Natural Gas Means A GREATER OMAHA

Cheap Fuel Will Bring New Industries—Will Increase Output of Present Industries—Will Give More Jobs to Omaha Workmen

Natural Gas is the answer to Omaha's fifty year appeal for cheap fuel so that our city can compete with neighboring cities in the industrial world, so that our city can employ more people and thereby increase its population and become a larger and greater Omaha.

Natural Gas reduces fuel costs. It will give our present industries a chance to expand. It will enable our present factories to cut down their production costs. This means more employment and greater prosperity for Omaha.

It is admitted that a few men may have to readjust themselves to new employment, but that has always been and always will be the march of progress. Men who worked in buggy factories twenty years ago are now doing something else.

Natural gas was the most important cause for increasing small towns in Indiana from only a few hundred persons to cities of more than 10,000 and 50,000. Likewise, natural gas will undoubtedly bring enameling factories, lead smelters, steel factories and other industries to this city. E. A. Benson, pioneer Omaha real estate man, said that he attended meetings twenty-five years ago to arrange methods to give cheap fuel to Omaha that our city could compete with other cities. Natural gas is the answer to the meetings for cheap fuel.

NATURAL GAS FACTS

- 1 Natural Gas will cut your gas bills at least 30 per cent and save Omaha gas users \$500,000 a year.
- 2 Natural Gas is the cleanest and most efficient fuel ever produced. It does not dirty kitchen utensils.
- 3 The bond issue for \$1,500,000 which the people must approve on September 25 in order to get natural gas WILL NOT INCREASE TAXES ONE SINGLE PENNY FOR ANYBODY. The purpose of this bond is to build a few large mains to carry the larger quantities of gas that will be used when natural gas comes.
- 4 Natural Gas will furnish Omaha industries a cheap fuel. Cheap fuel will give Omaha a chance to expand industrially, meaning more employment.
- 5 Omahans are assured of proper pressure and supply, because the pipe line will be the largest ever laid and the field is ample for all future needs.

BEWARE!

Stories of natural gas that happened from five to twenty years ago are being spread in order to keep natural gas out of Omaha. Experience has practically entirely overcome these causes of complaint.
