

Succulent.
The attractive young lady who had written "urgent" on her card was shown into the consulting room of Sir Chopham Fyne, head of the famous surgical hospital in Splintshire, England.
"And what is the matter with you?" said the great man.
"I wish," she answered, "to become a nurse in this institution."
The surgeon tapped a thoughtful tooth with his lancet. "First one question: Have you had any previous experience?"
She dazzled him with a reassuring smile.
"Experience?" she cried. "I should just think so. Two of my brothers play football, another has tried to cross the channel in an aeroplane of his own make, mother is a suffragette and father keeps a motor car."

Another rather romantic wedding was pulled off in this place Thursday night of last week between 11:30 and 12 o'clock midnight, just in the niche of time to avoid having the ceremony occur on Friday, as the groom was of a superstitious turn of mind, and having been the direct cause of the death of seven black cats he didn't want so important an event as this to take place on unlucky Friday. The county judge being out of town George Wilkins, clerk of the district court, was aroused from his peaceful slumbers about 11 o'clock p m to issue the required permit to J A Montgomery and Miss Hazel Bailey, both residents of Sioux City, who had made their belated trip to this place in an automobile. After the necessary document was secured the wedding party drove to the M E parsonage and finally succeeded in arousing Rev Warren, who was sleeping "the sleep of the just," and on the street crossing near the parsonage, in the glare of the automobile lamps, the solemn vows were taken that made two hearts beat as one.

Electric Line to This Place an Assurance

Assurance of the completion of elaborate plans for a summer resort at Crystal Lake, Neb, which will rival any amusement place in the cities of the middle west was given out yesterday by Riley Howard, of Orchard, Neb, who recently obtained the controlling interest in the Sioux City, Crystal Lake and Homer railroad. The building of the amusement park and resort will constitute an outlay of \$100,000. The promoters assert that it will be completed by next June. A contract with the Combination Bridge company, which was closed yesterday, gives the railroad company the use of that structure for thirty years and assures good transportation facilities between Sioux City and the park.

Along with the plans for the resort, the railroad company is making preparations for the extensive improvement of the line between Sioux City, Crystal Lake and Dakota City. Cars will run directly between the three points, and the present inconvenience of transferring will be eliminated. Mr Howard said last night that within a few months a ten-minute service between Pierce street in Sioux City and the lake will be instituted.

The closing of the contract with the bridge company is an event which has long been desired by the various owners of the railroad. Failure to secure entrance to Sioux City according to Mr Howard, has been a deterrent in the progress of the road and detrimental to the progress and growth of the south side of the river at a residence place. Soon after Mr Howard became interested in the south side railroad he opened negotiations with the bridge company, and a short time after that a verbal agreement was reached, although the formal contracts were closed only yesterday.

The summer resort will be on that part of the lake shore which now is known as Foyes park. The company controls 200 acres of its holdings on both sides of the lake.

A hotel which will cost about \$20,000 will be built. It will not be constructed on the lines of the ordinary summer hotel, however, but will be built so that it will house guests comfortably in the winter, the promoters figuring on the attractions of winter sports on the lake to pay for the extra expense involved in such a building.

Minor details to the class of amusement other than the aquatic attractions have not been worked out, but the appropriations will be so laid that plenty of devices for thrills and entertainment for visitors who go there for an evening's outing will be provided.

According to the statements made by Mr Howard the building of the resort will mean that twenty-five or twenty-six summer cottages which now dot the shores of the lake in the Foyes park will have to be moved farther down the shore.

In his opinion there is not a more ideal spot in the Missouri valley for a resort such as that which will be built than at Crystal Lake," said Mr Howard. "For twenty years I have been interested in just such a project. The famous lakes of Minnesota cannot compare with it for such a purpose. The water is clear. Its environments are made beautiful by the frame of trees about the clear setting of the crystal water. There is no stonch like that which arises from so many of the northern lakes. For bathing, boating and fishing it is ideal. The Dakotas, Nebraska and western Iowa need just such a place. It will mean much to Sioux City, for there now is no such resort where one may go in the summer within hundreds of miles.

With the closing of the contracts with the bridge company we have assurance of excellent transportation facilities. Cars will be run directly from the lake to a central point in Sioux City. We will electrify and utilize tracks which now are on the bridge. The contract stipulates that in case the structure at any time again is used for steam road traffic that we may build tracks in the roadway on either side of the bridge.

Through a project which was started four years ago we have a crossing over the Omaha tracks in South Sioux City, and a straight line track is built half way from that point to the South Sioux City bridge approach. The other half of that track will be constructed, and with that we practically will have a straight line from the bridge to the present end of the Crystal Lake road at the Omaha tracks. In connection with the improvement of the road a bonus has been raised by Dakota City to assure the electrification of the road from Crystal Lake to that place. That bonus \$2,000. Workmen will start to work on that proposition next Tuesday, and when it is completed Dakota City will have direct transportation to Sioux City.

Ample preparations for rolling stock will be made so that there will be no discomfort for passengers in the handling of the crowds. Of course various steps in the project will be completed consecutively, but the road will be finished and the park ready for the reception of the public by next June at least. Through the summer months we will arrange for a twenty-minute or a half hour service out of Sioux City. The road is capitalized at \$100,000. Of the stock, \$50,000 has been subscribed. I have the control of that stock. Very little indebtedness stands against the road, and with our resources it will not be necessary, as we can see now, to issue bonds."

J M Coe, 1524 Inhabille street, also is a stockholder in the company and is interested in the development of the project. He was particularly enthusiastic over the outlook and is the promulgator of extensive plans for the improvement of the lake as a watering place.

The lake is more than six miles long and constituted a happy spot for the development of our plans, said Mr Coe. Boating will be one of the popular attractions. A roadway will be built in the lake. That is, two strings of varicolored lights will mark the channel and prove a striking feature not only in the navigation, but in the aspect of the park at night.

The hotel will be built on a high point in the park which overlooks a long stretch of water, where it will be cool, and in fact nature could not have built a more appropriate playground for the people of this section of the country.—Sioux City Journal, 17th.
