

*Naturally*

# More Employment with Natural Gas!

To build a really Greater Omaha, the people of Omaha should vote for Natural Gas, because this cheap fuel will permit our industries to expand. Increasing our industries means putting more men to work in Omaha; it means more jobs.

*The growth of a city depends upon its advantages* over its neighboring cities. Omaha's neighboring and competing cities have Natural Gas and cheap fuel. That is why many industries have decided to locate in those cities instead of coming to Omaha. If Omaha gets Natural Gas, industries will be induced to come to Omaha.

Omaha industries have pleaded for cheap fuel for fifty years. They have known that the lack of cheap fuel has kept many industries out of Omaha. Hold out your hands to new industries; help this city be progressive. *Vote for Natural Gas.*

The change from manufactured gas to natural gas will be *absolutely without expense to domestic users.* Stoves will be adjusted by the Utilities District without charge, and the adjustment will require only from five to ten minutes. The present pipe lines into houses will not be disturbed. Any statements to the contrary are false.

The bonds of \$1,500,000, which you must approve to get Natural Gas in Omaha, are for new central "high pressure" mains. These are necessary because more gas will be used. **The Bonds will NOT increase taxes.** Interest and principal will be paid with earnings from the sale of gas, just as all water and gas bonds are now paid.

*Permanent, even pressure is guaranteed.* It is known by actual tests and measurements that the present gas fields will supply all the territory for at least 50 years. Beware of many false statements being made against Natural Gas. Many of these false statements are being made by those with selfish intent.

**VOTE  
YES   
SEPT. 25**

## FOR A GREATER OMAHA

CITIZENS NATURAL GAS COMMITTEE

W. F. BAXTER, Chairman  
Interested in Low Cost Gas and A Greater Omaha

### Keep These Jobs In Omaha

"Unless Omaha gets lower fuel costs, we may move some of our departments to Kansas City. I am very much in favor of Natural Gas."

C. A. CUSHMAN  
Manager, Omaha Plant of Swift & Co.

### Most Important Opportunity

"I think the introducing of Natural Gas is the most important opportunity for the development of Omaha since the coming of the Union Pacific railroad to this city."

C. T. KOUNTZE  
Chairman of the Board of First National Bank of Omaha.

### A Clean Fuel

"This is Omaha's chance to get a clean fuel for cooking and heating, and yet save money each year. By all means we should vote YES."

KARL KEHM  
Paving Contractor Secretary, Fontenelle Improvement Club

### Fifty-Year Appeal

"For fifty years Chamber of Commerce meetings have been held to get cheap fuel for Omaha. This is our chance to get it and build a Greater Omaha."

C. B. STUHT  
Realtor

### More Factories Here

"Omaha will get new industries, more factories, and Omaha will have more jobs if we vote for Natural Gas."

BRUCE J. NEWLON  
President, Miller Park Improvement Club.
