HONEST MEDICINE

FOR STOMACH TROUBLE.

Genvincing Evidence Supported by Guarantee That Must Cenvince The Most Skeptical.

Dr. Williams' Pink Pills are a doctor's prescription, used by an eminent precitioner, and for nearly a generation known as a reliable household remedy throughout the United States. Needto say, no advertised medicine could retain popular favor for so long a period without having great merit and it is the invaluable curative properties of the pills that have made them a standard remedy in every civilized country in the world. dded to this is the absolute guarantee that the pills contain no harmful drug, spiate, narcotic or stimulant. A recent evidence of their efficacy is found in the statement of Mrs. N. B. Whitley, of Boxley, Ark., who says:

"I had suffered for a good many years from stomach trouble. For a long time I was subject to had spells of faintness and lack of breath accompanied by an

I was subject to bad spells of faintness and lack of breath accompanied by an indescribable feeling that seemed to start in my stomach. Whenever I was a little run-down or over-tired, these spells would come on. They occurred frequently but did not last very long.

"I was confined to my bed for ten weeks one time and the doctor promounced my trouble chronic inflammation of the stomach and bowels. Since hounced my trouble chrome innamina-tion of the stomach and bowels. Since that time I have been subject to the fainting spells and at other times to flut-tering of the heart and a feeling as though I was smothering. My general health was very had and I was weak and

embling.
"I had seen Dr. Williams' Pink Pills mentioned in the newspapers and de-cided to try them. When I began taking the pills I was so run-down in strength that I could hardly do any housework. Now I could walk ten miles if necessary. Both my husband and myself think Dr. Williams' Pink Pills the best med.cino made and we always recommend the pills to our friends."

Dr. Williams' Pink Pills actually make new blood and give strength and tone to every part of the body. They have cured serious disorders of the blood and cured serious disorders of the blood and nerves, such as rheumatism, sciatica, anæmia, nervousness, headaches, partial paralysis, locomotor ataxis, St. Vitus' dance and many forms of weakness in either sex. They are sold by all druggists or will be seut, postpaid, on receipt of price, 50 cents per box, six boxes for \$2.50, by the Dr. Williams Medicine Company, Schenectady, N. Y.

The Garden in Spring.

The first thing to do with a garden

olot is to plow it, and harrow the land

until it is as fine on the surface as it

can possibly be made. If the work is

to be done with a horse the longer the

rows the better. Use only plump and

sound seed, procured from reliable

seedsmen and use too much seed rather

than too little, as it is easier to thin

out the surplus plants than to replant

the vacant places. Use only well-rot-

ted manure, and work it well into the

soil. If fertilizer is used, let it be

broadcasted and barrowed in. The sav-

ing of labor will largely depend upon

watching the weeds. If the wheel hoe

or wheel cultivator is used just as the

weeds are appearing above ground the

top soil will always be kept fine and

loose, and fewer weeds will appear

after each cultivation. Cultivated in

that manner, an ordinary garden can

be worked in an hour or two: but if

the weeds are allowed to grow until

they are several inches high they will

injure the garden plants and increase

the labor fourfold. That is the main

point-to cultivate as soon as the weeds

germinate. Do not put in the seeds too

soon while the ground is cold, as they

may fall to germinate. When the ap-

ple trees are in bloom is the best time

for planting the garden crops, us the

ground will then be in excellent condi-

tion, warm, and the danger from frost

past. Vegetables and small fruits cost

less than corn, wheat and oats in pro-

portion to area occupied and the labor

VENTILATED PLATFORM.

days about the source of drinking water. Wooden curbing, absolutely no ventilation in many cases and poor and such a visit naturally results in a solls for the purification of water have fight with the legitimate owner. The brought about the change. A farmer who believes that plenty of pure air out of the nests and squabs trampled in the well will aid much in the purity and killed. Good stock is the secret of of the water gave us the following success, and the same care goes hand in plan: The frame for the support of hand with it. the platform is made of 2 by 4's, allowing a space of four to six Inches be tween the top and bottom parts of the sides. This space is covered on the inside with two screens. The first is a large mesh, to keep out large vermin. Over this is a fly screen, to keep out dirt, insects, etc. The well never be- in the form of a parallelogram, 2x80 comes foul. In winter the platform is covered with straw and snow.-lowa turns, thus requiring much less time Homestead.

Grazing Land. The grazing of land by a mixed stock of cattle, sheep and horses result in the land being more easily grazed than when only one kind is kept. Where, however, many sheep are kept with posed on the man who is plowing or cattle, the sheep pick out the finest of the grass and clovers, and the cattle do not thrive as well. But sheep, on the other hand, eat with avidity and impunity much that cattle dislike and avoid. Many pastures, grazed only with cattle, are often in the springtime covered with weeds, which a few sheep mixed in with the cattle would keep down. Horses, when kept in a pasture by themselves, are very uneven grazers. A few kept in a large cattle spring, insects are more numerous the pasture will graze the rank places where cattle have previously left their manure, and also about places where the land has been trampled. Both horses and sheep will thrive much better when they are able to select their lng of the ground just below the surown foods.

Continued Use of Silnge. The argument is occasionally made that the continued use of silage has a deleterious effect upon the constitution of the animal. The ground taken is that the acids affect the digestive functions and in time impair the bodily vigor and productive capacity. To my knowledge no such claims have ever been substantiated, and the average feeder need have no fears in this regard.-Professor F. W. Taylor, New Hampshire.

Ration for a Horse.

It is claimed that 2 per cent of the borse's weight of good, nourishing food is all it should eat in a day. By the rule a horse weighing 1,500 pounds should receive 30 pounds of food, it must be considered that someth depends upon the amount of labor formed, as well as the digestive pacity and appetite of the animal.

Charred Corn for Fowls. Corn burnt on the cob and the r

When a man buys a dress shirt nowadays he can depend on the bosom being absolutely spotless, since, owing to a new device that has been thought of. the shirt is protected from the touch of solled fingers that so often were wont to leave their mark on the fair

This new style of protection consists of an envelope of transparent paper that is large enough to hold the shirt, keep it absolutely clean, and yet enabling one to see the size numbers through it. Without adding much to the cost, the envelope is a great economy to the dealers and makers, since with its use there is never any cause for the return of shirts to the factory that bave been solled in the handling as there is in the case of collars an

The Early Pasturage.

green rye the results are not always

satisfactory, and farmers find that the

eattle lose flesh and less milk is given.

Rye is one of the most useful plants

for providing early green food at a sea-

son when grass does not appear, but

its injurious effects upon animals is

not due to the rye being an unsuitable

food, but rather because of allowing

the animals free access to it. In its ear-

ly stages of growth (which are really

the times when it is most in demand)

it is composed almost wholly of water,

the proportion of solid matter being

very small. It contains several salts

in solution, and its effects upon the

bowels are laxative: bence it is not

only weakening, but causes the ahimals

to lose flesh. There is a right way to

use early rye, however, and that is to

allow stock on the rye field but a short

time each day at first, and then gradu-

ally extend the period of grazing. When

cattle have been kept on dry food for

six months the green rye is to them a

luxury, and if it is allowed them judi-

clously it will improve their condition.

Both rve and crimson clover will be

ready for use in a short time, and they

will always prove profitable crops to

those who keep stock, as they shorten

the dry-feeding period of winter. When

the early green foods are given the

stock, and the bowels are affected, one

of the indications is that the green

food is serving as medicine, and should

too much green food have been con-

sumed, give a warm mess of corn meal

seasoned highly with salt, and a full

allowance of hay. There is no danger

in green food, however, if the cows are

not allowed to consume too much, but,

as every farmer knows, there is liabili-

ty of "bloat" (hoven) by eating any

Profit in Squabs.

year our squabs have averaged us a

fraction over sixty cents a pair. Now

with an average, as he places it, of

six pairs a year, we have a return of

\$3.60. The cost of breeding can be

brought inside of ninety cents a pair,

if bought in large quantities. It would be well to allow 50 cents a pair for

labor and supplies, as grit, charcoal,

tobacco stems, etc., although the ma-

nure will, we think, offset this if sold

to the best advantage. Although some

of the large profit stories in the squab

inexperienced breeder should get a

profit of \$2.00 a year from each pair,

provided he starts with well-mated.

pure Homer stock. The one great se-

cret of success is to have only mated

birds. The amount of damage one un-

mated bird can do in a loft really

scems incredulous. Such a bird in

sceking a mate will visit each nest,

damage may be imagined-eggs rolled

Hard to Plow.

Labor can be saved in plowing, and

the work well done by properly laying

off the plot. A square acre, plowed

with a 15-inch furrow, requires 84

rounds and 336 turns. The same area,

rods, requires only 13 rounds and 52

to do the work. The same rule ap-

plies to cultivation. The longer the

rows the less time required, as there

will be fewer turnings at the ends of

the rows. It is the turning of the plow

or cultivator that causes loss of time,

to say nothing of the extra work im-

Spring Fronts. Early and late frosts are disliked by

farmers, but such frosts do more harm

to insects than the severe cold of win-

ter, as they catch many of them out of

the ground or just below the surface.

It has been noticed that when the win-

ters are severely cold and the ground

remains frozen until well into the

following summer than when the win-

ters are mild. It is the alternate freez-

ing and thawing that does the camage

to insects, especially when there is a

warm rain, followed by a sudden freez-

Blood Gets Sonr. At this time of year, says a wellknown authority, the Kidneys become weak, clogged and inactive, failing to filter out the poisons and acids, which sour the blood, causing not only facial and bodlly eruptions, but the worst forms of Rheumstism, Nervous and Stomach troubles, Backache and painful, annoying Urinary afflictions.

It is worth any one's time now to get from some good prescription pharmacy the following ingredients: Fluid Extract Dandellon, one-half ounce; Compound Kargon, one ounce; Compound Syrup Sarsaparilla, three ounces. Mix by shaking well in a bottle and take in teaspoonful doses after your meals and at bedtime.

This simple home-made mixture will force the Kidneys to normal, healthy action, so they will filter and strain all aric acid and poisonous waste matter from the blood, and expel this in the urine, at the same time restoring the "full blood count"-that is, 95 per cent. red blood corpuscies—which is abso-lutely indispensable to perfect health.

A witness was being examined as to the sanity of one of the inmates of the asylum. "You hold that this inmate is insane, do you?" a lawyer asked. "I do," was the firm response. "Why are you so sure?" "The man," the witness said, "goes about asserting that he is Santa Claus." "And," said the lawyer, "you hold, do you, that when a man goes about asserting that he is Santa Claus it's a clear proof of his insanity?" "I do." "Why?" "Because," said the witness, in a loud, indignant voice, "I happen to be Santa Claus my-

\$100 Reward, \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure is all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

Women Avoid Operations

When a woman suffering from female trouble is told that an oper-ation is necessary, it, of course, frightens her.

The very thought of the hospital, the operating table and the knife strikes terror to her heart. It is quite true that these troub-

les may reach a stage where an operation is the only resource, but a great many women have been cured by Lydia E. Pinkham's Vegetable Compound after an operation has been decided upon as the only cure. The strongest and most grateful statements possible to make come fro

Lydia E. Pinkham's Vegetable Compound

made from native roots and herbs, have escaped serious operations, as evidenced by Miss Rose Moore scase, of 307 W. 26th St., N.Y. She writes:—

Dear Mrs. Pinkham:—"Lydia E. Pinkham's Vegetable Compound has cured me of the very worst form of female trouble and I wish to express to you my deepest gratitude. I suffered intensely for two years so that I was unable to attend to my duties and was a burden to my family. I doctored and doctored with only temporary relief and constantly objecting to an operation which I was advised to undergo. I decided to try Lydia E. Pinkham's Vegetable Compound; it cured me of the terrible trouble and I am now in better health than I have been for many years."

This and other such cases should encourage every woman to try Ly-
