Things.

Sixteen years ago few people in the world knew of such a preparation as a provider for the Feet. To-day after the genuine merit of Allea's Foot-Ease has seen told year after year by one gratified person to another, there are millions who would as soon go without a dentifice as without Allea's Foot-Ease. It is a cleanly, wholesome, healing, antiseptic powder to be sluncen fitto the shoes, which has given rear and comfort to fired and aching feet in all parts of the world. It cures while you walk. Over 20,600 testimonials of cures of smarting, swollen, perspiring feet. It prevents friction and wear of the stockings and will save in your stocking bill ten times its cost each year. Imitations pay the dealer a larger profit, otherwise you would never be offered a substitute when you ask for Allea's Hoot-Ease, the original powder for the feet. Initations are not advertised because they are not permanent. For every genuine article there are many imitations. The imitator has no reputation to sustain—the advertiser has, it stands to reason that the advertised article is the best, otherwise the public would not by it and the advertising could not be continued. When you ask for an article advertised in this paper, see that you get it. Refuse this paper, see that you get it. Refuse implations.

Mhe Didn't Care. Mrs. Stuyvesant Fish, at a luncheon in New York, said with good-humored mockery of the suffragettes:

"If they keep on, their outlook, really, will become as naively selfish as Mrs. Dash's. Mr. Dash, as his young wife posed before the mirror in a decollete gown from the dearest shop in the Rue de la Palx, regarded the pretty little lady indulgently, and said with a sigh:

"'You do look nice in that frock, dear, but it cost me a heap of money.' "You dear old boy, she cried, 'what do I care for money when it's a question of pleasing you?""

PERRY DAVIS PAINKILLER for all surts of cuts, bruises, burns and strains Taken internally it cures diarrhea and dysectory Avoid substitutes, 25c, 35c and 35c.

Flowers at Funerals.

The custom of having flowers at funerals is very ancient. The Greeks, centuries before the Christian era, crowned the dead body with flowers and also placed flowers on the tomb The Romans decked the funeral couch with leaves and flowers and spread flowers, wreaths and fillets on the tomb of friends. Most of our funeral customs are derived from the Romans such as dressing in black, walking or riding in procession, raising a mound over the graves, etc., and among the rest is that of using flowers at fu

Libby's Cooked Corned Beef

There's a marked distinction between Libby's Cooked Corned Beef and even the best that's sold in bulk.

Evenly and mildly cured and scientifically cooked in Libby's Great White Kitchen, all the natural flavor of the fresh, prime beef is retained. It is pure, wholesome, delicious, and it is ready to serve at meal time. Saves work and worry in summer.

Other Libby "Healthful" Meal-Time-Hints, all ready to serve, are:

Peerless Dried Beef Vienna Sausage, Veal Loaf Evaporated Milk Baked Beans, Chow Chow Mixed Pickles

"Purity goes hand in hand with the Libby Brand."

Insist on Libby's at your grocer's.

Libby, McNeill & Libby Chicago

Mr. Rossettl's daughter, Mme. An gell, has been writing a book on Byron and Shelley and their friends in Italy. We are told that it is based in part on materials hitherto unpublished.

Mrs. T. P. O'Connor, the American wife of the Irish M. P. and editor of 'M. A. P.," is about to bring out a volume of reminiscences which she calls "I Myself." It is said to be full of descriptions and anecdotes of celebrities.

At the latest meeting of the Society of Authors, London, Maurice Hewlett drew attention to the fact that Thos. Hardy, recently elected, was but the third president the society has had in its entire career. Mr. Hardy's pre decessors were Tennyson and George Meredith.

How female government works among the ants is shown in Dr. Henry C. McCook's new volume, "Ant Com munities." The worker ant is a female in which reproduction has been suber dinated, and the social life and gov ernment of ants, one of the most remarkable examples in natural science devolves wholly upon her. Dr. McCook continues: "Their internal affairs call for no police. Among these millions of citizens there is not one criminal one degenerate. I do not recall in all my observation a single example of an ant whose actual offending called for civil punishment."

The Bardon Papers, which cover the period of the imprisonment of Mary Queen of Scots, from May, 1572, to the date of her execution, have just beer publish for private circulation. have long given up all hope," say the Saturday Review, of London, "o ever having the dark places in Mary's career completely cleared to the light Documents have long since proves quite useless. Those who believe Mary to be innocent of Bothwell's murde or of direct complicity in the Babing ton conspiracy to murder Elizabeth have made up their minds that damn ing evidence is forgery if written, or falsehood wrung by torture if attest

ed. No one of those who have not seen these papers in the original will be snoved a jot now that they may read them in print, Partisans who wish to be educated in the subject matter of their case cannot, however. afford to neglect them."

"Musicology" is the title of a new book by Maurice S. Logan, Musicology means the science of music, as distinguished from music as an art, as it is usually taught. The object of this book is to furnish a practical and comprehensive text book on the thory and philosophy of music, for schools and general use. For school use it is intended to be included in the science course, rather than in the music course. The science of music deserves to rank with the other sciences, the author thinks. Mr. Logan holds that to regard music simply as an art is inadequate; every child should be taught the fundamental principle of music; as a matter of education, de veloping the mind, musicology has as much right as any other ology. Th author discusses common terms and signs used in music, rhythm, expres sion, keys, reading music, modes and scales, the structure of music, acoustics, principal sources of musical ound; and he adds a valuable dictionary of terms and definitions. To students of music the book may be perfectly intelligible; but to the mere over of beautiful music it is alarmngly technical.

ARTISTIC JAPAN,

tules of Harmony Prevail in Even the Humblest Homes. By far the greatest charm of Japan and her people lies not only in the fact that the artists know the secret of the most wonderful carvings, cast ings, wood and metal work, silken brocades and tapestries, exquisite cloisonnes and porcelains, things for the fortunate few, but also in the further and more important fact that the daily life of the poor is surrounded, permeated, interfused by taste and refinement. Even the workmen in their gardens and homes are daily using tasteful domestic implements which are the outgrowth of the thought and

needs of the people. The designs and proportions of the numblest houses, exteriors and interiors, are settled for all time by certain rules of harmony; the dress of the peasant is not left to possible hideous individual caprice, but follows established canons of color, cut and usage; the garden, however small, the fence or paling that walls it in, the roof over the well, over the gate, the great lantern that hangs by the door, the bucket in which the water is fetched and the bamboo dipper from which it is poured, the bronze brazier for coals, the tea service-all these and a thousand more details of daily life are arranged according to a pat tern which may be very old, but which, as a result, adds immeasurably

to the satisfaction of life. And yet Japanese craftsmen, while holding hard by tradition, have not failed to add to their work the subtle touch of personality. In the motifs of their delicately impressionistic and symbolical designs is constantly seen their reverence for the early masters, and as constantly is perceived the individual variation which prevents each piece of work from having a duplicate. -M. L. Wakeman Curtis in Crafts man.

Two Bucks.

"That duck was fine," said the enthusiastic patron. "I can't imagine anything more acceptable than a nice little canvasback.

"Unless," said the proprietor of t restaurant, "it's a nice big greenback. -Philadelphia Record.

The smaller the town, the more layers there are in company cake. In a big city like New York, they are satisfied with only two.

Very few of us are so repentant that we will promise to be good without putting an "if" to it.

They are genuine, true, and full of There can be no mistake in the as-

sertion that the incubator will be needed on the farm next spring more than ever before, since the market price of eggs will without doubt be higher than ever was known, and it will be simply good business policy to keep the hens turning out 20 to 30 cent eggs instead of hatching and brooding chicks.

Condiment for Hens.

The reason that so many people are not enthusiastic over the poultry business is that they do not get eggs in winter when prices are high. Hens, as a rule, refuse to lay out of season and when the weather is cold and county, Mo., has at last found the secret. In winter and cold weather he feeds his hens cayenne pepper and horse-radish, which he says makes the hens lay furiously,

This man, Mr. Henry Ahlers, takes his eggs to the town of Clayton, when he goes to work every morning, and the regularity with which he has been bringing them in during the cold weather caused him to be closely questioned. His reply is: "I just feed them a little cayenne pepper and horse-radish once in awhile. I have a large horse-radish patch close to my poultry yard and have found that even the dried horse-radish leaves are good for the chickens.

Mr. Ahlers states that he has seventy hens, and that he gathers as many as twenty-five dozens of eggs each week. He does not state what general feed and care he gives his flock of hens for producing such p yield of eggs in cold weather .- Journal of Agriculture.

Adulteration Casues Lous. Farmers' Bulletin 382, United States Department of Agriculture, on the adulteration of forage plant seeds, contains the following conclusions:

Serious and intentional adulteration of important forage plant seeds is frequently practiced. Seed is sometimes

misbranded. It is possible for purchasers to detect most kinds of adulterations of

misbrand of farm seeds. In detecting adulteration it is necessary to know what kinds of seeds are subject to adulteration, the means em ployed in adulteration and the distinguishing character of both the crop and the adulterant seeds.

A cheap magnifier suffices in distinguishing crop seeds from other A simple germinating test discloses A little effort on the part of the

purchaser of seeds directed to the detection of adulteration or misbranding

It is advisable to make tests for adulteration at home; otherwise the suspected seed may be sent to the seed matter of adulteration will be made promptly and without charge.

Fishy Butter.

What causes the fishy flavor in but ter? That is something no one has been able to find out until the government dairy foods undertook the task But even the government cannot find out all the causes, for there are more than one. However, the main cause seems to be some particular substance produced by the oxidation of one of the combinations of the acid development in the ripening of the cream. In other words, it is caused by a slow chemical change to which acid is es sential and which is flavored by the presence of small amounts of oxygen.

It has been a generally accepted theory among buttermakers that sour cream made the best butter. This idea is reversed by the investigations which bring forth the conclusion that butter made from sweet cream does not contain the elements that go to make fishy flavor.

in all the experimental butter made in the last three years there has been no trace of fishy flavor in that made from pasteurized sweet cream, churned without the addition of a starter In butter made from pasteurized cream with starter added, but without any subsequent ripening, there has been ful exceptions. On the other hand many lots of experimental butter made from well ripened cream developed marked fishiness.

It is evident therefore that there is a direct relation between the acidity within arm's length. There are fewer of cream and the development of fishy flavor in the butter. However, as the work progressed it became apparen that the acidity, although having a de termining influence on fishy flavor. was not the sole cause.

With this factor controlled, it was impossible to make butter with any certainty that it would become fishy Frequently butter made from crean with a high acidity showed no trace of this flavor.

It was found that overworking th butter increased the tendency to fish) ness, and this flavor could be pro duced with reasonable certainty t overworking high-acid butter. All but ter contains considerable quantities o air, and this is increased by the work ing, thus producing conditions more favorable to oxidation.

Fishy flavor may be prevented with certainty, says Mrs. Rogers, the gov ernment expert, by making butter from pasteurized cream, without ripening. The addition of a starter to pasteurized sweet cream, without sub equent ripening improves the flavor the fresh butter without adding enough acid to cause fishiness. Pas teurization of sour cream will not prevent the development of fishy flavor.

Do not bang the bits against the orse's teeth. Be patient and he will open his mouth.

When two horses become accustomed to working together, don't change

A friend from Denmark who declares he knows tells me that the late King and Queen of Denmark put down their undoubted and even extraordinary youthfulness of appearance and character to the fact that they nover had anybody about their court who was over 40 years of age. Sixteen Years of Skin Disease. "For sixteen long years I have been suffering with a bad case of skin dis ease. While a child there broke out a red sore on the legs just in back of my knees. It waxed from bad to worse, and at last I saw I had a bad skin disease. I tried many widely known doctors in different cities but to no satisfactory result. The plague bothered me more in warm weather than in winter and being on my leg joints it made it impossible for me to walk, and I was forced to stay indoors in the warmest weather. My hopes of recovery were by this time spent. Sleepless nights and restless days made life an unbearable burden. At last I was advised to try the Cuticura Remedies [Cuticura Soap, Ointment and Pills] and I did not need more than a trial to convince me that I was on the road of success this time. I bought two sets of the Cuticura Remedies and after these were gone I was a different man entirely. I am now the happiest man that there is at least one true cure for skin diseases. Leonard A. Hawtof, 11 Nostrand Ave.,

Sick Women Well.

Women's Secrets

There is one man in the United States who has perhaps heard more women's secrets than any other man or woman in the country. These secrets are not secrets of guilt or shame, but the secrets of suffering, and they have been confided to Dr. R. V. Pierce in the hope and expectation of advice and help. That few of these women have been disappointed in their expectations is proved by the fact that ninety-eight per cent, of all women treated by Dr. Pierce have been absolutely and altogether cured. Such a record would be remarkable if the cases treated were numbered by hundreds only. But when that record applies to the treatment of more than half-a- million women, in a practice of over 40 years, it is phenomenal, and entitles Dr. Pierce to the gratitude accorded him by women, as the specialists in the treatment of women's diseases.

charge. All replies are mailed, scaled in perfectly plain envelopes, without any printing or advertising whatever, upon them. Write without fear as without fee, to World's Dispensary Medical Association, Dr. R. V. Pierce, Prest, Buffalo, N. Y. DR. PIERCE'S FAVORITE PRESCRIPTION Makes Weak Women Strong,

Every sick woman may consult Dr. Pierce by letter, absolutely without
