The Kaiser's army is served regularly with bread and porridge made largely from the peanut.

DOCTOR'S BEST FORMULA

For Remarkably Quick Action on Colds and Coughs.

This prescription will frequently cure the worst cold in a day's time, and it is a sure cure for any cough that can be cured. "Two ounces Glycerine; half ounce Concentrated Pine; put these into half a pint of good whiskey and use in doses of teaspoonful to a tablespoonful every four hours. Shake bottle well each time." Any druggist has these ingredients in stock or will quickly get them from his wholesale house. The Concentrated Pine is a special pine product and comes only in half ounce vials, each enclosed in an air-tight case; but be sure it is labeled "Concentrated." This formula cured hundreds here last winter.

In Ashantee is a tree which furnishes butter.

PILES CURED IN 6 TO 14 DAYS.

PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded. 50c.

Lake Erie produces more fish to the square mile than any other body of water in the world.

WANTS HER LETTER PUBLISHED

For Benefit of Women who Suffer from Female Ills

Minneapolis, Minn.—"I was a great sufferer from female troubles which caused a weakness and broken down condition of the system. I read so much of what Lydia E. Pinkham's Vegetable Compound had done for other suffering women I felt sure it would help me, and I must say it did help me wonderfully. My pains all left me, I grew stronger, and within three months I was a perfectly well woman.

"I want this letter made public to show the benefit women may derive from Lydia E. Pinkham's Vegetable Compound."—Mrs. JOHN G. MOLDAN, 2115 Second St., North, Minneapolis, Minn.

Thousands of unsolicited and genuine testimonials like the above prove the efficiency of Lydia E. Pinkham's Vegetable Compound, which is made exclusively from roots and herbs.

Women who suffer from those distressing ills peculiar to their sex should not lose sight of these facts or doubt the ability of Lydia E. Pinkham's Vegetable Compound to restore their health.

If you want special advice write to Mrs. Pinkham, at Lynn, Mass. She will treat your letter as strictly confidential. For 20 years she has been helping sick women in this way, free of charge. Don't hesitate—write at once.

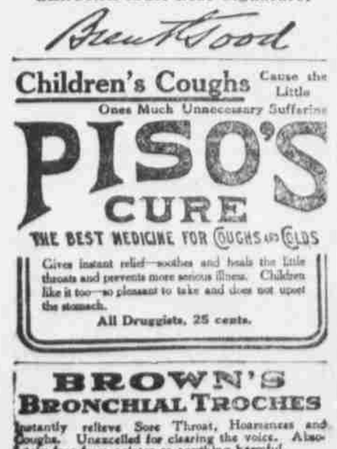
WANTED Reliable, Energetic Men who can devote all or part of time to taking orders for LUBRICATING OILS and GREASES. For particulars address H. W. SWIFT, Cleveland, O

WESTERN CANADA

What J. J. Hill, the Great Railroad Magnate, Says About its Wheat-Producing Power:

"The greatest need of this country [United States] in another generation or two will be the providing of homes for its people and producing sufficient for them. The days of our prominence as a wheat exporting country are gone. Canada is to be the great wheat country."

This great railroad magnate is taking advantage of the situation by extensive railway building to the wheat fields of Western Canada.



Upwards of 125 Million Bushels of Wheat

were harvested in 1909, Average of the three provinces of Alberta, Saskatchewan and Manitoba will be upwards of 23 bushels per acre.

Free homesteads of 160 acres, and additional pre-emptions of 160 acres (at $3 per acre), are to be had in the choicest districts.

Schools convenient, climate excellent, soil the very best, railways close at hand, building lumber cheap, fuel easy to get and reasonable in price, water easily procured; mixed farming a success. Write as to best place for settlement, settlers' rates, descriptive illustrated "Last Best West," sent free on application, and other information, to Sup't of Immigration, Ottawa, Canada, or to the following Canadian Gov't Agents: E. T. Holmes, 315 Jackson St., St. Paul, Minn., and J. M. MacLachlan, Box 116, Watertown, South Dakota. (Use address nearest you.)

Please say where you saw this advertisement.

BROWN'S BRONCHIAL TROCHES

Instantly relieve Sore Throat, Hoarseness and Coughs. Unexcelled for clearing the voice. Absolutely free from opiates or anything harmful. Price, 25 cents, 50 cents and $1.00 per box. Sample sent on request.

JOHN I. BROWN & SON, Boston, Mass.

OPENING UP BRAZIL

Enormously Rich Country to Be Reached by New Water Routes.

Bolivia east of the Andes is one of the richest regions of the world in timber, rubber and minerals and it has some fine agricultural lands. It has no outlet on the Pacific coast. Its only outlet is through the Amazon and Para, and since peace was made with Brazil a railroad activity in this direction has taken possession of the whole republic.

East of Bolivia is the great Brazilian state of Malto Grosso, a territory nearly three times the size of Texas. A dozen large navigable rivers pour northwestward out of this state into the Amazon. Its agricultural, mining and grazing possibilities are very great.

It is said that a great deal of this territory will grow as fine long staple cotton as Mississippi or Alabama. The Brazilian government has matured a plan to connect by canal one of the tributaries of La Plata in this state, thus opening an all-inland water route from Para to Buenos Aires, a distance of nearly 6,000 miles, says the Engineering Magazine. This extensive route would reach the whole interior of the continent.

Turning to the west and northwest, the Amazon is navigable in its chief tributaries in Peru, Ecuador and Colombia to the very walls of the Andes. One may go aboard a steamer at Para and remain aboard until it has plowed its way up to the hill city of Iquitos and several hundred miles beyond. Peru has little Pacific coast trade now and the development of this country must pour its wealth into Para.

But if Brazil and Para had none of these Andean republics to draw trade from, the development of the Brazilian Amazon valley alone must in time amount to untold wealth. In the states of Para and the Amazonas and the federal territory of Acre there are near the water's edge 10,000,000 rubber-bearing trees of the Hevea variety. These trees if properly tapped will live indefinitely and steadily increase their yield. The state of Para is considerably larger than Texas and much of this state will grow excellent cotton.

QUEER STORIES

Pawnshops in Chile are under special regulations of the general government, enforced by local authorities.

Fujiyma, the volcano that appears in all Japanese pictures, is 12,365 feet high and ten thousand pilgrims ascend it every year.

Tracing the criminal by his finger prints was successfully accomplished at Scotland Yards, London, last year in no fewer than 9,440 cases.

According to the Hospital, London, some English physicians are ordering patients to eat oysters that have been well soaked in sea water as a cure for dyspepsia and tuberculosis.

As a weaver, nature is an exceedingly neat worker. Certain tree barks and leaves furnish excellent cloth, such as, for instance, the famous tapa cloth used in the South Sea Islands.

In the vicinity of Concepcion and Talcahuano, Chile, there are more than eighty million cubic meters of soft coal of fair quality within an area of eighty thousand square meters, or about 30.7 square miles. The vein is 3.5 meters, or about 11.5 feet, thick.

Excellent natural pottery is manufactured by nature in the case of a certain cactus. Woodpeckers are apt to excavate nests in the trunk and branches, and, in order that it may protect itself against these incursions, the plant exudes a sticky juice, which hardens, forming a woody lining to the hole made by the birds. Eventually the cactus dies and withers, but the wooden bowl remains.

The congressional library is rendering a great service not only to the other libraries of this country, but to those in Canada, Europe and Australia, by its catalogue division, by its compilation of rules governing cataloguing, by its classification methods, which are being generally imitated, and by its duplicate cards that now go to one thousand libraries of this country. Four million cards have gone during the last year.

In 1801 there were in Europe only twenty-two cities which had more than 100,000 inhabitants. These were London, Dublin, Paris, Marseilles, Lyons, Amsterdam, Berlin, Hamburg, Vienna, Naples, Rome, Milan, Venice, Palermo, Madrid, Barcelona, Lisbon, St. Petersburg, Moscow, Warsaw, Copenhagen and Constantinople. Two only of these cities had more than 500,000—London, 950,000, and Paris, 600,000. Naples came third, with 360,000, and Vienna fourth, with 230,000.

At eighteen Mendelssohn produced "Midsummer Night's Dream"; Meyerbeer, "Jephtha's Daughter"; Schubert, "Erl King"; Bach was court musician at Weimar; Michael Angelo executed his basso-rilievo of the "Battle of the Centaurs"; Da Vinci's work was acknowledged by his master, Verochia, as far surpassing his own; Lope de Vega, the Spanish dramatist, and composed "Arcadia"; Savage produced his first comedy, "Woman's a Riddle," and Shelley wrote "Queen Mab."

An Incendiary Lover.

A blaze was discovered in a Williamsburg letter box and the contents, about fifty letters, were charred before the fire was extinguished. It is the opinion of the police that a young man wrote a proposal of marriage to his girl and then got cold feet and set the boxful of letters on fire to destroy his own. It was George Ade who wrote this caution to young men, "Tell 'em anything you want, but won't write letters."—Boston Globe.

Hard Luck.

Old Lady—Poor man! What have you done to your hand? Unemployable—Broke my knuckles, mum, knockin' at people's doors askin' for work.—London Scraps.

No boy was ever heard to say at the table, "This is my full meal."

TRIALS of the NEEDEMS

Munyon's Paw Paw Pills coax the liver into activity by gentle methods. They do not scour, gripe or weaken. They are a tonic to the stomach, liver and nerves; invigorate instead of weaken. They enrich the blood and enable the stomach to get all the nourishment from food that is put into it. These pills contain no calomel; they are soothing, healing and stimulating. For sale by all druggists in 10c and 25c sizes. If you need medical advice, write Munyon's Doctors. They will advise to the best of their ability absolutely free of Charge. **MUNYON'S, 53d and Jefferson Sts., Philadelphia, Pa.**

Munyon's Cold Remedy cures a cold in one day. Price 25c. Munyon's Rheumatism Remedy relieves in a few hours and cures in a few days. Price 25c.

The Paris motor omnibuses use a mixture of equal parts of alcohol and benzol for fuel. The average consumption is nine centiliters a ton kilometer.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address: F. J. CHENEY & CO., Toledo, O.

Sold by Druggists, 75c.

Take Hall's Family Pills for constipation.

Snakes have no external ears, but "hear" by feeling vibration of sound on their delicate scaly covering.

Only One "BROMO QUININE"

That is LAXATIVE BROMO QUININE. Look for the signature of E. W. GROVE. Used the world over to Cure a Cold in One Day. 25c.

FASHION HINTS

A deep pointed waist line, back and front, is the feature of this dinner gown. The overskirt is gathered on in somewhat generous fullness, and the trimming for the entire gown is the material corded.

It is a very dashing style for a slender figure.

Distinction.

"Col. who? I don't think I ever heard of the man. What is there so remarkable about him?"

"By George, sir, he's got the longest beard in the State of Oklahoma, and that's saying a heap, let me tell you!"

HARD TO DROP,

But Many Drop It.

A young Calif. wife talks about coffee:

"It was hard to drop Mocha and Java and give Postum a trial, but my nerves were so shattered that I was a nervous wreck and of course that means all kinds of ails.

"At first I thought bicycle riding caused it and I gave it up, but my condition remained unchanged. I did not want to acknowledge coffee caused the trouble, for I was very fond of it. At that time a friend came to live with us, and I noticed that after he had been with us a week he would not drink his coffee any more. I asked him the reason. He replied, 'I have not had a headache since I left off drinking coffee, some months ago, till last week, when I began again, here at your table. I don't see how anyone can like coffee, anyway, after drinking Postum!'

"I said nothing, but at once ordered a package of Postum. That was five months ago, and we have drank no coffee since, except on two occasions when we had company, and the result each time was that my husband could not sleep, but lay awake and tossed and talked half the night. We were convinced that coffee caused his suffering, so he returned to Postum, convinced that coffee was an enemy, instead of a friend, and he is troubled no more by insomnia.

"I, myself, have gained 8 pounds in weight, and my nerves have ceased to quiver. It seems so easy now to quit coffee that caused our aches and ails and take up Postum."

Read the little book, "The Road to Wellville," in pkgs. "There's a Reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

FARM AND GARDEN

The American varieties of the plum are hardier than either the Japanese or European kinds.

The old cock and the young hens, or the young cock and the old hens, make a good combination.

Never sprinkle wood ashes on the floor of the chicken-house, as it causes foot trouble. Use fine coal ashes.

Young pigs should have fresh sod thrown in to them occasionally if they are not allowed to run out in a large yard.

Don't forget the calves and yearlings. Don't leave them out in the cold nights until they are pinched and haggard.

It is natural for a hog to root, but if you want to prevent him from doing so a simple ring in the snout will answer the purpose.

Apply manure from dairy stables and henhouses; also wood ashes if you have them. Don't be afraid of getting the garden soil too rich.

Select your squash seeds from among the earliest good squash that matures. If you wait till later, the next year's product will be still later.

Daffodils are perhaps the first choice, with crocus, snowdrops and grape hyacinths for variety, and in shady places lilies of the valley and some others.

The burning of a few strips of zinc in the furnace or cook stove is said to prove effective in moving the soot which has accumulated in the flues and pipes.

Eggs are injured by washing. It gives them a frailer look. Washed eggs will not keep so well, neither will they hatch as well. Wipe off the dirt with a moist woolen rag, but no more.

Have your name on every jar of butter you send out. Also write the weight on the bottom so that it will not rub off. A slip of paper pasted on, with these things written in ink, is best.

One packer is authority for the statement that the cost of picking apples varies from 7 cents per barrel where the trees are low to 20 cents per barrel where the trees are large and limbs high.

When pinworms are noticed to be present in horses, frequent injections of infusions of tobacco, infusions of quassia chips, one-half pound to one gallon of water, followed by a cathartic, are most efficient.

Taming the Heifer.

As the result of considerable trouble with fractious heifers I have worked out the following method of reducing them to gentleness at calving time, says a dairyman. I handle the new-born calf and then carefully approach near enough to the heifer so she can smell the odor of the calf upon my hands. This produces marvelous results, for the young mother fawns upon me almost as affectionately as upon her calf. Having thus won her confidence and will, I can usually break her to milk without trouble.

Electric Lights on Farms.

The introduction of tungsten lamps is doing much to advance the use of electricity on farms. It is possible for the farmer with a small plant, driven either by a gasoline engine or by damming a small stream, to obtain sufficient current to light his house and barn with this economical type of incandescent lamp. The use of electricity on the farm, by the way, is growing and, as pointed out by the Electrical World, farmers will in time come to consider electricity a necessity. Then it will be found profitable to establish central generating stations for farming districts to take the place of the small individual plants now being installed.

Fake Butter.

The Kansas State food inspector has unearthed another "butter dodge." You may have noticed offers of a chemical by the aid of which you can take a half pound of butter and a half pound of water and make a whole pound of solid butter. Mr. Kleinhans got some of the chemical and had his wife try it. To his surprise the product was up to advance notices, and it could hardly be told from an all-pure-butter product. The inspector is now going to keep a sharp lookout for any defrauding that may be attempted along this line, and if you are tempted by any of the alluring advertising and claims for this chemical or preparation, our advice would be—don't.—Mail and Breeze.

Comparison of Grain Rations.

In a recent experiment to determine the relative value of oats as feed for horses, six mature grade Percheron geldings were fed on a basal ration of clover and timothy hay, three receiving oats and the other three corn as a supplemental ration. Estimating the corn to be worth 40 cents per bushel, oats 30 cents per bushel, and hay $8 per ton, it was found that the average cost of food per hour of work was 3.3 cents for the corn-fed horse and 4.54 cents for those fed oats. The use of corn to the exclusion of other grain for a period of forty-eight weeks was found not to be detrimental to the health of work horses, and they endured hard work during the hot weather as well as those receiving oats.

Importance of Grass.

In attempting to farm without grasses the farmer is lifting without a lever. He is pulling his load with the weight on the hind wheels. He is cutting with a dull saw.

First of all, grow more grasses and study how to build up the fertility of the soil so that it will grow larger and better crops of nutritious grasses. You may convert the grass into milk and its products into flesh and into manure for grain crops, or you may sell the hay by the ton, according to the facts of your particular location.

It sounds foolish to hear men talking about farming without grasses and land that can be made to yield at least two tons of well-cured hay to the acre. The greatest thrift that we have seen among the farmers in various parts of the ten leading agricultural states has been on farms of about 100 acres where grass was the basis of their farming and where this grass was fed out to animals that were kept on their farms.

Without grass it is impossible to keep up a rational system of crop rotation and build up the fertility of the soil for future crops. A farmer cannot afford to grow half a ton of grass to the acre any more than he can afford to grow ten bushels of wheat or corn. Such crops will keep him poor forever.—Agricultural Epitomist.

How to Keep Cream.

There is no better way of holding cream from one day to another than to run it over a cooler immediately as it comes from the separator, cooling it thereby to some 50 degrees Fahrenheit.

It will be well to skim the first lot of cream very rich, about 40 per cent fat. Then cool this to a low temperature and hold it cold until the second day. The cream separated on the second day may be somewhat thinner, containing from 25 to 30 per cent fat. This may be run directly into the cold, rich cream of the previous day and the two lots thoroughly mixed.

After the mixture has stood an hour or so it ought to be tested both for fat and acidity. If it has a slow acidity near three-tenths of 1 per cent, a starter may be used. After mixing the starter with the cream ripen it at 65 to 70 degrees until the acidity reaches about five-tenths of 1 per cent.

The cream ought then to be cooled to about 50 degrees and held at this temperature until it is churned.

Sweet cream from clean milk ought to keep without deterioration for twenty-four hours, and if this is mixed with cream fresh from the separator the mixture should stand from six to ten hours, with an occasional stirring so as to ripen uniformly.

If you do not do this the older cream may churn before the fresh cream when they are mixed together, and under such conditions there may be a large loss of butter in the buttermilk.—E. W. Farrington.

Tuberculosis Concealed.

As it is the often long-concealed character of tuberculosis through which it is especially dangerous when it affects animals that are valued, like dairy cows, because an important article of food, like milk, is produced within and is daily drawn from their living bodies for long periods of time this concealed character must be regarded as one of the important facts about the disease, and as too many persons are inclined to take for granted that a dairy herd is free from tuberculosis simply because the cows of which it is made up look and act like healthy animals, it seems desirable to clearly define this concealed character.

Tuberculosis may be acute and progress rapidly from infection to death. But this is very rare. More commonly it is an insidious, slowly progressive, chronic disease, the beginning and early stages of which are rarely recognized. It may attack and remain confined to any one part of the body; it may attack many parts in succession, one after the other, or it may attack several or many parts simultaneously. Its encroachments are so gradual that the body can adjust or adapt itself to the changes the disease causes until they have become very extensive, without giving external evidences of the struggle to do so, and often the disease progresses to nearly its fatal termination in cattle without showing a well-defined symptom or an observable sign of its presence.—Farmers and Drovers' Journal

Folly of Continuous Cropping.

A man near my home worked away for months clearing up a piece of land that had grown up to brush, cutting the green stuff and hauling off the stone, until he had a fine lot nicely brought under cultivation. I saw this field after it was plowed, and it certainly did look fine.

This piece of land the man planted to potatoes, and dug an excellent crop. The owner of the farm told with considerable pride in his voice how many bushels he had taken from the field. "It paid me for all my work—that one first crop."

But where he made a mistake was in putting potatoes on that lot the next season. It seemed as if he must have thought: "Now I have got a thing. I'll make the most of it." For three successive years that farmer kept the field under the harrow, each time planting the same crop—potatoes. The other day I passed that way, and I never saw a more completely demoralized piece of land than that was. The outlook for a crop was dubious indeed. One year more and the white bean limit will have been reached.

Now, if that man had just taken off one, or at most two, crops and then seeded the land down it would have been a good piece of ground for many years. If I ever had a marked example of what continuous cropping will do for a field it was right there. It pays to adopt a good rotation—pays the man who owns the land now and the one who will be its master to-morrow.—Agricultural Epitomist.

Pleasant, Refreshing, Beneficial.

Syrup of Figs and Elixir of Senna appeals to the cultured and the well-informed and the healthy because its component parts are simple and wholesome and because it acts without disturbing the natural functions, as it is wholly free from every objectionable quality or substance. In its production a pleasant and refreshing syrup of the figs of California is united with the laxative and carminative properties of certain plants known to act most beneficially, on the human system, when its gentle cleansing is desired. To get its beneficial effects, always buy the genuine, for sale by all reputable druggists; one size only, price fifty cents a bottle. The name of the company — California Fig Syrup Co.—is always plainly printed upon the front of every package of the genuine.

Despair and Despondency

No one but a woman can tell the story of the suffering, the despair, and the despondency endured by women who carry a daily burden of ill-health and pain because of disorders and derangements of the delicate and important organs that are distinctly feminine. The tortures so bravely endured completely upset the nerves if long continued.

Dr. Pierce's Favorite Prescription is a positive cure for weakness and disease of the feminine organism.

IT MAKES WEAK WOMEN STRONG, SICK WOMEN WELL.

It allays inflammation, heals ulceration and soothes pain. It tones and builds up the nerves. It fits for wifehood and motherhood. Honest medicine dealers sell it, and have nothing to urge upon you as "just as good." It is non-secret, non-alcoholic and has a record of forty years of cures. ASK YOUR NEIGHBORS. They probably know of some of its many cures.

If you want a book that tells all about woman's diseases, and how to cure them at home, send 21 one-cent stamps to Dr. Pierce to pay cost of mailing only, and he will send you a *free* copy of his great thousand-page illustrated Common Sense Medical Adviser—revised, up-to date edition, in paper covers. In handsome cloth-binding, 31 stamps. Address Dr. R. V. Pierce, Buffalo, N. Y.

Mayer Special Merit SCHOOL SHOES

"WEAR LIKE IRON"

They wear best where the wear is hardest. Made of selected leather specially tanned to resist exactly the kind of wear a healthy boy or girl will give them.

Two layers of leather are sewed in at the tip instead of one, to prevent the toes kicking out. The soles are of extreme toughness.

Mayer Special Merit School Shoes

are made to fit a child's foot in a comfortable, natural way that will prevent foot trouble in later years, yet they are stylish and good looking. Only the genuine have the Mayer Trade Mark stamped on the sole.
