Not an English Buildow

The Irish rebuke is seldom bitter or priggish, but it generally finds its wark, and one, which the London Star records is not an exception

A snobbish young Englishman, accompanied by a small dog, recently got into a street car and sat down opposite an Irishman. The latter was immediately attracted by the animal, and after some advances, which were haughtly received by the master, asked outright what kind of a dog it was.

"It is a cross between an ape and an Irishman." was the loud-volced reply.

"Faith, thin, we're both related to th' baste," retorted the Irishman, cheerfully.

Willing to Learn. There was nothing to be seen except the traditional cloud-the size of a man's hand. Yet the captain made haste to shorten sall. Soon the storm burst in all its fury.

When the sky was once more bright and the captain was at leisure one of the passengers approached him reverentially.

"Excuse me, captain," he said, "but how did you know it was coming? I'm connected with the weather burean try. and I wish you'd give me some points -New York Times.

A Heart Story.

Folsom, S. D.-In these days when so many sudden deaths are reported from Heart Failure and various forms of Heart Disease, it will be good news to many to learn that there is a never failing remedy for every form of Heart Trouble.

Mrs. H. D. Hyde, of this place, was troubled for years with a pain in her heart which distressed her a great She had tried many remedies, dent but had not succeeded in finding anything that would help her until at last she began a treatment of Dodd's Kidney Pills and this very soon relieved her and she has not had a single pain or any distress in the region of the heart since. She says: "I cannot say too much in praise of Dodd's Kidney They are the greatest heart Pills. medicine I have ever used. I was troubled for over three years with a severe pain in my heart, which entirely disappeared after a short treatment of Dodd's Kidney Pills."

Tribes Dying Out.

The census of 1901 reveals that the Australian aboriginal is dying out. In 1778, the year of settlement, Governor Phillip estimated the native population at 1,000,000. To-day it numbers only 47,000. The aboriginal is extinct in Tasmania, almost so in Victoria, and in New South Wales he numbers less than 4,000.

WAR WILL NOT INVOLVE UNCLE SAM.

By W. H. Moody, Szcretary of the Navy. We are on friendly terms with both nations engaged in the war in the East and are attached to each by a bond of peculiar sympathy. The one nation endeared herself to the hearts of the American people by an expression of good will in the days of our sore trial. Toward the other we occupy almost the position of a foster mother. because it was our navy that broke through the door of her Eastern exclu-

siveness and let in the flood of sunlight of modern civilization. We have de-W. H. MOODY. clared our neutrality in this struggle. and we shall maintain it. We have no interest except that the war may end speedily; we have no concern except that it may not bring into the struggle any of the other nations which are now content. Under no circumstances that I can conceive is there danger to the peace of our own coun

Our new navy, which constitutes all of the effective navy of to-day, was begun during the administration of President Arthur and under the direction of his two secretaries of the navy, Hunt and Chandler. It was continued during the two administrations of President Cleveland under the direction of Secretaries Whitney and Herbert. The lamented Whitney once said:

"This country can afford to have, and it cannot afford to lack, a naval force at least so formidable that its dealings with foreign powers will not be influenced at any time nor even be suspected of being influenced by a consciousness of weakness on the sea." And again: "It is of little service to a nation to have any navy at all unless it is a fair expression of the highest scientific resources of its day.

i have not lost hope that the policy of increasing our power upon the sea will be maintained, no matter which party may be in control of the national administration.

MARRYING WITHOUT MONEY.

By Helen Oldfield. Theoretically, at least, most people will agree that to marry solely for worldly gain is a mean and despicable deed. Those who apparently marry for money would no doubt unanimously repel the accusation with indignation, and claim that PRIZE FIGHTS VS. ART. they have but followed the advice which Tennyson's northern larmer gave to his son to "gon wheer the muuny is." Poets and romancers usually portray the mercenary sultor as a villain of the deepest dye, and a popular woman's magazine which recently held a symposium upon the subject of what men most desire in a wife announced triumphantly that of all the men who replied to the query not one mentioned money as a requisite qualification.

None the less there are a few people, middle-aged and prudent persons for the most part, who do not hesitate to aver that it is almost as bad a thing to marry without money. These sage elders have been taught by experience that daily bread is an absolute necessity to life; they have learned that milk and honey, or what stands for them nowadays, are not to be had without money and without price, and they argue that it is quite as selfish to think only of the present, and take no thought of the morrow. careless of others in either case, as it is to prefer the comfort of to-morroy to the passion of to-day. No man has enjoy my tour at all. I am really mortified to think of other had to admit that he had not. the right to ask a woman to marry him unless he can fitly says the New York Times. Then the cherish her; no woman should marry her lover, however first proceeded to tell his wonderful eager he may be, when she knows that he must struggle

tale, which the listener would not be- to keep his own head above water, without the additional burden of her support. What is enough for one is not not changed for the better.

enough for two, romancers to the contrary notwithstand-Mathematics is the one and only exact science, and ng. no possible process of calculation, can the half equal the whole. Love in a cottage may be charming, but it cannot be maintained without the wherewithal to pay the rent.

It is a good biblical doctrine, as well as sound common sense, to undertake nothing without counting the cost. They who trust to the morrow to care for the things of itself are apt, as the saying is, to "get left." It is only in story books that when the hero and heroine fail to make both ends met they inherit a fortune or some long lost relative turns up in the nick of time. In real life such luck is so rare as to be regarded as phenomenal.

HOW TO ENCOURAGE TEMPERANCE.

By Carroll D. Wright, Commissioner of Labor.

The question of intemperance is one which is largely in the hands of employers of labor. When the employer understands and announces that he can hire a man with a clear head for the same compensation for which he can get one with a muddled brain the temperance movement is subjected to a force not known by any other method. It may well be called the dynamics of the temperance movement and began on the railroads a generation ago, first

duty should not be employed. It was soon seen that this meant nothing whatever, and so the next movement was to prohibit the employment of men who were habitual drinkers even in slight degree.

This movement has spread over the country. The public is interested as much as the railroads themselves. The safety of travel and the avoidance of disaster concerns the whole people, and thus the economic value of the prohibition has been felt in every direction. It now extends to private and corporate concerns which desire to run their establishments with as little friction and as little loss as possible. The common and statutory laws which make employers liable in some degree and under certain circumstances for the carelessness of their employes are a most powerful incentive to the employment of men with clear heads. Thus economically again the movement acquires

strength.

By Adelina Parti. America is indeed a strange place, and Americans are strange people. Once I thought the country was the place for art, but I see now that artists should never go there. The continent is so different. There art is understood by all and art is at home. Here art knocks at the door like a stranger and the public rebuffs it like a beggar.

Americans like prize fights and such things. They will spend their money to see brutality, but when art is the thing the purse strings are pulled. In Philadelphia a prize tight brought out the entire populace, while my engagement was canceled. Once I thought the day would never come when the Americans would rather see a prize fight than hear me sing. I thought I understood them and that they loved me, but it is so different now. In fact, as I see America with my eyes opened I find it a most undesirable place. There is little here to commend and a great many things to deplore. I did not how I have been subjected to the prevalent vulgarity of Americans.

I do not like America as well as I did in former years. The country has changed so much, and, really, it has

Oulck Work. At one time Bishop Williams, of Marquette, was university preacher a

Cornell for a few weeks, and durin that time he not only gave fine se mons, but provided his triends at the university with many good stories, One he brought from Winnipeg,

where he had been attending the synod of the Canadian church. He had seen there a missionary b'shop who had come a long journey, traveling for six weeks, most of the time by canoe.

This missionary had brought mes sages and excuses from a brother bishop who was prevented from coming to the synod because "his diocese had gone to the dogs."

He proceeded to explain that the brother bishop was laboring among the Eskimos, north of Hudson Bay. He had built them a church with whale ribs for rafters, covered with tany of walrus hide.

"It held eighty persons," said the missionary bishop, "and served its purpose well until in a bad time the dogs grew famished and devoured the church!"

A Hopeful Prospect.

The St. Louis Mirror has this story of a beloved president of an Eastern college. One beautiful day the president was strolling over the campus with his wife. They were admiring the buildings, some of which had been

erected by wealthy alumai. Presently they came to a noble hall, built of stone, and occupying a commanding site. Over the main entrance was a marble tablet, which announced that the hall had been erected by

"John C. Blank, as a Memorial to His Beloved Wife." The president stood for a moment and looked at the immuning pile. Then

he heaved a sigh that might have held some envy. "Ah," said he, "that is what I should

like to do for my college!" He cannot unders' ad why his wi should have looked to herrified.

same purpose the next month.

"There was a worn place in the floor that needed patching and I thought I'd show my wife what a carpenter I was, so I sawed a square section of the planks out. But I cut my hand the first minute and had to send for the Chinaman, who has a shop right around the corner. When he got to the door he grunted something that sounded like it might mean Where? and I pointed to the square hole in a dark corner.

"'Wow,' he said as he squinted at It a minute. Then he turned around and walked out. I thought-well, I didn't know what to think, I was so amazed. I couldn't understand his giving up such a simple job. I was still puzzling over it half an hour later when I heard a knock. He said 'wow,' or some other word like it and held up a square board. Then he walked over to the dark corner of the room and-what do you think? He put the square in and it fitted just as if it had grown there. And he had just taken a peep at the hole from where he was standing in the door."

The flat dweller's tale is no fairy story. That's the way a Chinese carpenter stops a hole in the floor.

HAS A SAY.

The School Principal Tulks About Food. The Principal of a High School in a Courishing California city says:

"For 23 years I worked in the school with only short summer vacations, I formed the habit of eating rapidly, masticated poorly, which coupled with my sedentary work led to indigestion, liver trouble, lame back and rheumatism.

"Upon consulting physicians some doped me with drugs, while others prescribed dieting and sometimes I got temporary relief, other times not. For 12 years I struggled along with this handleap to my work, seldom laid up, but often a burden to myself with inmeness and rheumatic pains.

"Two years ago I met an old friend, s physician who noticed at once my out-of-health condition and who prescribed for me an exclusive diet of Grape-Nuts, milk and fruit.

"I followed his instructions and in two months I felt like a new man with no more headaches, rheumatism or liver trouble and from that time to this Grape-Nuts has been my main food for morning and evening meals. am stronger and h althier than I have been for years without a trace of the old troubles.

"Judging from my present vigorous physical and mental state, I tell my people Methuselah may yet have to take second place among the old men. for I feel like I will live a gr at many more years.

"To all this remarkable change in health I am indebted to my wise friend and Grape-Nuts and I hope the Postum Co, will continue to manufacture this life and health giving food for several centuries vet wetil I move to a world where in 'l s isn is unknown." Name given by Postum Co., Battle Creek,

English Canon Calls the Old Testament

a Pack of Lies. Canon Henson, one of the chief dignitaries of Westminster Abbey and a select preacher of Oxford and Cam-

ATTACKS THE BIBLE.

bridge Universities, England, has raised a storm of criticism by the publication of an article wherein he attacks the inspiration of the Old Testament, referring to its "incredible, puerile or demoral-

izing narratives," key, H. H. H. NSON. which are regarded as being "a pack of lies too gross for toleration." He declares that inspiration is not allowed to certify to the truth of any statement in the Bible "which cannot be substantiated at the bar of reason and evidence." In the New Testament he finds little to offend reason or conscience, "but, whether much or little, it will have to go the way of the Old Testament prodigles." In an analysis of the present social

condition, Canon Henson attributes the spread of anarchy, the "ulcer that is eating the vitals of society," to the disappearance over large areas of civilized life of "the religious basis of morality." Yet he finds an excuse for these "nonmoral multitudes" who "from the cradle to the grave have faced the severe pressure of competition, the squalor and poverty and the miserable exigencies of unmerited want," and who "inevitably compare their condition with the ostentation of unearned wealth, the profusion and unchecked luxury and the insolence of unchastened power."

The canon says that when it is remembered that these "cruel, shocking contrasts are no longer regarded with the dull stare of fatalistic ignorance, kind of vegetable and fruit that grows but in the full light of those doctrines of equality which are the commonplaces of democratic politics," it is no wonder that "the minds of thousands are predisposed toward the sophistries

of anarchy." "It would be idle to deny." he concludes, "that the credit of the Scriptures is seriously shaken in the public mind, nor can it reasonably be doubted that the tendencies of popular life as at present prevailing are in the main hostile to Christian tradition."

A BOYS' COOKING CLASS.

Thirty-two stalwart young men. some over six feet high, have formed themselves into a cooking class, which is probably the only institution of its kind in the world.

All of the boys belong to the Orange, N. J., high school, and the cooking class meets after school hours. Inquiries have come from England concerning it, and similar classes are to be started there. The class has been in existence over a year, and the pupils are athletic young fellows who have no idea of taking the places of cooks, but who want to shine at sum-mer camps, where the gentier sex is are clamoring for admission.

Good, plain, old-fashioned fare is and and the dishes are made no wouldn't be in it.

CRUISER AGAINST A FLEET.

The battle of Chemulpo, Korea, in which the Russian cruiser Variag and the gunboat Korietz faced an over-powering Japanese fleet, furnishes one of the most gallant conflicts against odds in the history of naval warfare.

On the morning of Feb. 9 Rear Admiral Uriu, commanding the Japanese fleet at the entrance to Chemulpo, notified the Russians that they must surrender or leave the harbor at noon. If this demand were not complied with, the Japanese admiral stated that he would enter the harbor and sink the Russian vessels where they lay. The Russian commander faced the situation manfully. The Variag was only a protected cruiser of 6,000 tons, while the Korietz was of only 1,213 tons displacement, yet he steamed boldly out of the harbor, the Russian bands playing the national anthem, to meet the Japanese fleet, which consisted of two battleships, six cruisers, seven torpedo boats and five torpedo boat destroyers.

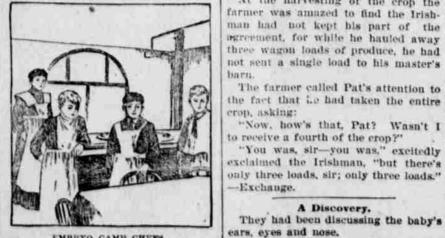

The fight which followed was furious, the fire of the Japanese fleet being concentrated on the Variag. The ship was riddled until she looked like a sieve and there was not a gun aboard which could be successfully worked. When the ship was on fire, two of her boilers destroyed, her engines barely workable and 169 officers and men lying dead or dying on the decks the vessel, accompanied by the Korietz, returned to the harbor, where the Russians, after the dead and injured and living were removed, sunk the vessels rather than let them fall into the hands of the Japanese. The iliustration shows the sunken cruiser in the distance, while in the foreground the neutral ships are picking up the survivors.
