### Hard or Soft Coal,

Coke or wood, whatever fuel you use, costs money. You have to pay so much for it, whether you get all the heat out of it or not. If a stove wastes the fuel and only a part of the heat is extracted, your fuel bills are higher than they should be. It is therefore profitable for you to get a stove that will get all the heat out of the fuel and not waste it.

The "Genuine" Round Oak and the 'Radiant Home" are the stoves that will do it; even the smoke they send out of the chimney is clear, showing that the gases and soot have been burned and all the heat extracted. The comfort of a stove that is everything it ought to be; that gives heat; holds the fire; that lasts and is always good and efficient, is worth almost any cost.

The Round Oak and Radian Home are such stoves and are a source of comfort in thousands of homes, and they will prove the same in yours. There are imitations, be sure and see the names of "Round Oak" and "Radiant Home."
