## **CONVINCING PROOF**

Lydia E. Pinkham's Vegetable Compound

What is the use of procrastinating in the face of such evidence as the following letters represent? If you are a sick woman or know one who is, what sensible reason have you for not giving Lydia E. Pinkham's Vegetable Compound a trial? For 30 years we have been publishing such testimonial letters as these-thousands of them -they are genuine and honest, too, every one of them. Mrs. George May says:

90

当り

Mrs. S. J. Barber says: I think Lydin E.

is the best mediine in the world for women-and feel it my duty know the good it has done for me. Three years ago I had a tumor which the doctor I said would have

to be removed by an operation or I could not live more than a year, or two, at most. I wrote Mrs. Pinkham, at Lynn, Mass., for advice, and took 14 bottles of Lydia E. Pink-ham's Vegetable Compound, and today the tumor is gone and I am a perfectly well woman. I hope my testimonial will be of benefit to others." - Mrs. S. J. BARBER, Scott,

Mrs. E. F. Hayes says: I was under the

ment for a fibroid tumor. I suffered with pain, soreness, bloating, and could not walk or stand on my feet any length of time. I wrote to Mrs. Pinkham for advice, followed her directions and took Lydia E. Pinkham's Vegetable

Compound. To-day I am a well woman, the tumor was expelled and my whole system strengthened. advise all women who are afflicted with tumors or female troubles to try Lydia E. Pinkham's Vegetable Compound." — Mrs. E. F. HAYES, 1890 Washington St., Boston, Mass.

For 30 years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills. No sick woman does justice to herself who will not try this famous medicine. Made exclusively from roots and herbs, and has thousands of cures to its credit.

Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health free of charge.

Conl Ashes Are Worth Saving. In many sections of the country coat the principal winter fuel used by farmers and a large quantity of ashes result which are usually looked on as waste, but an authority says there is more value in coal ashes than is gederally realized by the farmer. For the feeding his culves. It was suggested imelioration of heavy clay land they particularly so with the ashes of soft coal, as such usually are reduced almost to a dust. Coal ashes have a ertilizer value. This opinion, how ver, is not held generally. The coal eds contain phosphorus, potash, nitrogen and lime, as well as the other less important ingredients. When the original trees out of which were formed the coal beds were reduced to coal the mineral elements remained in them, and consequently those same elements

One reason why people have formed an idea that coal ashes contain no ferility is that the trees now grown have in them less carbon than those in the old days and thus the percentage of other elements to carbon is probably greater now than then, which gives a larger value to our wood ashes, but does not annihilate the value in the coal ashes. Ashes can be used to advantage without sifting, but large quantities of half-burned coal are by ome considered a detriment to the oil.-Rural World.

Dipping Sheep Effectively, To rid sheep of external parasites or the scab mite they should be dipped in ome effective dip. Coal tar dips are effective, nonpoisonous and do not ordinarily injure the wool. They are herefore considered among the best. Before using all dips should be tested. Mix one teaspoonful of dip with fifty to seventy-five of water, according to lirections. Wrap a few ticks or bedogs in a gauze and dip them in this mixture for thirty seconds. Then place them under a tumbler, and if they are not dead in six hours the dip is not strong enough. It should be made strong enough to make a thirtyecond dip effective. Sheep are to be kept in the dip one minute. Place the dip in the tank before the water, so the mixture will be uniform.

The best time to dip is when the vool is one-fourth to one-half inch ong, so that the dip will adhere to the fleece. If the ticks are present at shearing time the whole flock should be dipped at once to prevent the ticks

Heavy Seeds Give Best Plants. To obtain a good stand of grain if you can read that at a distance of It is necessary to use the largest and twelve or fourteen inches without plumpest grain for seed. Small or shrunken grain gives weak plants,

ing and sneezing instantly."

is easier to use than porous plasters, acts quicker and does not clog up the pores of the skin. It is an excellent an tiseptic remedy for asthma, bronchitis, and all inflammatory diseases of the throat and chest; will break up the deadly membrane in

an attack of croup, and will kill any kind of neuralgia or rheumatic pains. All druggists keep Sloan's Liniment. Prices 25c., 50c., & \$1.00.

Dr. Earl S. Sloan,

DR. Z. E. MATHENY Reom 601, F L & T Bidg., Sinux City, Ic. The Final Test.

"Doctor," asked the patient, whose eves had been undergoing treatment for a period of six months or more "do you think that my eyes are all right now?"

"Yes," said the oculist, "I think I can assure you, Mr. Pinchnickel, that your eyes are cured. But there is one nore test I should like to apply. Ser blinking." Whereupon he laid his bill before

hlm.-Chleago Tribune

BREAK UP THAT COUGH

Origin of White Race. The discussion of the precise locality where the primitive man developed into the white race is by no means settled as yet. The old theory that the Aryan or white race began in Asia is still held by many high authorities, but other authorities equally high maintain that the original "white man's country" was Europe and that from Europe the race spread to other parts of the world. It is safe to say that the last word upon the subject has not yet been spoken. The debate is still open and will probably remain so for a very long time to come .--New York American.

PILES CURED IN 6 TO 14 DAYS. PAZO OINTMENT is guaranteed to cure any case of Itching, Blind, Bleeding or Protruding Piles in 6 to 14 days or money refunded. Soc.

Spider Web as a Styptie.

A spider's web, an old cure for bleeding, is an uncleanly application, as it is generally procured from the most neglected corner in a room and is consequently laden with dust. The earliest reference to this remedy in our language seems to be in a translation of that curious encyclopedic work of the middle ages, "De Proprietaribus Rerum," where we read, "Coppe webbe that is white and clean staunchyth blood." But as I have seen it applied to a cut finger it has been anything but white and clean. There is another reference in Shakespeare's "Midsum mer Night's Dream," when Bottom, the weaver, says to his fairy Cobweb, "I shall desire of you more acquaintance, good master Cobweb; if I cut my finger I shall make bold with you."

As a styptic, however, it must be ao knowledged a spider's web as somewhat effective. In a case of excessive hemorrhage after the extraction of a tooth a dentist applied a cobweb with most satisfactory results.-Hospital.

Chronie. Mrs. Hewligus-Absalom, we are out

of coal. Is your credit at the dealer's PATENTS Wats on E. Colemna, Water Ington, D.C. Rooms Free, High-est references. Best results bad again? Mr. Hewligus-Not "again," Amanda. Still - Chleago Tribune.

No Man is Stronger Than His Stomach A strong man is strong all over. No man can be strong who is suffering from weak stomach with its consequent indigestion, or from some other disease of the stomach and its associated organs, which impairs digestion and nutrition. For when the stomach is weak or diseased there is a loss of the nutrition contained in food, which is the source of all physical strength. When a man "doesn't feel just right," when he doesn't sleep well, has an uncomfortable

feeling in the stomach after eating, is languid, nervous, irritable and despondent, he is losing the nutrition needed to make strength. Such a man should use Dr. Pierce's Golden Medical Discovery, it cures diseases of the stomach and other organs of digestion and nutrition. It enriches the blood, invigorates the liver, strengthens the kidneys, nourishes the nerves, and so GIVES HEALTH AND STRENGTH TO THE WHOLE BODY.

You can't afford to accept a secret nostrum as a substitute for this nor alcoholic medicine or known composition, not even though the urgent dealer may thereby make a little bigger profit. Ingredients printed on wrapper.

go with the ashes.

rom getting to the lambs.

many of which will fall to mature in an unfavorable season. A sudden change in temperature, a prolonged drought or a slight frost is more likely to destroy the weak plants than the strong. The increased yield at harvesting time is quite a consideration. In the illustration the heavy and light amples of barley A B C and D prouced plants as indicated with correpending letters above.

Keeping Farm Accounts. Farmers who visited the Ohio State niversity were interested in the sya m of accounts used on the farm. While the land is not tilled for the ame experimental purposes as the elds at the Agricultural Experiment Station at Wooster, a certain amount experimentation has to be done in rder to determine the most profitable nethods of handling the land. These xperiments are the same in kind as hould be conducted by farmers grarally. The accounts are kept in such orm as to show the results of the difcrent methods employed on the diferent fields.

Potash Content of Clay Soils. According to a recent bulletin of the New Hampshire Station, the clay and lay loam solls carry sufficient potash or the production of maximm yields of hay, and that a large part of the potash applied in fertilizers is lost so far as the crop is concerned. In other words, the addition of commercial potash to such soils is unnecessary. When barnyard manure, which contains a large amount of potash, is added, the value lies, not in the pot ash, but in the other fertilizing ele ments, and in large part in the improvement of the physical condition of

Importance of Reading Matter, The up-to-date farmer needs a good Hhrary as well as any other professional man. The progressive man reads some at all seasons of the year, but there is more time for reading in winter than in summer, especially of long evenings. Get good books of all kinds and read them. Every dollar spent in good books will bring \$10 actual return, not counting the pleasure and general information derived from the reading.

Good Hog Sense. It is not a good plan to take all the pigs from the sow, unless one or two worth the trouble.

of theen can be turned with her some bours after, to draw the milk she will have at that time, and again, say after a lapse of twenty-four hours. The pre ferred way is to leave about two of the smallest with her for several days, and after that leave only one for two or three days more, by which time he flow of milk will have been so grad nally diminished that no injury will result to the sow by keeping them an threly away from her. This extra supply of milk helps also to push the smaller pigs along in growth and put them more nearly on ar equality in size with their thriftier mates.-Co burn's "Swine in America."

A Convenient Call Trough. A farmer near Paullina, Jowa, has been using an ingenious method for to him by the fact that he used a are exceptionally valuable. This is manure spreader in his sheds and consequently all obstructions that extended out a foot from the wall were in

As calves require a low manger, one can be hung on hinges so that when it is turned up it will not occupy more than five or six inches of space out from the wall. It may be any length, but it is better to have it made in sections about six feet long The accompanying illustrations show

he trough when it is all ready for ceding purposes, and also when it is cooked up close against the wall.

Cultivation for Forest Trees,

The young farmer forester should be xperienced in the art of stimulating he growth of trees in natural groves by cultivation. When we come to think how hard the ground is in some woods it is really strange that trees get enough moisture to support themselves. The difference in the amount of rainfall absorbed by a level-plowed field and hard-baked billside is very great, and it is wonderful how an oak or hickory growing on a hillside ever attains to great height and size.

Difference in Types. The man who has been accustomed all his life to raising the lard type of bog will have his troubles when he omes to shift over to the bacon breeds.

This has nothing to do with the merits the breeds in question, but the feedng habits, the general character and make-up of the two types are different, and some time and possibly some expense is necessary before the experienced feeder of the one type can hilt over and became a successful ceder of the other.

Selling Value of Cows. The North Carolina experiment staion proposes a plan to place a buying and selling value on cows on a basis of the yield and quality of their milk. According to the brief account of the olan it lays down a rule to fix a price or a cow at the rate of \$12 per galion of milk given per day that shows 5 per cent fat. To this add or subtract \$1 for every one fourth on 1 per ent fat which is above or below the 5 per cent.

Keeping Onions Frozen.

Most fruits and vegetables are inured more or less by freezing, but the nion may be kept all winter in frozen condition without its eating qualities being affected. To keep them n a frozen condition, first let them freeze solid and then place them in a cold loft of the barn or other building protected on both sides with a heavy covering of hay or straw, to maintain an even temperature

Protecting Tree Trunks.

The trunks of fruit trees may be wrapped with paper to protect them from mice and rabbits, the paper beng tied on with a cord to hold it in place. Old newspapers may be used for the purpose, the care necessary being to see that the paper entirely covers the trunk of the tree high enough to prevent the rabbits reaching the exposed portion above the paper.

Cowpens Enrich Soil.

Not only have cowpeas been found caluable as a soil-enriching crop, but hey have proved to be most excellent eed for live stock used as a forage and ured hay. The hay used is comparaively rich in protein and makes good dairy feed, and is likewise good for oung stock and work horses, fed in Imited amounts.

Ventilation and Egg Fertility, A common cause of the failure of fertile eggs to hatch is lack of sufficient ventilation The fresh air supply depends to a greater extent than is generally known on the difference in the temperature of the air inside the machine and that of the room in which the incubator stands.

Potato Bug Destroyer. There appeared in some parts of Iniana last season a small bug with variegated wings which destroyed housands of potato bugs. A haif dozen bugs will quickly kill 100 or

nore of the potato bugs on a single

plant. Specimens have been sent to

the government for examination. Lesson of the Boll Weevil. Agricultural teachers have urged liversified farming for many years, nt with little effect until the appearance of the boll weevilt. This insect made cotton farming very precarious

the systems of farming prevailing in that section. Raising Chicks First Principle. The feeding and growing of little chicks is an art which everyone must learn before they can wish for success in poultry raising. However, it is

and has led to radical modifications in

Teaching Bany to Walk.

Never encourage a baby to try to walk if he seems unwilling to learn. The sockets of the joints are very shallow in tiny children and the bones so feebly connected that they are easily dislocated. Besides, bowed legs are very much easier to avoid than to cure, and standing before the legs are strong enough to bear the weight of the body may result in permanent deformity.

WORTH KNOWING

Simple but Powerful Prescription for Rheumatism and Lame Backs. This was previously published her and cured hundreds, "Get one ounce of syrup of Sarsaparilla compound and one ounce Toris Compound. Then get half a pint of good whiskey and put the other two ingredients into it. Take a tablespoonful of this mixture before each meal and at bed time. Shake the bottle each time." Good effects are felt the first day. Any druggist has these ingredients on hand or will quickly get them from his wholesale

An Obedient Dog.

Schnapps is a dachshund, and the people who know all about the breed call the queer looking animal handsome. In the house in New York where he is the pet he is credited with more than ordinary dog sense and with understanding every word said to him in English or German. In order to demonstrate his sagacity his master said to him a few evenings ago: "Schnapps, the young people have been here long enough. Go down and tell the boys to go home." Downstairs he waddled and, standing before the visiting youths, barked and howled, then ran to the front door and back again and kept up the performance until, as his proud master explained "the young men heard and saw the point Pretty smart for a dachs, ch?
