NEBRASKA

From 6,477,282 acres planted to or in 1909 Nebraska gathered a crop of 169, 179, 137 bushels, worth \$98, 123, 871. That crop if loaded into standard ireight cars, 1, 200 bushels to the car, would have made a freight train ong enough to reach from Chicago to Denver, 1, 040 miles, with 172 miles of corn filled cars left over to adorn the of hardware, graniteware and tinware side tracks.

There are millions of acres of corn and in Nebraska that have never been touched by the plow.

In 1909 Nebraska harvested 50, 313,-600 bushels of wheat from 2, 564, 379 acres, an average of practically 20 bush els to the acre, This wheat crop was worth \$46,000,000. Il that wheat crop had been loaded into standard freight cars it would have made a train long enough to reach from Omaha to Mc Cook on the Burlington or from Omaha to North Platte on the Union Pacific.

There are millions of acres of wheat land in Nebraska that have never been touched by the plow.

The duty of Nebraskans who desire to assist in the work of developing the state, is to call the attention of homeseekers to the opportunities that are offered by the great young state.

There are 100, 000 quarter sections of unoccupied land that may be made into profitable farms. The soil is fertile, the rainfall quite equal to that of other sections that have become agricultur-ally rich, and the transportation facili ties far superior to what the more favor ed sections had a dozen years ago.

There is room and opportunity for the accumulation of a competence for 250, 000 more farm owners in Nebraska The hardships of the early pioneers need Salonger be endured by newcomers They will have the advantage of schools and churches, and railroads and mar-kets right from the start. Their only Co,'s cavital needs to be industry, frugality and honesty. Some of Nebraska's most prosperous farmers of today were ren-ters ten or fitteen years ago. What they have done a hundred thousand more men may do within the next ten or filteen years.

The same capital, the same soil and the same frugality necessary to acquire a competence in the Canadian north. west, would mean ample riches after anequal length of time upon a Nebraska farm. For years the Argonouts travel ed across the plains of Nebraska in search of the gold and silver or the mountains, unmindful of the fact that at the grass roots in Nebraska lay a ages of the past-eternal mines of riches that grew more fruitful as the days went by. From the grass roots in Nebraska in any one of the last ten years has been "mined" more wealth than the famed gold fields of Marth have yielded in a decade, and the men who mined their wealth from the soil of Nebraska endured no hardships compared to the Alaskans.

Other thousands are being lured to Crystal lake. the "bonanzas" of the northwest, unmindful of the fact that greater riches and greater opportunities lie in the soil of the great state of Nebraska.

There are millions of acres of govern ment land in Nebrasks all of it good for something, most of it good for genera purposes and much of it good for any thing in the line of agriculture suited to he temperate zone

The hundreds of growing cities and towns offer inducements for merchandising and manufacturing. The mechanic may find employment in the smaller cities where the cost of living is comparatively small and where the opportunity to become a home owner is great.

The Interstate Fair has grown steadily year by year until today it easily takes rank sith the leading state fairs of the United States and the foremost provincial fairs of Canada.
Sioux City is the center of the richest 200 miles square of farm land on the face of the earth, and this fact alone explains the success of the Interstate Live Stock Fair as an institution.
This territory does not yield the products for very much of a mineral display of fine horses, purebred cattle, and the best in hogs, sheep and fowles of the barnyard will be larger this year than ever before. Heretofore the snnual fat stock show of St Joseph, Mo, has been held the same works.
