A bright young man was engaged in a desultory conversation with a prominent financier of a most economical disposition, when the great man suddenly invited attention to the suit of clothes he was then wearing. "I have never believed," said he, "in paying fancy prices for cut-to-measure garments. Now. here's a suit for which I paid fifteen dollars and fifty cents. Appearances are very deceptive. If I told you I purchased it for fifty dollars, you'd probably believe that to be the truth." 'I would if you told me by telephone,' replied the young man.

The biggest tacks are used to denote the location of detachments of rural guards. There are 5,000 of these soldiers and 6,400 of Uncle Sam's troops, apportioned in force to the size and importance of the 335 garrisoned cities and towns stretching across the length and breadth of the island, which is about 700 miles long and averaging sixty miles in width, with a total population of less than 2,000,000

The fact that peace prevails in the presence of 11,400 troops would seem to make the question of the size of the heads of the brass tacks fade into insignificance.

The roster of the army of Cuban pacification, as the blue, red and yellow headed tacks are officially called. shows that it consists of 4.000 infantry, 1,000 marines and 1,000 cavalry respectively.

Of course, a glance at the brassheaded map in the Governor's room tells him it is pacified, but not everybody in Cuba has such a map, and it is General Bell's business to keep them informed of the fact that there is no room on the island for trouble.

COOKING BY ALARM CLOCK.

St. Louis Housekeeper Makes a Dis-

A housekeeper of this city has a great idea. As everybody knows, different kinds of victuals require different times for cooking, and one of the bothers of a housekeeper's life is to remember when she puts on the different things and when they ought to come off. This woman has an alarm clock, and after she puts on dinner she sets her alarm for twenty minutes later, and when it goes off it tells her the rice is done.

She takes off the rice, winds up her alarm and sets it for twenty-five minutes, when it announces that the peas are ready. The process is repeated and rules?" demanded the doctor. "Just fifteen minutes later the alarm clock tells her and the neighbors that the turkey ought to come out of the oven. As housekeepers like to have everything done at once and the whole meal fresh from the stove, it also suggests when to put on as well as to take off doctor, "what can I do for you?" "I things, so as to have all ready at the

Some of her friends insinuate that It would be easier to remember to put on and take off her victuals at the proper time than to spend half an hour a day winding up an alarm clock, but she says that after setting her appar-Spain was unable in 400 years to atus she can run upstairs and make pacify Cuba, says the New York Her- up a bed or go out to the fence and talk ald. "But it really won't hurt you at all, ou know." "But I'm afraid it will."

"It can't. I'd have one pulled in a minute if it ached." "I don't believe it."

"Well, then, I'll have one pulled out just to show you that it doesn't hurt." He took a seat, leaned back and opened his mouth and the dentist seemed to be selecting a tooth to seize with his forceps when the girl protested. "Hold on! The test is sufficient. He
