MAJ, GEN. WILSON. strange condition of affairs comes soon One of the Nine Surviving General after the fiscal year that gave us the of the Civil War.

Of the 253 major generals and those of superior rank, upon whom fell the military responsibilities of the field gration was considerably greater than during the course of the Civil War. year. The immigration for May, 1906, there are only nine survivors. Of these Major General James Harrison Wilson, famous cavalry leader and enfirst five months of 1907 it was only gincer officer, is president of the Cavalry Society of the Armies of the Unitures for this year. In contrast with od States.

General Wilson was born in Shawneetown, Ill., in 1837. His grandfather was one of the founders of Hilnois and his father was an ensign in the war of 1812 and a captain in the Black Hawk War. General Wilson was edu-

cated at McKendree College and at the United States Military Academy, from which he graduated in 1860. He was assigned to the corps of topographical engineers and was the chief engineer of the Port Royal expedition. He then served in the Department of the South, and acted as alde-de-camp to General George B. McClellan, being present at the battles of South Mountain and Antletam. Appointed lieutenant colonel in the volunteer staff of the army, in November, 1862, he served as chief engineer and inspector general of the Army of the Tennessee, and was active in the operations around Vicksburg. He became captain of engineers in May, 1863, and brigadier general of volun- change. teers in October of that year and was

ingaged in the operations near Chatinnooga, the battle of Missionary Ridge

MAJOR GENERAL WILSON.

and the relief of Knoxville. Placed in command of the third division of the Cavalry Corps in the Army of the Potomac, he bore a conspicuous part in the operations under General Philip H. Sheridan, including the Richmond raid and the combats near Petersburg. He led his division through the Shenandosh campaign, including the battle of the community in which he lives. It is Opequan, until October, 1864, when he was assigned to the command of the Cavalry Corps of the military division of the Mississippi. Organizing a mounted body of 15,000 men, he contributed largely to the success won in the west by the armies of General Thomas and General Sherman, particularly by his capture of Selma and Montgomery, Ala., and Columbus and Macon, Ga. In 28 days he captured five fortified cities, 23 stands of colors, 288 guns

WEST WANTS MORE CABINET MEMBERS.

tion.

By J. B. Case. There are certain blg things to which I belleve the great trans-Mississippi section is justly entitled, regardless of party or partisan politics. It should have either the President or the Vice President of the United States. The Secretary of the Interior, whose purpose is to deal with the States lying almost wholly west of the Mississippi river, should be a resident there, and thus be practically and personally familiar with the conditions of that sec-

The Secretary of Agriculture, now a resident of Iowa, who has most to do with the country west of the Mississippi river, should continue to be a resident thereof. Then the Secretary of War or the Secretary of the Treasury or the Postmaster General should also be a resident of the trans-Mississippi country. One cabinet officer should be taken from a Southern State.

This, instead of making the President's cabinet largely a group of gentlemen whose homes have been since youth along the Atlantic coast and whose deepest interests are there, would give us in that cabinet practical men with a thorough knowledge of the conditions and necessities of the West and South. Such a cabluet would carry with it the very influence that we need before the national Congress, and would enable us to stand on a level with the rich and powerful East in obtaining these things that make for real prosperity and advancement.

FEDERAL REGULATION NOT NEEDED.

By Ex-Attorney General Harmon. Two excuses are advanced for federal intruslon into State affairs. One is that the States do too little and the other is that some of them do too much in the way of railroad and corporate regulation and other corrective measures. These are not contradictory, as they might at first appear, because there may be both too little and too much public interference with the conduct of business, and both are harmful, though my inherited and acquired ideas both lead me to fear the too much more than I fear the too little.

It is often hard to draw the line between useful regulation and harmful meddling, and harder still to have that line respected when politics unfortunately becomes involved with questions relating to business, and public feeling is aroused. A great many things are none the less home affairs because they may be or become remotely related to commerce among the States, the regulation of which is granted exclusively to Congress. If the federal authority should be extended over all of these the States would soon become mere regions.

The prefext for such extension of power is that railroads, telegraphs, etc., have brought about the commercial unity of the States. But this is no reason at all. because such commercial unity was the very object in

CHICAGO'S COLISEUM.

Unlucky Building in Which Taft Was Nominated.

view in framing the clause which gives to Congress the exclusive power to regulate commerce among the States; and as the clause accomplishes the purpose intended, why should anybody seek to twist it out of shape by forced construction?

PROBLEM FOR THE BOY'S FATHER.

By John A. Howland. That father who at the present time looks about the prospective fields of specialization in behalf of his young son confronts a situation which is perplexing. Long ago the world Legan to prepare for specializing in human occupations. As the sum of human knowledge grew the fact obtruded that for one man to learn and execute a one man's work to the best advantage he should master a specialty which would be a linking part in a whole structure in which many specialists each had a builder's place.

Whatever that arbitrary subdividing may be, however, it will be accepted as economic law. To-day no farmer within reach of markets would depend upon the old general farming for profit, no matter how his father may have scorned the introduction of the agricultural school twenty years ago. In the same manner the doctor who to-day specializes in diseases of the "eye, car and throat" may live to see the impossibility of his young son's embracing half so much as a profession. Nor can this same specialist say with certainty that in the next twenty-five years such disease groups may not disappear altogether. These are suggestions only. They have a rightful bearing upon the family and community life as subjects for thought.

Our government, which has ex-

and too little to facts. It required great courage to build railroads through an unpeopled country; it required all Hamilton's genius to

devise laws for the encouragement of industries; it required liberal interpretations of our constitution to make our country great, and nothing has been accomplished without abuse and criticism; and yet, as history makes heroes of our forefathers, so will the future give to our capable captains of industry other titles than "robber barons."

names in the early history of the coun-OUR SOLDIERS CAN SHOOT. dents, and even after the old plan was Uncle Sam's Boys Hit an Enemy

They Can Scarcely See. Almost unbellevable are some of the target shooting records of Uncle Sam's riflemen stationed in the Philippines. Most of the practice by the crack companies in the Philippines has been under the Australian skirmish system, which provides a severe test on accuracy.

To understand what shooting under forty years has called dramatic atten- the skirmish system means imagine a melts into the background of dirt of burned grass so that at 600 yards he is almost invisible. In target practice dummy. The riflemen stand on a line 600 yards away from a dirt embankment, when the head and shoulders of the dummy are exposed above the embankment three seconds. The dummy is supposed to be the enemy, and three seconds is figured the length of time it would require the eveny to take aim, fire and dodge out of sight. As soon as the enemy appears the soldiers fire, and continue to fire as long as the enemy is in sight. As soon as the head and shoulders disappear the men start toward the embankment behind which the enemy is concealed as fast as they can run, reloading their guns as they go. When the enemy appears again the men fall to the ground, and fire throughout the three seconds the head and shoulder is exposed as fast as possible. When the enemy disappears the men again leap to their feet and run toward the enemy until he reappears, when they again throw themselves to the ground and fire. In practice the enemy appears every ten seconds.

person to be shunned.

The Ameer of Afghanistan, some of whose subjects have been attacking the British on the frontier of India, has issued a decree that, anyone who preaches a war against the English will have his tongue cut off, and that anyone who leaves Kabul for the purpose of fighting the British will have his feet cut off. That seems-whatever else may be said of it-to be an apt application of the principle of making the punishment fit the crime.

There was no opposition in Congress, and there will be none anywhere, to the pension which has been voted to the widows of the late Maj. James Carroll, Surgeon, U. S. A., and the late acting Assistant Surgeon Jesse W. Lazear, U. A. Both of these men made 8. great contributions to the knowledge of the relation of the mosquito to yellow fever, and both of them demonstrated their confidence in the theory by voluntarily submitting to inoculation with yellow fever. and forfeited their lives by so doing. The annuity of one hundred and twenty-five dollars a month which the widows will receive is certainly not an excessively generous recognition by the nation of the courage and public spirit of these army surgeons.

The Jate King Carlos of Portugal was the only monarch of his time who dewoted himself to scientific research for the good of his people. Becoming deeply impressed with the importance of fisheries to a large number of his subjects, he determined to study the distribution and habits of the different kinds of fish in the Portuguese seas. Beginning in 1896, he spent a part of each succeeding year until his death on his yacht, named Amella, after his queen, personally superintending the work of sounding, dredging, the collection and preservation of specimens. But his services were not confined to the ocean, for he took an active interest in the welfare and pursuits of the agricultural people. "Dressed like one of themselves," says Sir C. R. Markham in the Geographical Journal, "the you are in doubt play trumps. king was well known on the hillsides and in the farmstends." He planned to prepare a complete manual of the birds of Portugal, and published two pastor .-- London Punch. sections on the thrushes and warblers, containing notes on each bird, with his observations on its first appearance and departure, locality and habits, and thirty-nine large colored plates. The results of his oceanographic campaigns are given in six volumes, the title pages of Braganza."

Emigration from this country continnes at an astonishing rate. Departures for the month of May numbered tion of 20,283. Immigration was very graph.

This is cruel, and adds unnecessary weight to the load of suffering the consumptive has to bear. It has led to the barring of health resorts against the subjects of tuberculosis, to the discharge from their positions of wageearners who are affected in the slightest degree, and even to attempts to isolate the tuberculous as if they were lepers and pariahs.

It is time in the name of humanity that something was said on the other

side, and that the public should be told that a consumptive who is cleanly in his habits, and is careful to destroy the expectorated matter by using paper napkins or specially devised cups which can be burned, is in no sense dangerous to his fellows

A properly conducted sanatorium, filled with tuberculous patients, is indeed one of the safest places for a person with a supposed tendency to the disease to reside.

A consumptive should not sleep in the same bed with a well person, especially a child, should refrain from kissing others, should not use towels or eating utensils in common, should not talk while directly facing his companion in close proximity, should hold a handkerchief before his mouth when coughing, and should observe the wellknown rules regarding expectoration. That is all. If he is careful to observe these simple precautions for the sake of his fellows, the public has no reason to shun him.

He can live at home, can mingle with his family, and go into the society of others without the slightest fear of doing them harm. His lot, like that of any sick person, is a hard one, but it should not be made harder by the ignorant and unreasoning fear of those who have infsinterpreted the well-intentioned warnings of physicians.

According to Hoyle.

moted major general of volunteers.

In 1870 he was honorably discharged and engaged in large railroad and engineering operations at home and abroad. In May, 1898, he was commissioned major general in the volunteer service for the Spanish war and commanded the First and Sixth Army Corps in Georgia and Cuba and took part in the Porto Rico campaign. He was with the China Relief Expedition and commanded the co-operating force of American and British troops in the capture of eight Chinese temples. He also commanded the American forces in Peking. When King Edward of England was crowned General Wilson represented the United States Army. He was placed on the retired list in 1901 by special act of Congress as brigadier veneral of the U.S.A.

Too Hard to Pronounce.

A well-dressed man entered a florist's shop in a certain city recently, threw down a dollar and said he wanted some flowers to take home. He was quite unsteady, evidently tapering off a spree, and the flowers were apparently intended as a domestic peace offering. The florist picked out a collection of hyacinths, and the caller started to leave, but at the door hesitated. "I say," he said, thickly, "what's these flowers called?" "Hyacinths," said the florist. The customer shook his head, and, as he walked back to the counter, said : "Gotter have something easier. Gimme a dozen
