE COMPANY

OFFICE OF PRESIDENT

TO THE TELEPHONE USERS OF THIS COMMUNITY:

I would like everyone to know why it has been necessary to make the adjustments in telephone rates throughout Nebraska, which are effective July 1st.

Our rates in Nebraska have not been adequate for many years to earn a fair return on the money invested in our business. We believe that you do not want this to go on indefinitely, because it would not be in the interests of continued adequate and reliable service.

Only by being fair to telephone users, to our employees and to those who have their money invested in the business can we continue to operate our property satisfactorily. The public demands good service, our employees should be fairly paid, and existing investors must be satisfied with their investment or additional money cannot be attracted to the business for growth to meet your needs and the needs of other people who from time to time will want more telephone service.

In determining the rate changes which would be necessary, we have considered the different kinds of service furnished, the use made of each class and its value to the user, and made adjustments that we feel will be fair to each patron.

The new rates that have been placed in effect are the lowest that we believe it is possible to charge and yet pay our expenses, such as taxes, wages, materials and the like, keep our property in constant good condition, and pay such a return on the value of the property as is absolutely essential at this time.

I am making this statement because it has been my experience from a great many years in the telephone business that telephone users will always willingly cooperate with us if they have the facts.

Yours very truly,

W. F. Bell
President
