MRS. C. E. FINK

HEALTH OF WOMEN

In this nineteenth century to keep up with the march of progress every power of woman is strained to its utmost, and the tax upon her physical system is far greater than ever.

In the good old-fashioned days of our grandmothers few drugs were used in medicines. They relied upon roots and herbs to cure weaknesses and disease, and their knowledge of roots and herbs was far greater than that of women today.

It was in this study of roots and herbs that Lydia E. Pinkham, of Lynn, Mass., discovered and gave to the women of the world a remedy more potent and efficacious than any combination of drugs.

Lydia E. Pinkham's Vegetable Compound

is an honest, tried and true remedy of unquestionable therapeutic value.

This medicine made from native roots and herbs contains no narcotics or other harmful drugs and today holds the record for the largest number of actual cures of female diseases of any medicine the world has ever known, and thousands of voluntary testimonials are on file in the laboratory at Lynn, Mass., which testify to its wonderful value.

Mrs. C. E. Fink, of Carnegie, Pa., writes:—Dear Mrs. Pinkham:— "I wish every suffering woman would take Lydia E. Pinkham's Vegetable Compound and write to you for advice. It has done me a world of good and what it has accomplished for me I know it will do for others."

When women are troubled with Irregularities, Displacements, Ulceration, Inflammation, Backache, Nervous Prostration, they should remember there is one tried and true remedy, Lydia E. Pinkham's Vegetable Compound.

Mrs. Pinkham's Standing Invitation to Women

Women suffering from any form of female weakness are invited to write Mrs. Pinkham, at Lynn, Mass. Out of her vast volume of experience she probably has the very knowledge that will help your case.

FARMS WESTERN CANADA FREE

New Wheat Lands IN THE Canadian West

5000 additional miles of railway this year have opened up a largely increased territory to the progressive farmers of Western Canada, and the Government of the Dominion continues to give 160 Acres Free to Every Settler.

The Country Has No Superior

Coal, wood and water in abundance; churches and schools convenient; markets easy of access; taxes low; climate the best in the northern temperate zone. Law and order prevails everywhere.

For advice and information address the Superintendent of Immigration, Ottawa, Canada, or the authorized Canadian Government Agent, W. D. Scott, Superintendent of Immigration, Ottawa, Canada, or E. T. Holmes, 316 Jackson St., St. Paul, Minn., and J. M. MacLachlan, Box 116, Watertown, So. Dakota Authorized Government Agents.

Please say where you saw this advertisement.

FREE To convince any woman that Paxtine Antiseptic will improve her health and do all we claim for it. We will send her absolutely free a large trial box of Paxtine with book of instructions and genuine testimonials. Send your name and address on a postal card.

PAXTINE cleanses and heals mucous membrane affections, such as nasal catarrh, pelvic catarrh and inflammation caused by feminine ills; sore eyes, sore throat and mouth, by direct local treatment. Its curative power over these troubles is extraordinary and gives immediate relief. Thousands of women are using and recommending it every day. 50 cents at druggists or by mail. Remember, however, IT COSTS YOU NOTHING TO TRY IT. THE R. PAXTON CO., Boston, Mass.

SICK HEADACHE

CARTER'S LITTLE LIVER PILLS.

Positively cured by these Little Pills.

They also relieve Distress from Dyspepsia, Indigestion and Too Hearty Eating. A perfect remedy for Dizziness, Nausea, Drowsiness, Bad Taste in the Mouth, Coated Tongue, Pain in the Side, TORPID LIVER. They regulate the Bowels. Purely Vegetable.

SMALL PILL. SMALL DOSE. SMALL PRICE.

CARTER'S LITTLE LIVER PILLS.

Genuine Must Bear Fac-Simile Signature

Brent Good

REFUSE SUBSTITUTES.

Expressed His Opinion—Once.

"Dr. Besom is once more among us for a brief spell," wrote the chronicler of Northby's social and religious life. "He says and does exactly as he thinks right, without regard to the opinion or belief of others.

"His wife is not with him."—Argonaut.

United States Senator-elect George S. Nixon of Nevada, now many times a millionaire, was a telegraph operator twenty-six years ago.

A Lazy Liver

May be only a tired liver, or a starved liver. It would be a stupid as well as savage thing to beat a weary or starved man because he lagged in his work. So in treating the lagging, torpid liver it is a great mistake to lash it with strong drastic drugs. A torpid liver is but an indication of an ill-nourished, enfeebled body whose organs are weary with over work. Start with the stomach and allied organs of digestion and nutrition. Put them in working order and see how quickly your liver will become active. Dr. Pierce's Golden Medical Discovery has made many marvelous cures of "liver trouble" by its wonderful control of the organs of digestion and nutrition. It restores the normal activity of the stomach, increases the secretions of the blood-making glands, cleanses the system from poisonous accumulations, and so relieves the liver of the burdens imposed upon it by the defection of other organs.

If you have bitter or bad taste in the morning, poor or variable appetite, coated tongue, foul breath, constipated or irregular bowels, feel weak, easily tired, despondent, frequent headaches, pain or distress in "small of back," gnawing or distressed feeling in stomach, perhaps nausea, "all-gone" or "risings" in throat after eating, and kindred symptoms of weak stomach and torpid liver, no medicine will relieve you more promptly or cure you more thoroughly than Doctor Pierce's Golden Medical Discovery. Perhaps only a part of the above symptoms will be present at one time and yet point to torpid liver or biliousness and weak stomach. Avoid all hot bread and biscuits, griddle cakes and other indigestible food and take the "Golden Medical Discovery" regularly and stick to its use until you are vigorous and strong.

The "Discovery" is non-secret, non-alcoholic, is a glyceric extract of native medicinal roots with a full list of its ingredients printed on each bottle-wrapper and attested under oath. Its ingredients are endorsed and extolled by the most eminent medical writers of the age and are recommended to cure the diseases for which it is advised.

Don't accept a substitute of unknown composition for this non-secret MEDICINE OF KNOWN COMPOSITION.

Help the Horse

No article is more useful about the stable than Mica Axle Grease. Put a little on the spindles before you "hook up"—it will help the horse, and bring the load home quicker.

MICA AXLE GREASE

wears well—better than any other grease. Coats the axle with a hard, smooth surface of powdered mica which reduces friction. Ask the dealer for Mica Axle-Grease.

STANDARD OIL COMPANY Incorporated

A Paris burglar, in trying to escape from a shop, fell into a barrel of lard, in which he sank up to the neck.

Take Garfield Tea in the Spring—it will save you many days of headache, lassitude and general ill health! This natural laxative purifies the blood, cleanses the system and establishes a normal action of liver, kidneys and bowels. It is made wholly of Herbs.

The total income of all American farmers last year was about $5,500,000,000.

State of Ohio, City of Toledo, Lucas County, ss.:

Frank J. Cheney makes oath that he is senior partner of the firm of F. J. Cheney & Co., doing business in the City of Toledo, County and State aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of Hall's Catarrh Cure.

Hall's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces of the system. Send for testimonials, free. F. J. CHENEY & CO., Toledo, O.

Sold by all Druggists, 75c.

Take Hall's Family Pills for constipation.

To Be Strong.

The following rules issued by the New York board of health for the guidance of consumptives might very well be followed as nearly as possible by all:

Never sleep or stay in a close room.

When indoors remain in the sunniest and best ventilated room—one, if possible, which has no carpet.

Have at least one window open in your bedroom.

Have a room to yourself when possible, and at any rate have your own bed.

Go to bed early and sleep at least eight hours.

Avoid draughts, dampness, dust and smoke.

Keep your feet warm and dry.

Don't wear a chest protector.

If you have to work, take every chance to rest that you can.

Avoid eating when mentally or bodily tired, or when in a state of nervous excitement.

Eat plenty of good and wholesome food.

An Effective Riddle.

On one occasion when he was busy President Lincoln received a delegation of men who were endeavoring to hurry the passing of some petty bill. When they entered Lincoln looked up gravely, and said:

"If you call the tail of a sheep a leg, how many legs will the sheep have?"

"Five," said the spokesman.

"No," replied Lincoln, "it would only have four. Calling the tail a leg wouldn't make it one."

The delegation departed in discomfiture.—Sunday Magazine.

The young man who understands that he must leave at 10 o'clock is forewarned in time.

Blood Gets Sour.

At this time of year, says a well-known authority, the Kidneys become weak, clogged and inactive, failing to filter out the poisons and acids, which sour the blood, causing not only facial and bodily eruptions, but the worst forms of Rheumatism, Nervous and Stomach troubles, Backache and painful, annoying Urinary afflictions.

It is worth any one's time now to get from some good prescription pharmacy the following ingredients: Fluid Extract Dandelion, one-half ounce; Compound Kargon, one ounce; Compound Syrup Sarsaparilla, three ounces. Mix by shaking well in a bottle and take in teaspoonful doses after your meals and at bedtime.

This simple home-made mixture will force the Kidneys to normal, healthy action, so they will filter and strain all uric acid and poisonous waste matter from the blood, and expel this in the urine, at the same time restoring the "full blood count"—that is, 95 per cent red blood corpuscles—which is absolutely indispensable to perfect health

FARM AND GARDEN

Scarcity of Help Abroad.

Chinese coolies are being imported into Germany as farm laborers. The labor situation, says the Industrial Intelligence, is scarcely any better than in the farm districts. On all sides the manufacturing and mining interests are complaining that owing to the scarcity of labor they cannot keep up with their orders. Farmers complain that they are not able to save their crops for lack of farm labor.

A New Muskmelon.

An account is given in a California publication of a new variety of muskmelon, having a hard shell, not unlike that of the Hubbard squash, but less than one-quarter in thickness, of good quality and especially promising as a winter melon. The melon contains practically no seed cavity, the seeds being embedded in the pulp. The flesh is light yellowish green in color, without fiber, and of an unusually good flavor. It is thought it will be of especial value as a late fall melon long after the casabas are gone, coming into the market about Christmas time, and it is believed that its firm shell will permit of its being shipped all over the United States. The melon has not yet been named.

Canada's Cheese Trade.

Canada's export cheese trade last year was nearly ten times as great as that of the United States, the figures being $24,000,000 and $2,700,000. However, the trade of the United States showed a large increase over 1905, when it was only $870,000. At a recent meeting of Canadian dairymen it was urged that they keep up the high quality of their product in order to retain their trade. It was said that a few years ago the export trade of the United States in cheese was greater that that of Canada, but that the Americans lost their trade by making export cheese from skimmed milk. Now there is a disposition on the part of the Americans to improve the quality of their cheese, and in this they are being assisted by the dairy division of the Department of Agriculture. The result is that we are regaining our trade, and the Canadians realize that they must maintain a high quality to hold theirs. Rivalry of this kind will prove beneficial to both countries.

Heavy Seed Grows Best.

Experiments by the United States Department of Agriculture to test the comparative results of using large or heavy seed, and small and light seed, resulted very much in favor of the heavy seed, and demonstrated that the difference was greater as the plants approached maturity. Thus peas from the larger seed began to blossom four days earlier than those from small seed, produced marketable peas four days earlier, and the main crop five to six days earlier. Vines grew ranker, pods were much larger, and there were peas in much greater proportion from larger seed than on the smaller. Beans showed a similar result, both as to size and earliness, and with several other crops tested the growth of the plant was much better from the larger seed, exceeding the small as three to two. The seed was all from the same stock, grown in the same piece and planted in sand in the greenhouse under identical conditions, as far as could be given.

The Plum Curculio.

The plum curculio is an enemy not only to the fruit of the plum tree, but also to that of the cherry, peach, apple, pear and quince. The beetle of this insect is of a dark-brown color, variegated with spots of white, yellow and black, and is less than one-fourth of an inch in length. It has a short, curved snout; when disturbed, it can bend up under its breast, and, with legs drawn together, it may be mistaken for a knot, or a wart of a limb, or dried bud. When the female is about to deposit her eggs she makes a minute cut in the fruit with her jaws, then, thrusting her snout into the cut, enlarges it sufficiently for the reception of the egg; turning around, she drops an egg into the opening, which she afterwards thrusts to the bottom of the cut with her snout. Each female can deposit from five to ten eggs a day. The egg in time produces a "grub," which causes the fruit to fall while immature. When it has completed its larval life, it leaves the fruit and burrows into the ground, where it remains for about three weeks and then emerges in the beetle form.

Garden Cultivation.

After the ground is plowed and harrowed the work required in the garden crops, in proportion to the value of products derived, has been greatly lessened, for the former slow and laborious work of the hoe is now quickly performed by the wheel hoe, as mentioned above, with which one man can perform the work formerly done by six or seven men with hoes, while the seed drill opens the rows, plants the seeds, covers them and marks the next row at a speed equal to a slow walk. It is now easier to plant an acre with seed than to perform the work on one-tenth that area with the old methods. Then there are hand cultivators and weeders which assist. Some of the combined implements are made in such a manner as to be quickly converted into a seed drill, wheel hoe, cultivator, rake or weeder, as required. There are also horse hoes, adapted to garden work, while the hand tools, such as hoes, etc., have been greatly improved. It may be safely asserted that with these advantages within reach of the farmer there are a great many who have not adopted them, and who do not give the garden much attention, continuing to live on the plainest fare, while they could easily supply themselves with all the food luxuries that can be produced on the farms in their section.

Foods for Stock.

To feed live stock intelligently does not require a farmer to be a scientist, yet he should endeavor to familiarize himself with some of the terms used to classify the different qualities of food for stock. Farmers do not appreciate such expressions as "albuminoids," "carbo-hydrates," etc. Yet, after all, the modes of expression are simple, and embody nearly all the constitutional elements that enter into foods grown upon the farm for stock feeding. Some foods are fat producing, such as corn, while others promote the development of muscle, bone and nerves, such as clover. All foods are classified under appropriate heads, each ranking in proportion to its nitrogen, carbon and mineral ash. Thus, in order to arrange together those foods that are nitrogenous or muscle producing, the term "albuminoids" is employed, because the nitrogen is nearly always in combination in the form of albumen. The "carbo-hydrates," or heat-producing substances, are those rich in starch and sugar, and starch and sugar contain a large proportion of carbon, as well as oxygen and hydrogen (water). The term applied illustrates the value of the food as well as its composition. The base of all nitrogenous foods is protein. When it is known that certain foods contain fibrin, gelatin, albumen or casein, which are found in all animal and vegetable organisms, the fact that nitrogen is present is made plain, because that element is necessary in such substances, and when it is understood that foods contain starch, gum, sugar and oils, it is apparent that they must also of necessity contain carbon.

Feeding Steers.

Using three lots of eleven steers each the efficiency of various combinations of corn and other feeds, such as corn stover, oat straw and clover hay, commonly available on Indiana farms, was studied by the Indiana station.

On ear corn and clover hay the average daily gain per steer in the 180 days of the test was 2.08 pounds. On ear corn, shredded corn stover, oat straw and a little linseed meal, the gain was 1.78 pounds per head per day, and on a similar ration without linseed meal the gain was 1.30 pounds, the cost of a pound of gain in the three cases being 6.59, 7.79 and 8.46 cents. The smallest gain ration, 17.59 pounds, was fed to the lot receiving ear corn, shredded stover and oat straw, and the largest ration, 20.45 pounds to the lot given the linseed meal. The last-mentioned lot received the smallest amount of coarse fodder, 8.32 pounds.

Pigs sufficient in number to gather the undigested feed, followed the steers and produced 2.10 pounds of pork per bushel of corn on the clover-hay ration, 1.08 pounds on the ration containing linseed meal, and 1.78 pounds on the ear corn, shredded stover and oat straw ration.

Some of the conclusions drawn were in effect as follows: The ear corn, shredded stover and oat straw ration was neither efficient, economical nor profitable. The addition of a nitrogenous feeding stuff, either in the form of a concentrated food or coarse fodder, added to the efficiency of the ration and the profit of the feeder. The concentrated feeds tested, namely, clover hay and linseed meal, both proved satisfactory. The steers fed the ration containing linseed meal were as well finished as those receiving the clover-hay ration, although they made smaller gains.

The Value of Manure.

The preservation of manure is one of the sources of profit in farming. The value of manure depends upon the manner in which it is preserved and the quality of matter from which it is created. No two manure heaps are alike in composition, nor are the results from manure uniform, as many suppose. Farmers may not always be in position to control the quality of the feed they allow, but, whether it be good or bad, it is important that all manure be carefully preserved in order that it may benefit the farmer and enrich the soil. On nearly all farms the manure and litter are thrown in a heap in the barnyard, the cornstalks and straw being added to increase the bulk, and to assist in absorbing the liquid and volatile substances. It is a well-known fact that no manure can supply plant food until it undergoes a change and returns to its primitive element. In assuming its first form the original substances combine, creating salts and volatile matter. In the soil the salts decompose and the volatile matter is either absorbed, lost or assists in creating salts. As the manure must undergo these changes in the barnyard, the energy of the materials in assuming new forms is made manifest by the presence of heat, which implies decomposition, but the decomposition is not only the tearing asunder of the atoms, but the creation of new substances therefrom. In the crude condition such materials as cornstalks and straw are of no value until decomposed, as they are insoluble in water. All plant foods must become soluble to be available. The object in heaping the materials, or spreading them in the barnyard to be tramped, is to have them become fine and thoroughly disintegrated. Nature, through chemical agencies, by the interchange of atoms, performs her work in much better manner than can be done artificially, and the process of decay is the farmer's method of rendering the materials in the manure heap fine, soluble and ready for use as plant foods.

BABY IN TERRIBLE STATE.

Awful Humor Eating Away Face—Body a Mass of Sores—Cuticura Cures in Two Weeks.

"My little daughter broke out all over her body with a humor, and we used everything recommended, but without results. I called in three doctors, but she continued to grow worse. Her body was a mass of sores, and her little face was being eaten away. Her ears looked as if they would drop off. Neighbors advised me to get Cuticura Soap and Cuticura Ointment, and before I had used half of the cake of Cuticura Soap and box of Cuticura Ointment the sores had all healed, and my little one's face and body were as clear as a new-born babe's. I would not be without it again if it cost five dollars, instead of seventy-five cents. Mrs. George J. Steese, 701 Coburn street, Akron, Ohio, Aug. 30, 1905."

Faith with Works.

Everywhere over the dwellings of the natives of the great central plateau of Bolivia is the grass cross. Charles M. Pepper, the author of "Panama to Patagonia," states that he rarely found a hut without this symbolism.

The cross, he was told, was blessed by the priest, and then it kept out the rain, which at times is very heavy. One old man, whose undoubted orthodoxy was, at least, without a crust of superstition, was asked if the crosses really did keep out the rain.

"Yes, if the roof is a good one," he gravely replied.

Economy.

"What's the matter with that man?" asked the dealer, after the customer had gone out. "He got mad when I tried to sell him a Christmas tree."

"That's Uppem," said one of his neighbors. "He's rich and proud, but stingy. He hangs all his Christmas presents on his family tree."—Chicago Tribune.

True politeness consists in treating others just as you love to be treated yourself.—Chesterfield.

Bacteria as Engineers.

Improbable as it may seem, states a scientist in the government employ, it appears to be a fact that bacteria are able to cause the breaking down of stone walls.

Recent investigations have shown that nitrifying bacteria swarm in the mud forced by the disintegration of cement in reservoirs, and it is believed that the decay of the cement results from the action of nitrous acid produced by the bacteria. Yet these same microscopic engineers, whose myriads undermine solid walls of masonry, are nevertheless of immense use to man, because they are chief agents in the purification of water.—Philadelphia Record.

Peter I. of Servia is credited with being the most intellectual monarch that country ever had.

IN WESTERN CANADA.

Delicate in the Old Home; Better Health in the New.

Churchbridge, Sask., December 1, 1906.

To the Editor—Dear Sir:

I came to this country from the State of Wisconsin three years ago, and must say that I am greatly pleased with the outlook in this Western country. For my own part I am entirely satisfied with the progress I have made since coming here. I have raised excellent crops of grain of all varieties. Last season my wheat averaged 23 bushels of wheat to the acre, oats 60 and barley 40.

We had a splendid garden this year, ripening successfully tomatoes, musk melons, water melons, sweet corn, and kindred sorts.

The country is well adapted to wheat growing and mixed farming, and to my mind it is the best country under the sun for a man with a family and small means, as it is possible for a man to commence farming operations with much less capital than is required in the older settled countries.

The climate is all that could be desired, being very healthy and invigorating.

My wife came out about six months ago, and although inclined to be delicate in the old home, she has enjoyed the best of health since coming here.

In short, I am more than satisfied with the land of my adoption, and I am also satisfied with the laws of the country.

Yours very truly,

(Signed.) JOHN LANGDON.

Not the Right Kind.

Professed politicians who have reduced public office to an exact science find the independent voter a sad stumbling-block—a fact which is amusingly disclosed by a story found in the recent life of the late George Monro Grant, the eminent Canadian educator and clergyman.

Toward the end of Sir John Macdonald's life he and Principal Grant, then the head of Queen's College, met at dinner at the house of the premier's brother-in-law, Prof. Williamson.

"How I wish," the premier said to the principal, "that you would be a steady friend of mine."

"My dear Sir John," the principal replied, "I have always supported you when you were right."

The premier's eyes twinkled, and he laid his hand upon the shoulder of the principal.

"My dear man," said he, 'I have no use for that species of friendship!"

"THE MARRYING SQUIRE."

Justice Geo. E. Law, of Brazil, Ind., Has Married 1400 Couples.

Justice Geo. E. Law, of Brazil, Ind., has fairly earned the title "The Marrying Squire," by which he is known far and wide, having already married some 1400 couples. Ten years ago he was deputy County Treasurer. "At that time," said Justice Law, "I was suffering from an annoying kidney trouble. My back ached my rest was broken at night, and the passages of the kidney secretions were too frequent and contained sediment. Three boxes of Doan's Kidney Pills cured me in 1897, and for the past nine years I have been free from kidney complaint and backache."

Sold by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

Left-Handed Compliment.

Serial of One Million Words.

An advertiser in a London paper says he has immediate use for a "sensational serial," which must consist of about 1,000,000 words. The longest novel, so far, is said to be George Eliot's "Middlemarch," which contains nearly 329,000 words.

EVEN IF DISCOURAGED

TRY DR. WILLIAMS' PINK PILLS FOR YOUR RHEUMATISM.

The Pills Have Cured the Disease in Almost Every Form and Even in Advanced Stages.

Rheumatism is a painful inflammation of the muscles or of the coverings of the joints and is sometimes accompanied by swelling. The pain is sharp and shooting and does not confine itself to any one part of the body, but after settling in one joint or muscle for a time, leaves it and passes on to another. The most dangerous tendency of the disease is to attack the heart. External applications may give relief from pain for a time but the disease cannot be cured until the blood is purified. Dr. Williams' Pink Pills are the best medicine for this purpose as their action is directly on the blood, making it rich, red and healthy. When the blood is pure there can be no rheumatism.

Mrs. Ellen A. Russell, of South Goff St., Auburn, Me., says: "I had been sick for fifteen years from impure blood, brought on by overwork. My heart was weak and my hands colorless. I was troubled with indigestion and vomiting spells, which came on every few months. I had no appetite and used to have awful fainting spells, falling down when at my work. I frequently felt numb all over. My head ached continuously for five years.

"About two years ago I began to feel rheumatism in my joints, which became so lame I could hardly walk. My joints were swollen and pained me terribly.

"Dr. Williams' Pink Pills were recommended to me by a friend, after I had failed to get well from the doctor's treatment. When I began taking the pills, the rheumatism was at its worst. I had taken only a few boxes, when the headaches stopped and not long afterward I felt the pain in my joints becoming less and less, until there was none at all. The stiffness was gone and I have never had any return of the rheumatism."

Dr. Williams' Pink Pills have cured such diseases as nervous and general debility, indigestion, nervous headache, neuralgia and even partial paralysis and locomotor ataxia. As a tonic for the blood and nerves they are unequalled.

A pamphlet on "Diseases of the Blood" and a copy of our diet book will be sent free on request to anyone interested.

Dr. Williams' Pink Pills are sold by all druggists, or sent, postpaid, on receipt of price, 50 cents per box, six boxes for $2.50, by the Dr. Williams Medicine Company, Schenectady, N. Y.
