

Is it a Catarrh Remedy, or a Tonic, Invention or is it Both?

Some people call Peruna a great tonic. Others refer to Peruna as a great catarrh remedy.

Which of these people are right? Is it more proper to call Peruna a catarrh remedy than to call it a tonic?

Our reply is, that Peruna is both a tonic and a catarrh remedy. Indeed, there can be no effectual catarrh remedy that is not also a tonic.

In order to thoroughly relieve any case of catarrh, a remedy must not only have a specific action on the mucous membranes affected by the catarrh, but it must have a general tonic action on the nervous system.

Catarrh, even in persons who are otherwise strong, is & weakened condition of some mucous membrane. There must be something to strengthen the circulation, to give tone to the arteries, and to raise the vital forces.

Perhaps no vegetable remedy in the world has attracted so much attention from medical writers as HYDRASTIS CANADENSIS. The wonderful efficacy of this herb has been recognized many years, and is growing in its hold upon the medical profession. When joined with CUBEES and COPAIBA a trio of medical agents is formed in Peruna which constitutes a specific remedy for catarrh that in the present state of medical progress cannot be improved upon. This action, reinforced by such renowned tonics as COLLIN-SONIA CANADENSIS, CORYDALIS FORMOSA and CEDRON SEED, ought to make this compound an ideal remedy for catarrh in all its stages and locations in the body.

From a theoretical standpoint, therefore, Peruna is beyond criticism. The use of Peruna, confirms this opinion. Numberless testimonials from every quarter of the earth furnish ample evidence that this judgment is not over enthusiastic. When practical experience confirms a well-grounded theory the result is a truth that cannot be shaken.

cried. "Here's a man who makes a business of taking new tables and says. High hee's are put on to stage "Why, Edward, listen to this!" she chairs and treating them in some way so they look as if they were a hundred years old.

"Does he indeed?" said Mr. Munro. "Well," I'd trust our Tommy to make a new table look as if it were a good deal more than a hundred years old, but I hadn't thought of it as a paying business."

Importance of Thoroughness.

Thoroughness in workmanship, care in the execution of every task undertaken, as if it were the acceptance of form and order; and to the perform a trust which it would be a breach of faith not to discharge well, is a forn! of duty so momentous that if it were to die out from the feeling and practice of a people all reforms of institutions would be helpless to create national prosperity and national happiness.-George Ellot.

Gas polsoning from gas engines has become so common that German authorities urge that cylinders of oxygen be kept near, and that engineers be taught to apply inhalations to resusci-

tate victims. Experiment has shown that an electrie are can be employed under water for fusing metal. The intense heat

turns the water surrounding the are tions of the medical profession as to into steam, thus forming an insulating the increasing difficulty physiciaus cushion of vapor. It has been suggesthave to "make both ends meet," but li ed that with proper apparatus the electhe figures recently printed in the Brit tric are could be employed by divers ish Medical Journal regarding the for quickly cutting through large chain struggle of the average physician in cables or iron plates under water. this country to earn anything like a

The "axle-light" system is in use on the trains of the Atchison, Topeka and Santa Fe railroad on an extensive scale. Each car has its own storage batteries supplied with electricity generated by the axles of the wheels, and the locomotive headlights derive their illumination from the same source. It is estimated that each full train, ex-

clusive of the locomotive, develops nearly 500 candle-power light. Within the past few years the cuca-

lyptus has been introduced in Florida. and its kindly growth there is believed to indicate that it might be extensively cultivated in the southern parts of that State. The eucalyptus is of very rapid growth, but it cannot withstand frosts.

It was planted in California from Australla many years ago, and now flourishes so abundantly on the Pocific coast that its wood is extensively employed for fuel, posts and lumber. The production of oxygen and hydro-

gen on an industrial scale by the decomposition of water with electrolytic apparatus in Germany has led to the suggestion that hydrogen thus produced may find a wide field of employment as a lighting agent. It is now used for inflating military balloons. For lighting purposes it is compressed in steel cylinders. With a proper burner it is said to be a cheaper illuminant ther acetylene, the relative cost for equal illuminating power being 25 for hydro-

gen to 50 for acetylene. Everybody who has used a microscope has no doubt regretted the difficulty of seeing small insects, and other living objects not of mere microscopic dimensions, magnified while allve and

moving freely in the field of view. A recently invented English Instrument, called the vitascope, is said to supply a desideratum in this respect. It is shaped like a telescope, a foot long when closed, and an inch and a half in diameter. The lenses are so combined that an object 20 inches away may be magnified 12 diameters. At a

distance of 5 inches the magnification Is 60 diameters.

COMPLAINTS ABOUT PAINT.

The time to complain about paint is before the painter applies it. The man who puts up the money should not shirk the responsibility of choosing the paint. True, the painter ought to know paint better than the banker, the professional man or the merchant. The trouble is, the house owner too often deliberately bars the competent and honest painter from the job by accepting a bid which he ought to know would make an honest job impossible. Secure your bids on the basis of National Lead Company's pure White Lead and pure Linseed Oll and see that you get these materials. No one need be fooled by adulter-

ated white lead. A blowpipe testing outfit will be mailed to any one Interested in paint.

Address, National Lead Company, Woodbridge Building, New York City.

Lord Kelvin's Romance.

There was an element of romance in | Pinkham: the late Lord Kelvin's second marriage. It was at the Canary Islands that the great scientist met his brideto-be, and her interest in scientific pursults drew them together. The scientist went to great length to unfold a new system of signaling, and as he said good-by to the lady on the bridge of his yacht on leaving he looked at her and smillingly said : "Do you think you understand the system now?"

"Oh, yes," replied his lady friend, "I am sure I understand." "Then," said the scientist, "watch the

vessel as it disappears from view and I will flash you a message." The message was, "Will you be my

wife?" The lady's reply the world knows.
